

4 April 2016

Market Update

The directors and management of Site Group International Limited ("Site", ASX: SIT) are pleased to provide an update in training and development at its Clark facility in the Philippines.

East Timor Graduation at Clark

Site hosted a graduation ceremony on Friday April 1st which was attended by Timor-Leste Ambassador to Philippines, His Excellency Juvencio de Jesus Martins, Timor-Leste Immigration Attache, Mr Pankashio Silveiro, Senior Trade Commissioner for Australia Mr Anthony Weymouth as well as senior Bayu-Undan project representatives Mr Peter Burgers, Bayu-Undan Field Manager for ConocoPhillips and Mr Paul Abernethy, Clough AMEC.

A group of East Timorese men and women graduated having completed their training in mechanical engineering and electro technology at Site after 6 months of hard work and dedication

Caltech (a Timorese company), Clough AMEC and ConocoPhillips conducted a rigorous selection process to select 18 candidates to undertake training for employment on the Bayu-Undan project.

Several hundred East Timorese applied for the program and after written assessments and interviews 75 were selected to take part in a training program jointly developed by Caltech and Site Skills Training. The best 40 students from this program then undertook an intensive 3 week English for Specific Purpose program delivered by SST. Both these programs were delivered in Timor-Leste. After this, there was a final round of interviews with 9 selected to become mechanical technicians and 9 to become electrical workers.

The trainees arrived in September 2015 to undertake their 6 month live in program at Site's Clark facility. During their studies the trainees focus was on developing work relevant skills. The projects undertaken include building scaffolds, wiring of renovated areas, servicing engines, building electrical panels and other equipment. These are the tasks they will undertake in the workplace.

In addition to the trade skills developed, a large emphasis has been on employability skills including time keeping, communication, teamwork, speaking up and speaking out and budgeting.

At the completion of the course, all 18 are graduating with newly acquired skills and knowledge to be useful employees on the Bayu-Undan Project. On May 1, the first graduates will step onto the Bayu-Undan offshore rig to commence their career as offshore workers.

This program is part of the commitment of the Bayu-Undan operator and contractors for the nationalisation of the workforce by competency coaching and training in skills for employment.

Dignitaries with Ambassador for Timor-Leste His Excellency Juvencio de Jesus Martins and Australian Trade Commissioner Mr Anthony Weymouth with the graduating Conoco/ Clough AMEC candidates.

Granite

Granite Services International Inc., an affiliate of GE Power (“Granite”) is well advanced in its relocation of a gas turbine and rotational motors for training at Clark. In total, circa 200 tons of equipment have either arrived or due to arrive in Clark with the final container arriving in late April. Global Competency and Training Director for GE and Granite Mr. Bill Wall is leading the layout and design for the equipment in Clark with Site Skills Training Facilities head Ismail Tahir.

Training with the newly arrived and installed technical equipment is expected to commence from late May.

OceanaGold

The latest cohort of OceanaGold candidates have commenced training at the unique OceanaGold sponsored Underground Mine facility located at Clark. The course duration of 4 months is expected to provide the new entrants to the mining industry the pre-requisite skills to work at the Didipio mine in a safe and productive manner.

Safe Live Process Plant for PNG

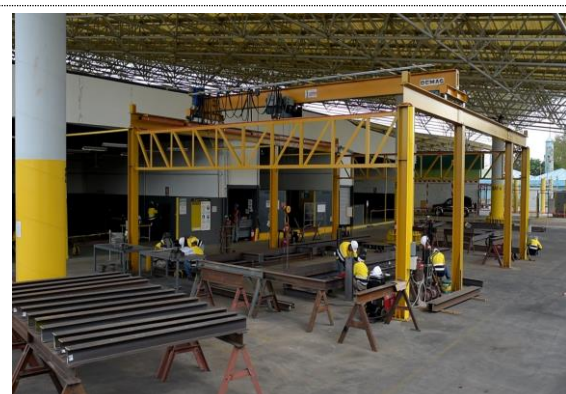

Fabrication of the Safe Live Process Plant (SLPP) destined for Port Moresby, PNG is well underway. The plant is sponsored by the National Petroleum Company PNG’s Kumul Petroleum Academy.

The project for fabrication in Clark is expected to be completed by August ready for an on time delivery.

Recently the Governor for Enga, Sir Peter Ipatas led a delegation of senior Enga officials to inspect the progress of the SLPP at Clark in a continued show of support for Site’s competency based training programs and the development of opportunities to build the workforce Nationalisation program. This program being developed by Site with its partners Kumul Academy, Enga Children’s Fund and Orion Group.
