## CALESI NICKEL PROSPECT DRILLING TO COMMENCE

- Drill rig has mobilised to the Calesi nickel prospect, approximately 5km south-west of Kulin in the wheatbelt of WA
- Calesi Prospect defined by late time EM anomaly established by regional EM airborne survey and close spaced heli-borne EM
- Sultan to drill an initial 2 RC holes to test the anomaly, funded by Rio Tinto Exploration pursuant to its farm-in to the project

---

Sultan Resources Ltd (ASX:SLZ, **Sultan** or **Company**) is pleased to advise that drilling will commence today at the Calesi magmatic nickel prospect near Kulin, WA, with Hagstrom Drilling on site with a Reverse Circulation (RC) drill rig (refer picture below).

Drilling activities are expected to take approximately 5 days. Both holes will be cased for Downhole Electromagnetic (DHEM) surveys.

#### **Competent Persons Statement**

The information in this ASX Announcement that relates to Exploration Results is based on information reviewed and compiled by Mr Craig Hall, a Competent Person who is a Member of the Australian Institute of Geoscientists (#1748), and a full-time employee of Sultan Resources. Mr Hall has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Hall consents to the inclusion in this Announcement of the matters based on his information in the form and context in which it appears. The Competent Person is not aware of any new information or data that materially affects the information contained in the above sources or the data contained in this announcement.

#### **Disclaimer**

In relying on the above mentioned ASX announcement and pursuant to ASX Listing Rule 5.23.2, the Company confirms that it is not aware of any new information or data that materially affects the information included in the abovementioned announcement.

#### **About Sultan Resources**

Sultan Resources is an Australian exploration company with a portfolio of quality assets in emerging discovery terranes. Sultan’s tenement portfolio includes recently acquired lithium-prospective claims in NW Ontario in Canada; a tenement package in the southern terrane region of the Yilgarn Craton in the eastern wheatbelt of Western Australia with priority nickel-cobalt and gold targets, where Rio Tinto Exploration have recently formalised a farm-in JV on a central tenement; and tenements located in the highly prospective east Lachlan Fold Belt of Central NSW considered prospective for copper and gold. Sultan’s board and management is committed to the responsible discovery of metals via modern exploration techniques, and to add value to these projects for the benefit of the company and its shareholders.
