(i) Fair value in an inactive or unquoted market (level 2 and 3)

The fair value of financial assets that are not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

The following table presents the Company's financial assets measured and recognised at fair value at 31 December 2017 and 30 June 2017 on a recurring basis.
