

Lepidico

Developing to the (L-)Max

On 28 May, Lepidico (LPD) announced the results of its Association of the Advancement of Cost Engineering (AACE) class three (definitive) feasibility study (DFS) on its integrated Karibib mining/chemical plant project to produce 4,900tpa of battery grade lithium hydroxide (monohydrate) plus high value, Group 1 metal by-products over 14 years. At a lithium hydroxide price of US\$13,669/t (cf US\$10,350–11,200/t currently), the DFS calculated a project NPV8 of US\$221m, or A\$340m (A\$0.066/share) and an IRR of 31% after initial capex of US\$139m (including a 13.6% contingency). C1 cash costs were estimated to a $\pm15\%$ level of accuracy at US\$1,656/t lithium carbonate equivalent (LCE) and allin sustaining costs at US\$3,221/t LCE – putting it near the bottom of the known LiOH cost curve. A comprehensive review of the DFS is now planned, which will be reported on in due course.

Year end	Total revenues (A\$m)	PBT (A\$m)	Cash from operations (A\$m)	Net cash/(debt)* (A\$m)	Capex (A\$m)
6/18	0.2	(7.2)	(3.0)	4.9	(3.1)
6/19	0.0	(5.1)	(3.5)	10.4	(6.3)
6/20e	0.0	(8.4)	(15.1)	56.5	(7.4)
6/21e	0.0	(3.0)	(2.7)	(66.1)	(119.9)

Note: PBT is normalised, excluding amortisation of acquired intangibles and exceptional items. *Includes Desert Lion Energy convertible.

Immediate 2.5x upside

The DFS's calculated NPV $_8$ of 6.6c/share may be directly compared to the non-diluting price of future equity funding calculated in our last report (Valuation update pending feasibility study, 6 April 2020) of 9.99c/share, albeit our estimate was based on estimated numbers for a project that had been materially re-scoped (eg the acquisition of Desert Lion Energy in July 2019 and the integration of Karibib into Lepidico's L-Max project development plans). Nevertheless, in our report, Gold stars and black holes, published in January 2019, we calculated a mean EV for companies with projects at the bankable feasibility study/DFS stage of development of 30.9% of project NPV (ranging up to 133.5%). This alone would imply a valuation for Lepidico of 2.0c/share (ranging up to 8.8c/share) plus cash (we estimate A\$4.9m, or 0.09c/share as at end-May) of LPD's current share price of 0.8c/share.

Valuation: longer-term 5.6x upside

The Karibib project is already fully permitted under a granted mining licence and its development has been materially de-risked by Lepidico's earlier running of a pilot plant campaign to test L-Max and LOH-Max in continuous production. Within this context, LPD is currently investigating funding and offtake options for its project prior to making a final investment decision in May 2021. Based on the advice of specialist debt advisors, it is aiming for a debt:equity ratio in the range 60–70:40–30. Assuming 40% equity funding would require the company to raise c A\$86m, which could be achieved by issuing 4,277m shares at 2.0c/share, such that the resulting company valuation of A\$426m (A\$86m plus A\$340m NPV₈ project valuation) would equate to 4.5c per (fully diluted) share (or 5.2c if equity is raised as 2.9cps as previously). Note that this valuation does not attribute any value to Lepidico from a Phase 2 Plant or any other development options (such as gold).

Business description

Via its Karibib project in Namibia and unique IP, Lepidico is a vertically integrated lithium development business that has produced both lithium carbonate and lithium hydroxide from non-traditional hard rock lithium-bearing minerals using its registered L-Max[®] and LOH-Max[™] processes.

Next events

Final investment decision	May 2021
Karibib construction start	September 2021
Chemical plant construction start	December 2021
Chemical plant construction completion	December 2022
