

QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDING 30 SEPTEMBER 2022

HIGHLIGHTS

- Horse Rocks Lithium Project tenure E15/1770 granted.
- Geochemical sampling completed at Horse Rocks, to test for near surface lithium anomalism (completed post the end of the September quarter).
- **Field mapping confirms historically mapped pegmatites.**
- Drill planning at Gabyon Gold Project continued to test a regional scale shear that transects the project area along a greenstone – granite contact.
- Non-renounceable option entitlement issue completed during the quarter raising \$191,960.

HORSE ROCKS LITHIUM PROJECT

Located 23km south of Coolgardie in Western Australia's Eastern Goldfields, the Horse Rocks Lithium (Li) Project comprises a 23.8km² exploration licence, 8km west of Mineral Resources' (ASX: MIN) Mt Marion Lithium Mine, with the same source granite and 'Mt Marion-Style' Li potential.

During the quarter, exploration licence E15/1770 was granted by DMIRS. A comprehensive surface geochemical sampling program covering the entire tenure was completed in October 2022. This program is the first exploration for lithium within the project area and the multi-element analysis will aid with drill targeting. Analytical results are expected in November 2022.

Field mapping has confirmed the historically mapped pegmatites, with further pegmatites identified within the greenstone units.
