

Emefcy Group Ltd (ASX: EMC) ASX Appendix 4C Statement of Cashflows

Melbourne, Australia and Caesarea, Israel, 29 April, 2016

The Company's ASX Appendix 4C Statement of Cashflows for the quarter ended 31 March 2016 is attached.

Key achievements since 1 January 2016 for the newly combined group included:

- The early achievement of the first commercial milestone being the delivery of all SABRE modules to the Ha-Yogev municipal facility in Israel for which invoices have been issued and payment is to be received;
- Development of efficient end-to-end logistics for the manufacture of SABRE modules;
- Refinement of the sales pipeline of opportunities covering Israel, Caribbean, Americas and other key geographies;
- Development of a detailed strategic plan covering early entry into the rapidly growing Chinese market, where the current government Five Year Plan calls for wastewater treatment solutions for 30,000 to 40,000 rural municipal communities;
- Development of a detailed "Water as a Service" business model and significant progress on its implementation;
- The appointment of Robert Wale to the Board plus several key senior management appointments;
- The first contract signed outside of Israel for wastewater treatment using SABRE modules at Saint Thomas, US Virgin Islands – a location within the jurisdiction of the USA Environment Protection Agency and also an important reference site for the Caribbean and the Americas generally.

Proceeds from invoices issued to the Ha-Yogev project in the March quarter are expected to be received in the June quarter. There were no extraordinary payments during the March 2016 quarter. The cash position as at 31 March 2016 was US\$7,160,000 (31 December 2015: US\$8,511,000) and was higher than internal expectations reflecting tight cost controls and improved purchasing efficiencies.

The detailed statement is attached.

About Emefcy Group Limited (EMC)

The Company offers a commercially-proven wastewater treatment solution potentially disrupting large existing markets and addressing the growing global need for clean water. Its initial technology, SABRE – The Spiral Aerobic Biofilm Reactor is a modular decentralised wastewater treatment solution using 90% less energy than conventional technology. Future generation SABRE2 and SUBRE are higher capacity solutions being developed for broader markets. The Company's future technology under development, EBR - The Electrogenic Bioreactor is being designed to harvest electricity from highly-loaded industrial wastewater that is typically very costly to treat. The energy's value has the potential to completely offset other treatment operating costs.

Any forward-looking statements in this announcement are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, its directors and management.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
2. The definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report except for any additional disclosure requirements requested by AASB 107 that are not already itemised in this report.
3. **Accounting Standards.** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

+ See chapter 19 for defined terms.
