

ASX ANNOUNCEMENT

15 May 2017

Marmota to issue \$220,000 EDI Credit to Shareholders

Marmota Limited (ASX: MEU) ("Marmota")

Key Points

- Marmota to issue \$220,000 EDI credits to shareholders
- Eligible shareholders will be able to use EDI Credits for their 2016/17 tax year.

Background

On 13 May 2014, the Federal Government announced the introduction of the *Exploration Development Incentive* ("EDI") scheme. The EDI scheme allows small mineral exploration companies without taxable income to provide exploration credits, paid as a refundable tax offset, to their Australian resident shareholders for greenfields mineral exploration.

Marmota To Issue \$220,000 EDI Credits To Our Shareholders

Marmota has elected to participate again in the EDI scheme, now for Marmota's 2015/16 tax year, and to pass on the benefits of this scheme to our shareholders. Marmota will therefore issue EDI credits for Marmota's 2015/16 expenditure to eligible shareholders.

Australian resident shareholders that are issued with an exploration credit will be entitled to a refundable tax offset or additional franking credits. The exploration company's carry forward losses are reduced proportionately to reflect the amount of exploration credits created.

Record Date and Mailing of EDI credits

The *record date* for the determination of EDI Credits will be announced shortly.

Applicable EDI Credits will be issued to shareholders based on their holding on the record date.

More Detail

More information about the EDI Credits can be found on the ATO website at:

About Marmota Limited

Marmota Limited (ASX: MEU) is a South Australian mining exploration company, focused on gold, copper and uranium. Gold exploration is centered on the Company's dominant tenement holding in the highly prospective and significantly underexplored Gawler Craton, near the Challenger gold mine, in the Woomera Prohibited Defence Area. The Company's cornerstone copper project is based at the Melton project on the Yorke Peninsula. The Company's largest uranium project is at Junction Dam adjacent to the Honeymoon mine.
