POWER UPGRADE TO MILL AND PROCESSING PLANT COMPLETED

Installation of the 440kVA Cummins generator and associated power distribution line has been completed at the company's Edie Creek mine, with successful "wet" and "dry" test running of the ball-mill.

Mining and screening of feed material is now underway with a stockpile being readied for milling and processing (in increasing volumes) in coming days.

Niuminco Managing Director, Tracey Lake said "With the power and electrical infrastructure upgrade to the mill and processing plant completed, we look forward to increased and reliable processing capacity."
