Market overview

The Century Australia investment portfolio increased 0.4% in September, while the S&P/ASX 300 Accumulation Index closed flat. The best performing sectors during the month included healthcare (+2.3%), energy (+1.1%) and financials (+1.1%), while telecommunications (-4.5%) and utilities (-3.6%) weighed heavily on the Index.

Minutes from the Reserve Bank of Australia (RBA) indicated reduced demand for steel production in China would weigh on the iron ore price. Evidence of this was a fall of almost 20% in the iron ore price in September. During the month, the RBA Assistant Governor (Financial System) Michele Bullock said the central bank would continue to consider the heightened level of household debt in monetary policy decision-making, reaffirming our view that interest rates will remain on hold in the short term.

Globally, the US Federal Reserve announced it would start to unwind its balance sheet and indicated another rate increase before the end of the year was possible. US President Trump announced a simplified plan to cut corporate taxes that would reduce the corporate tax rate from 35% to 20% and eliminate tax on foreign profits.

Net Tangible Assets (NTA) figures

NTA before tax	94.5c
Deferred tax asset on carry forward realised losses	6.5c
Deferred tax liability on unrealised income and gains	(0.2)c
NTA after tax	100.8c

In addition to the deferred tax assets of 6.5 cents per share recorded in the accounts there is a further \$1.9 million or 2.1 cents per share of tax benefit on realised losses that is not carried on the company's balance sheet and is available to be offset against future taxation liabilities.

The fact that Century Australia is currently not liable to pay tax means that the level of franked dividends paid is reliant on the level of franking credits received by way of fully franked dividend income. Once the total carry forward losses are utilised, Century Australia will return to paying tax on any realised gains. Tax payments will generate additional franking credits from which franked dividends can be paid.

Portfolio update

The investment portfolio's outperformance during the month was driven by solid performance from mining and metals company South32 (ASX: S32), industrial chemical, fertilizer and explosive producer and distributor Incitec Pivot (ASX: IPL), oil and gas company Santos (ASX: STO) and plumbing manufacturer Reliance Worldwide Corporate (ASX: RWC). Another driver of performance was the tactical position we secured and continue to hold in the major banks, as well as Macquarie Bank (ASX: MQG) and Bank of Queensland (ASX: BOQ) in the lead up to their earnings results in October and November. Our holdings in Sims Metal Management (ASX: SGM) and BHP Billiton Limited (ASX: BHP) were the largest detractors for the month.

During the month Senior Equity Analyst John Ayoub visited a number of companies in the United States. We remain confident in our outlook for the US economy and expect interest rate increases to continue. The portfolio is positioned to benefit from this theme through our holdings in Boral (ASX: BLD) and Computershare (ASX: CPU).
