

InPayTech (ASX: IP1) announces PayVu product enhancements

Sydney, October 26, 2017

Integrated Payment Technologies Limited (InPayTech) announces details of a major product upgrade to PayVu, its unique software overlay system, ahead of its official release on 6 November 2017.

PayVu 1.5 is designed to provide a seamless payments process, bridging the gap between internet banking, and accounting and payroll systems such as Xero, Quickbooks and MYOB. PayVu's technology dramatically reduces to minutes the hours currently spent making business payments by Australian small businesses and their service providers.

PayVu 1.5 introduces a range of smart product enhancements:

- the introduction of BPAY payments, allowing customers to meet all of their bill requirements under the single PayVu platform;
- a fully automated login process to allow for quick payments;
- an industry leading multi-factor authentication process.

"These updates are the result of many months working with accountants and bookkeepers, determining how we could best improve and streamline their clients' core payments (and data capture) processes," said InPayTech chief executive Robin Beauchamp.

"PayVu 1.5 will deliver immediate ease and efficiency to direct payments made by employers, their accountants and bookkeepers, and all with the heightened security of multi-factor authentication" he said.
