Meridian Energy monthly operating report for February 2018

13 March 2018

Attached is Meridian Energy Limited's monthly operating report for the month of February 2018.

Highlights this month include:

- In the month to 11 March 2018, national hydro storage increased from 92% to 107% of historical average
- South Island storage sat at 100% of average and North Island storage at 158% of average on 11 March 2018
- Meridian's February 2018 monthly total inflows were 148% of historical average
- Meridian's Waitaki catchment storage at the end of February 2018 was 96% of historical average
- Storage in Meridian's Waiau catchment was above average at the end of February 2018
- Meridian made calls on load under the Genesis Swaption during early February 2018
- National electricity demand in February 2018 was 2.4% lower than the same month last year, with all the reduction being seen in the South Island
- February 2018 saw the influence of two ex-tropical cyclones, with South Island rainfall totals as high as 300%-400% of average in places and notably lower irrigation usage
- Meridian's retail sales volumes in February 2018 decreased by 12.7% compared to February 2017

MERIDIAN'S AVERAGE GENERATION PRICE*

*price received for Meridian's physical generation
13 March 2018

Source: Meridian

- Meridian's New Zealand generation in February 2018 was 16.0% lower than the same month last year, reflecting lower hydro generation and higher wind generation
- To date this financial year, Meridian's New Zealand generation is 15.4% lower than the same period last year, reflecting lower hydro generation and lower wind generation
- The average price Meridian received for its generation in February 2018 was 53.2% higher than the same month last year
- The average price Meridian paid to supply contracted sales in February 2018 was 51.0% higher than the same month last year
- To date this financial year, the average price Meridian received for its generation is 114.4% higher than the same period last year

Operating information.

MERIDIAN'S AUSTRALIAN GENERATION

Source: Meridian

AUSTRALIAN RETAIL SALES VOLUMES

Source: Meridian

- Meridian's Australian generation in February 2018 was 0.8% higher than the same month last year
- To date this financial year, Australian generation is 0.4% lower than the same period last year
- Australian retail sales volumes in February 2018 increased by 17.1% compared to February 2017
- To date this financial year, Australian retail sales volumes are 18.9% higher than the same period last year

Glossary

Acquired generation volumes	buy-side electricity derivatives excluding the buy-side of virtual asset swaps
Average generation price	the volume weighted average price received for Meridian's physical generation
Average retail contracted sales price	volume weighted average electricity price received from retail customers, less distribution costs
Average wholesale contracted sales price	volume weighted average electricity price received from wholesale customers, including NZAS
Combined catchment inflows	combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes
Cost of acquired generation	volume weighted average price Meridian pays for derivatives acquired to supplement generation
Cost to supply contracted sales	volume weighted average price Meridian pays to supply contracted customer sales
Contracts for Difference (CFDs)	an agreement between parties to pay the difference between the wholesale electricity price and an agreed fixed price for a specified volume of electricity. CFDs do not result in the physical supply of electricity
Customer connections (NZ)	number of installation control points, excluding vacants
FRMP	financially responsible market participant
GWh	gigawatt hour. Enough electricity for 125 average New Zealand households for one year
Historic average inflows	the historic average combined water inflows into Meridian's Waitaki and Waiau hydro storage lakes over the last 83 years
Historic average storage	the historic average level of storage in Meridian's Waitaki catchment since 1979
HVDC	high voltage direct current link between the North and South Islands of New Zealand
ICP	New Zealand installation control points, excluding vacants
ICP switching	the number of installation control points changing retailer supplier in New Zealand, recorded in the month the switch was initiated
MWh	megawatt hour. Enough electricity for one average New Zealand household for 46 days
National demand	Electricity Authority's reconciled grid demand www.emi.ea.govt.nz
NZAS	New Zealand Aluminium Smelters Limited
Retail sales volumes	contract sales volumes to retail customers, including both non half hourly and half hourly metered customers
Sell side derivatives	sell-side electricity derivatives excluding the sell-side of virtual asset swaps
Virtual Asset Swaps (VAS)	CFDs Meridian has with Genesis Energy and Mercury. They do not result in the physical supply of electricity

Thank you.
