ASX RELEASE

DroneGun to Be Evaluated by Spanish Agencies in October

- Several departments within the Spanish military and law enforcement evaluating DroneGun MKII (second generation) in October.
- Procurement processes continue with other militaries and law enforcement agencies, including France and the UK.

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") today announced that several Spanish military and law enforcement departments, including Guardia Civil and Policia National have scheduled an evaluation of DroneGun MKII for October.

These evaluations are understood to be part of the Spanish governmental procurement process.

DroneGun MKII was released earlier this month and displayed at the recent Defence and Security Equipment International Conference military tradeshow in London as part of Team Defence Australia's delegation, a joint effort with the Australian Department of Defence, and Austrade, and attracted substantial distributor and military end customer interest.

French and UK militaries and law enforcement agencies in particular are currently trialing the product.
