

QUARTERLY REPORT for the period ended 30 June 2018

FINANCIAL HIGHLIGHTS

- Average net production for the quarter ended 30 June 2018 was 528 barrels of oil equivalent per day, up 20% from the quarter ended 31 March 2018.
- Production from the Foreman Butte project increased from the March quarter total of 34,450 barrels of oil (net production) to 46,348 barrels of oil for the June quarter. The increase in production is due to the workover program Samson has put in place following the acquisition and refurbishment of its workover rig.
- The Company has acquired a workover rig and this rig has been refurbished, transported to Williston and commenced its first workover in February. During the quarter, 7 wells have been returned to production.
 These workovers have added around 93 BOPD to the projects output.
- As expected during this time in North Dakota and Montana, various roads have been closed during the quarter for the spring thaw which impacts the Company's ability to truck water and oil leading wells to be shut in from time to time.
- During the quarter the Company injected 42,011 barrels of water into our Rose Waterflood. While pressure
 data is being monitored, it is expected to be at least the first quarter of 2019 before any noticeable pressure
 increase is detected.

Prior 12 month production by quarter:

	Q3 2017	Q4 2017	Q1 2018	Q2 2018
OIL, BO	54,580	46,305	38,134	47,540
GAS, MCF	8,429*	2,637	2,067	1,647
BOE	55,94	46,744	38,478	47,815
BOEPD	623	520	427	531

^{*} Does not include gas produced for which we have not yet received the revenue.

Estimated net production and revenue:

	OIL Bbls	OIL US\$	GAS Mscf	GAS US\$	TOTAL US\$
June 2018 Quarter	47,540	2,944,355	1,647	5,208	2,949,563
March 2018 Quarter	38,134	2,190,035	2,067	5,989	2,196,024

Average commodity prices:

OIL US\$/BbI	GAS US\$/Mscf
\$61.93	\$2.90
\$57.43	\$2.90
	\$61.93

In some cases revenue is yet to be received and is therefore an estimate.

PROJECTS

Rainbow Field: Williams County, North Dakota Mississippian Bakken Formation, Williston Basin Gladys 1-20H

Samson 23% Working Interest

Kraken Operating, LLC, the operator of the Gladys 1-20H well, has been producing this well at an average rate of 74 BOPD and 86 MCFPD during the quarter. There are 6 additional Bakken/Three Forks drilling locations on this 1280 acre lease.

Foreman Butte Project: McKenzie & Williams Counties, North Dakota and Richland, Roosevelt, Sheridan Counties, Montana

Mississippian Madison Formation, Williston Basin

Samson 87% Operated Average Working Interest

During the quarter, Samson has signed a purchase and sale agreement to sell the majority interests in this project for a purchase price of \$40 million with an effective date of 1 January 2018. The Company has convened the shareholder meeting required to approve this transaction for 13 August 2018, with the transaction expected to close on 18 August 2018 in line with the terms of the purchase and sale agreement. Importantly, Samson has retained a 15% working interest in the Home Run field within this project. This field contains the majority of the proved undeveloped locations within the greater project area. Maintaining this interest will allow Samson to participate in the upside of the project.

The Home Run Field (also known as the Foreman Butte Field) is the largest area oil field in Samson's portfolio. It was developed on a 640 acre spacing pattern and our engineering and geologic analyses have determined that only 3.2% of the original oil in place has been recovered to date. Given that oil fields can recover up to 20% of their oil in place, there would appear to be significant un-developed oil to be recovered from this field.

Samson averaged a gross 712 BOPD from its operated wells in the Foreman Butte Project this quarter. The production is up slightly from the previous quarter following workover operations.

LIQUIDITY

Sources of cash for the next quarter are as follows:

	US\$('000's)
Current cash on hand	1,390
Cash receipts from June quarter oil and gas sales*	1,132
TOTAL	2,522

^{*} Estimate based on realized June quarter production and \$61 oil price (indicative of estimated oil pricing), allowing for a one month delay between production and cash receipt.

FINANCIAL

Mutual of Omaha Credit Facility

Following the signing of the purchase and sale agreement, Mutual of Omaha have extended the Forbearance agreement with respect to the credit facility until 24 August 2018, which will allow the transaction to close and the loan to be repaid in full.

Foreign Exchange Rates

The closing A\$:US\$ exchange rate on 30 June 18 was \$0.74 The average A\$:US\$ exchange rate for the quarter was \$0.76.

The Company's cash position at 30 June 2018 was as follows:

	US\$('000's)
Cash at bank on deposit	1,390

Hedging

Product	Start Date	End Date	Volume (BO/Mmbtu)	Floor \$	Ceiling \$
WTI	1 July 2018	31 Dec 2018	80,960	45.00	56.00
Henry Hub	1 August 2018	31 Dec 2018	50,490	2.65	2.90

As at 30 June 2018, the value of Samson's hedging program was (\$1.4 million). At 19 July 2018, the value of Samson's hedging program was also approximately (\$0.9 million).

Notes

- 1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
