

For Immediate Release

Lancaster General Health Selects Oneview's Interactive Patient Care System

March 20, 2017: Oneview Healthcare PLC ("Oneview") (ASX:ONE) the Australian-listed Irish healthcare company, today announced that Lancaster General Health (LG Health), a 663-licensed bed, not-for-profit health system, and member of the University of Pennsylvania Health System (Penn Medicine), will deploy its market-leading interactive patient care system at Lancaster General Hospital (LGH) in Lancaster, PA, to enhance the patient experience.

"Enhancing our patients' experience starts by effectively educating them while in our care and ultimately inspiring them to become more engaged in their health," said Jan Bergen, President & CEO of LG Health. "As we continue investing in our services, we look forward to working with Oneview to help us deliver a more consistent and positive patient experience across our health system."

Oneview's interactive patient care solution seamlessly integrates a hospital's IT systems onto one high-performance technology platform. It combines clinical data from EMR vendors such as Epic, Cerner and Meditech, with data from systems providing nurse call, alert management, building management, real-time location services and more to enable hospitals to improve patient engagement, clinical workflows and communication.

The Oneview platform provides point-of-care access to those IT systems through a variety of end-user devices, including bedside terminal, TV, tablet and smart phone. Thus, non-clinical patient requests (i.e. reporting a spill, requesting a drink, etc.) are no longer routed to nursing, but instead to the right department, at the right time. Not only does this relieve call button fatigue, but more importantly, it improves patient satisfaction as requests can be handled in a more efficient manner.

"Innovative healthcare leaders like LG Health select Oneview for its inherent ability to improve the patient experience," said Mark McCloskey, Founder of Oneview. "They recognize that while the platform serves as a concierge to their patients, enhancing their stay with a sense of luxury, care and exemplary customer service, it also leads to long-term benefits including better clinical outcomes and higher patient satisfaction rates. We are excited to add LG Health to the growing Oneview family."

About Oneview Healthcare

When it comes to the healthcare experience, Oneview Healthcare is helping industry leaders worldwide see a better way. Oneview's interactive patient care platform enables hospitals and healthcare facilities to embrace the growing demand for consumer-centric care, while also empowering clinicians to focus on what they do best – improving the lives of those they care for. In addition to providing benefits to patients, their families and staff, Oneview is proving that you can improve the patient experience and reduce costs at the same time. With Oneview, hospitals are achieving quantifiable, cost-saving improvements across their organizations including improved HCAHPS ratings and reduced re-admissions. Established in 2007, Oneview has offices in the U.S., Ireland, Australia and Asia.
