MERIDIAN'S NEW ZEALAND GENERATION

Source: Meridian

MERIDIAN'S AVERAGE GENERATION PRICE*

*price received for Meridian's physical generation
14 September 2017

Source: Meridian

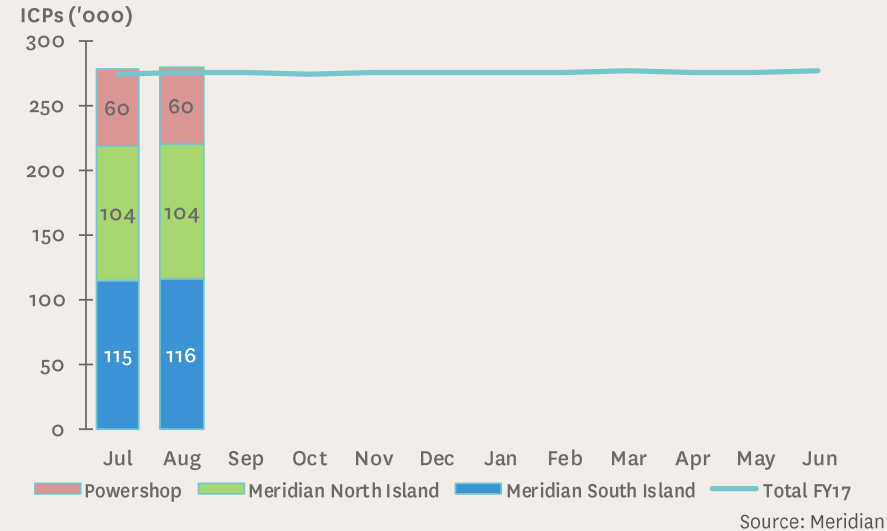

- Meridian's New Zealand generation in August 2017 was 24.5% lower than the same month last year, reflecting lower hydro generation and higher wind generation
- To date this financial year, Meridian's New Zealand generation is 28.7% lower than the same month last year, reflecting lower hydro generation and lower wind generation
- The average price Meridian received for its generation in August 2017 was 71.9% higher than the same month last year
- The average price Meridian paid to supply contracted sales in August 2017 was 67.6% higher than the same month last year
- To date this financial year, the average price Meridian received for its generation is 143.9% higher than the same period last year

Operating information.

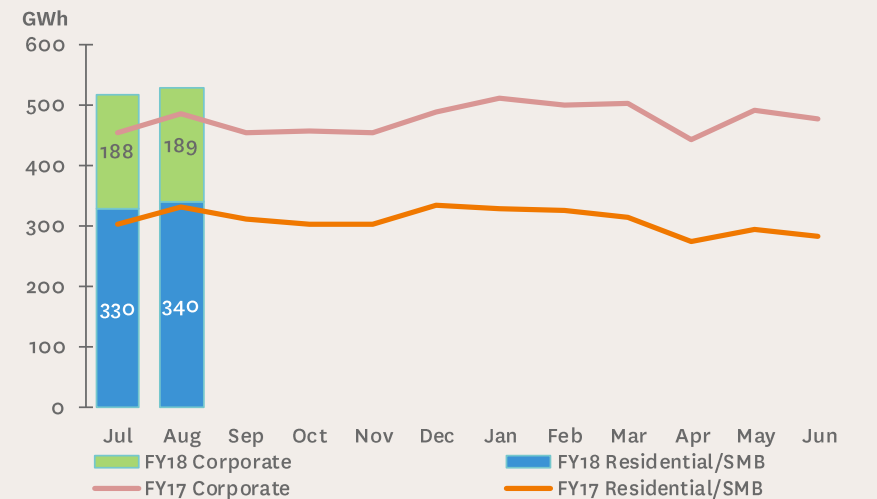

- Meridian's New Zealand customer connection numbers rose 1.5% during August 2017
- Retail sales volumes in August 2017 increased by 8.6% compared to August 2016
- Compared to August 2016, residential/SMB sales volumes increased by 2.5% (higher business and agri volumes) and corporate sales volumes increased by 21.7%
- To date this financial year, retail sales volumes are 11.4% higher than the same period last year
- This reflects a 5.4% increase in residential/SMB sales volumes and a 23.7% increase in corporate sales volumes

*excludes volumes sold to New Zealand aluminium Smelters and CFDs

• Glossary •

Acquired generation volumes	buy-side electricity derivatives excluding the buy-side of virtual asset swaps
Average generation price	the volume weighted average price received for Meridian's physical generation
Average retail contracted sales price	volume weighted average electricity price received from retail customers, less distribution costs
Average wholesale contracted sales price	volume weighted average electricity price received from wholesale customers, including NZAS
Combined catchment inflows	combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes
Cost of acquired generation	volume weighted average price Meridian pays for derivatives acquired to supplement generation
Cost to supply contracted sales	volume weighted average price Meridian pays to supply contracted customer sales
Contracts for Difference (CFDs)	an agreement between parties to pay the difference between the wholesale electricity price and an agreed fixed price for a specified volume of electricity. CFDs do not result in the physical supply of electricity
Customer connections (NZ)	number of installation control points, excluding vacants
FRMP	financially responsible market participant
GWh	gigawatt hour. Enough electricity for 125 average New Zealand households for one year
Historic average inflows	the historic average combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes over the last 83 years
Historic average storage	the historic average level of storage in Meridian's Waitaki catchment since 1979
HVDC	high voltage direct current link between the North and South Islands of New Zealand
ICP	New Zealand installation control points, excluding vacants
ICP switching	the number of installation control points changing retailer supplier in New Zealand, recorded in the month the switch was initiated
MWh	megawatt hour. Enough electricity for one average New Zealand household for 46 days
National demand	Electricity Authority's reconciled grid demand www.emi.ea.govt.nz
NZAS	New Zealand Aluminium Smelters Limited
Retail sales volumes	contract sales volumes to retail customers, including both non half hourly and half hourly metered customers
Sell side derivatives	sell-side electricity derivatives excluding the sell-side of virtual asset swaps
Virtual Asset Swaps (VAS)	CFDs Meridian has with Genesis Energy and Mercury. They do not result in the physical supply of electricity

Thank you.
