Resources – Currently in Delivery

Outlook and Strategy

OUTLOOK

- Demand for base metals is expected to remain strong, in support of the energy transition
- Market for resources used in new and low emission technologies continuing to grow, including lithium, copper, nickel cobalt, graphite, vanadium and manganese
- Demand for gold continues to be buoyed by investment in 'safe' assets amid rising inflation and ongoing geopolitical uncertainty, and growing consumption in technology
- The transition to green energy, with the development of systems to operate on low carbon energy sources, maximising waste recovery and reuse, sets the foundation for a period of challenge, innovation and change
- Domestic manufacturing continues to present opportunities for the Industrial Processes sector

STRATEGY

- Continued focus on achieving broader geographical reach – across Asia-Pacific and the Americas
- Balanced project delivery portfolio – mix of EPCM and EPC
- Diversify our sectoral exposure into burgeoning green energy markets, in part via continued focus on downstream minerals processing in battery minerals
- People Plan – continue to attract, engage, inspire and retain a high performing, global, professional workforce
- Knowledge management – investment in systems to drive efficiency and facilitate work sharing across divisions and subsidiaries globally
- Innovation and emerging technology – digital twinning (ADP and Orway IQ) and engagement with industry (eg FBICRC and CSIRO)
