

## UCSF BENIOFF CHILDREN'S HOSPITAL OAKLAND SELECTS ONEVIEW HEALTHCARE'S PATIENT EXPERIENCE PLATFORM

Chicago, IL, January 17, 2018– UCSF Benioff Children's Hospital Oakland has entered into a five-year contract with Oneview Healthcare, PLC ("Oneview") (ASX:ONE) to deploy Oneview's market-leading patient experience and clinical workflow solution.

The agreement follows the deployment of Oneview's solution at UCSF Health's Mission Bay campus, which went live in February 2015 in both the pediatric and adult hospitals. For UCSF Benioff Oakland, Oneview will deploy over 300 interactive bedside touchscreen devices and interactive patient television locations for patients and their families across the hospital's existing outpatient center, a new outpatient building currently under construction, the UCSF Benioff Oakland hospital and UCSF Benioff Oakland's inpatient unit at Summit Medical Center. The Oneview solution will provide an immersive experience for patients and their families, including a digital whiteboard, education assignment with automatic EHR writeback, digital meal ordering, interactive television, movies on demand, streaming services and games.

*"We're delighted to expand our solution across more facilities at UCSF," said Mark McCloskey, President and Founder of Oneview Healthcare. "We're excited to continue the work we started at Mission Bay and expand our solution to the young patients and their families at UCSF Benioff Children's Hospital Oakland, and we look forward to improving outcomes with UCSF in the coming years."*

*"This project will help us expand the communication and entertainment offerings for our Oakland locations, and standardize across UCSF Health. We are very excited to continue the relationship with Oneview Healthcare" said Cathy Weber, UCSF Medical Center Clinical Applications Project Manager.*

### **About Oneview**

Oneview provides interactive healthcare technologies for patients, families and caregivers. Weaving a facility's existing disparate systems (ADT, EMR, PAS, dietary, alert management and more) into a single seamless platform, the solution enables healthcare facilities to engage patients in meaningful ways, improve communication, and streamline clinical workflows. Patients enjoy the comfort and convenience of information, education, entertainment and environmental controls at the bedside, while facilities enjoy better health outcomes and staff satisfaction.

### **About UCSF Health**

UCSF Health includes UCSF Medical Center, which is ranked among the top five hospitals nationwide, as well as UCSF Benioff Children's Hospitals (in San Francisco and Oakland) and additional affiliates throughout the Bay Area. Recognized for innovative treatments, advanced technology, collaboration among health care professionals and scientists, and a highly compassionate patient care team, these hospitals serve as the academic medical center of the University of California, San Francisco, which is world-renowned for its biomedical research and graduate-level education. UCSF Health's nationally preeminent programs include cancer, children's health, the brain and nervous system, organ transplantation, and women's health.
