## Landmark contract signed with ExxonMobil PNG at Kumul Petroleum Academy's SLPP

KUMUL PETROLEUM ACADEMY

sitegroup  
International

Site Group International Limited (Site, ASX:SIT) is pleased to announce that Kumul Petroleum Academy, which trades as South Pacific Employment Institute (SPEI), has signed a landmark technician development agreement with ExxonMobil PNG. The agreement will see ExxonMobil's Operations and Maintenance technicians trained, coached and assessed on Site Group International's ground breaking Safe Live Process Plant (SLPP), an important new feature in the transformation of Kumul Petroleum Academy, Port Moresby.

Site Group International, a shareholder in SPEI, and Kumul Academy's training provider, specialises in supporting companies with managing competence and capability development and has a number of similar process plants in Myanmar, as well as hands on, training, coaching and assessment facilities in the Philippines and throughout Australia.

Site Group International's CEO Vern Wills said this landmark award underpins Site's commitment to support National Workforce Development and Sustainable Growth in Papua New Guinea. "This further demonstrates our technical capability to deliver, competence based, outcome driven, training, coaching and assessment programmes in line with ExxonMobil's requirements and standards."

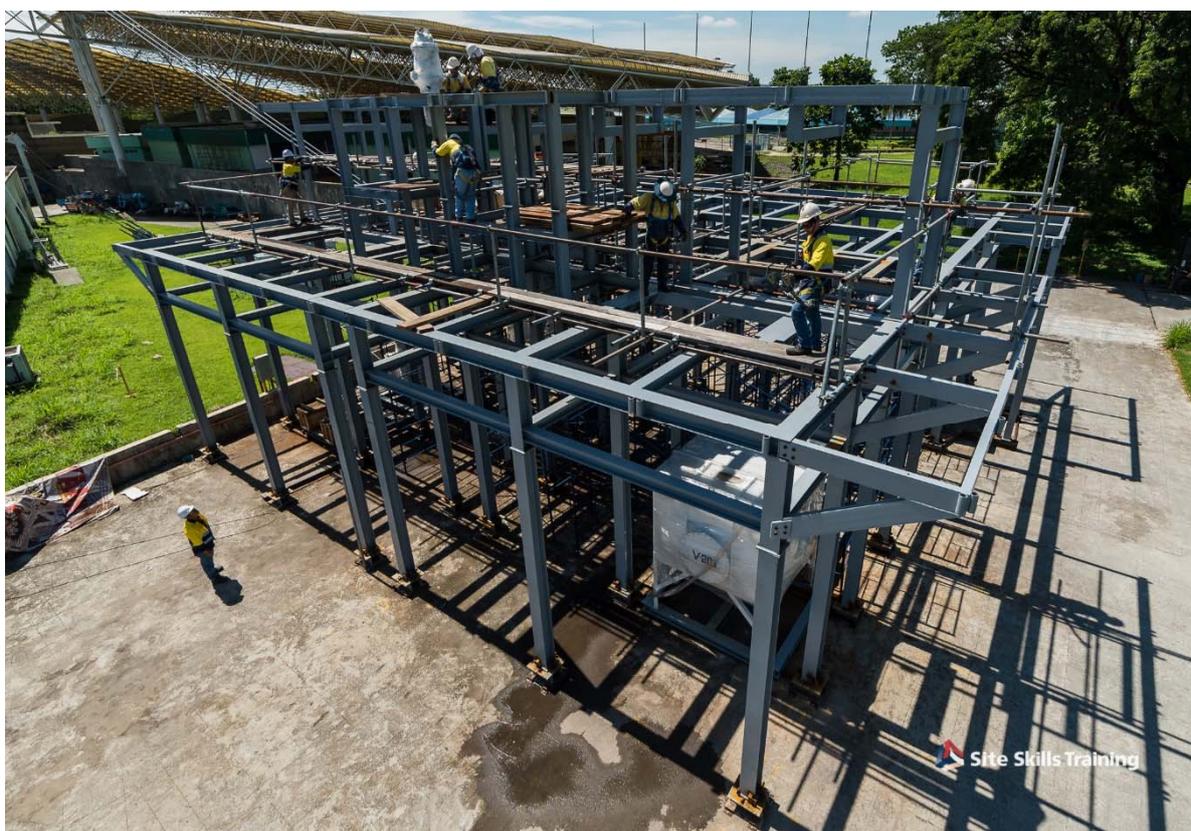

ExxonMobil PNG Managing Director Andrew Barry said the agreement with Kumul Petroleum Academy is a further investment in building the capacity of our Papua New Guinean workforce. "These first class facilities once ready, will provide invaluable training and development of world-class technicians who will run our facilities in the future."

The contract, worth K9 million (\$4.5m AUD) will see technicians undertake a competence based O&M 15-month programme mapped against internationally recognised competence standards which will produce job-ready junior technicians in disciplines of Production, Instrument, Electrical and Mechanical

One of the key features of this competence based technician programme is the On the Job Training and Coaching (OJT and OJC) that provides the trainees with the unique opportunity to demonstrate their newly acquired knowledge and skills in a real safe live process plant environment, this is possible with the introduction of SGI's SLPP (Q4 2016) and will be the first of its kind for the region.

The Chairman of SPEI, Mr Isaac Lupari, said that, as part of the national Vision 2050, the Institute was diligently empowering and developing opportunities for PNG Youth and the

existing workforce to participate in roles that would normally be out of reach and requiring training overseas at great expense and investment. This training will now be provided in country which will put PNG ahead of most of our Asia Pacific regional counterparts. SPEI commends the foresight and commitment of Kumul Petroleum together with Site Group and its initiative and leadership in the nationalisation of the PNG workforce.

## About Site

Site Group International Limited (“Site”) operates several businesses specialising in the delivery of education, training and labour services.

Services are delivered to government, corporate and individual clients, predominately operating in energy, mining, construction and industrial sectors.

Site operates over a dozen facilities throughout Australia, as well as in Papua New Guinea, Myanmar and Malaysia, with a flagship 300,000sqm training and live-in environment in the Philippines. Further, Site has delivered its services to governments and companies throughout the world, in countries including Indonesia, Singapore, China, UAE, Azerbaijan and others.

Site Group International Limited is an emerging company with a strategic business model pursuing earnings-accretive acquisition opportunities along with organic growth. Site is run by an experienced board and management team.

### **Competency Framework Development**

*Site consult on competency requirements to ensure a workforce holds skills required to safely perform their tasks. Clients include governments and tier one project owners in the oil and gas space.*

### **Immersive Environment Training Centres**

*In conjunction with project owners, managers and/or operators, Site engineer, procure and construct Immersive Environment Training Centres which replicate real-life worksite conditions for proper training and competency development of individuals. Amongst others, Site has constructed safe live process plants and underground mine training environments for these purposes.*

### **Training**

*Site specialise in the delivery of training across numerous industries, including energy, mining, construction and professional services. Training is delivered across a range of accredited and non-accredited short courses, Australian High Risk Licences, competency assurance testing, and non-funded and government funded certificate to advanced diploma level courses, apprenticeships and traineeships. Clients include multinational corporations, Small to medium Enterprise, governments and individuals.*

### **Online Learning**

*Site has the capacity for the development, implementation and management of Online Learning Management Systems (LMS) and online training programs. The provision of training services occurs on our online learning platform. These services are delivered to corporate and individual clients across all training brands.*

### **Workforce Labour Services**

*Site deliver the sourcing, training and deployment of skilled labour on to projects throughout numerous countries. Site has expanded this capability to include the provision of labour hire services and expat workforce management.*
