

November 2017

Monthly Drilling Report

Release Date: 6 December 2017

Senex has now completed the drilling associated with its Western Surat Gas Project Phase 2 appraisal program, and will provide a further update on its progress in the Surat Basin in a separate announcement to be released before the end of the calendar year 2017.

Western Surat Gas Project, Surat Basin, Queensland

Phase 2 appraisal program (ATP 889 and ATP 795: Senex 100% and operator)

The final three appraisal wells of a 30-well drilling campaign were drilled and completed during November. Two pods are now online with the final pod to be brought online in December.

Mimas-2 core well (ATP 795: Senex 100% and operator)

Mimas-2 was spudded on 28 November and reached total depth of 533 metres in early December. This well is located approximately 5 kilometres south east of the existing Mimas-1 gas well, adjacent to and west of the Glenora and Eos areas.

Refer to the map in Figure 1 for drilling activity.

ABOUT SENEX

Senex is an ASX listed oil and gas exploration and production company focused on generating shareholder value by growing reserves and production. It holds extensive onshore oil and gas acreage in the Cooper and Surat Basins, two of Australia's most prolific onshore energy regions. Senex is well capitalised and has built strong operating credentials over its 30 year history. Senex operates low cost oil producing assets in the Cooper Basin and is progressing a portfolio of gas projects including the Western Surat Gas Project and Project Atlas in Queensland.
