### **Retirement of Director – Mr Greg Cornelsen**

BluGlass Limited wishes to announce that non-executive director; Mr Greg Cornelsen has resigned his position as a director of the Company. Greg has been a director of the Company since its Initial Public Offering (IPO) and has also served as the chairman of its Audit and Risk Committee.

BluGlass Chairman Dr William Johnson said “On behalf of the Board of Directors, I would like to thank Greg for his valuable contributions throughout his tenure as a director of the Company. Greg always provided a positive shareholder focus to the business and we all wish him well in his future endeavors.”

#### **About BluGlass:**

BluGlass Limited (ASX:BLG) is an Australian technology company formed to commercialise a breakthrough in the Semiconductor Industry.

BluGlass has invented a new process using Remote Plasma Chemical Vapour Deposition (RPCVD) to grow semiconductor materials such as gallium nitride (GaN) and indium gallium nitride (InGaN), crucial to the production of high efficiency devices such as next generation lighting technology Light Emitting Diodes (LEDs) with advanced performance and low-cost potential. The RPCVD technology, because of its low temperature and highly flexible nature, offers many potential benefits over existing technologies including higher efficiency, lower cost, substrate flexibility including GaN on silicon and greater scalability.
