## PAK Sells South Hazell exploration property for C\$1 million

### Summary

Pacific American Coal Limited (**ASX: PAK**) is pleased to make the following announcement:

- **PAK has agreed to sell its South Hazell Exploration Project after receiving an unsolicited offer to buy the licences:**
  - **PAK and North Coal have signed a binding Purchase Agreement for the C\$ 1 million cash sale of the South Hazell Coal Licences;**
- **The sale of the South Hazell Coal Licences increases PAK's cash, with the Company's focus firmly on the development of the 257MT resources flagship Elko Coking Coal project.**

## **South Hazell Sale**

The board of Pacific American Coal Limited (ASX: PAK) is pleased to announce that, after receiving an unsolicited offer from North Coal Limited (North Coal), the Company's wholly owned subsidiary Texas and Oklahoma Coal Company (Canada) Limited (TOCC) has signed a binding Purchase Agreement to sell its South Hazell exploration project in British Columbia, Canada to North Coal.

The South Hazell property is located next to Teck Resources' Coal Mountain Mine, directly adjacent to tenements owned by North Coal who are looking to develop the Michel Coal Project.

PAK's board regards the South Hazell Project as being highly prospective. However, given the Company's limited expenditure spent to date on the Project, acceptance of North Coal's offer is considered the best way for PAK to realise value from South Hazell.

The sale further demonstrates the PAK Board and Management's ability to identify and deliver opportunities that realise value for shareholders.

## **Focus on Elko Coking Coal project**

The sale of the South Hazell Project enables PAK to dedicate resources to the further development of the Elko Coking Coal Project.

Elko is a highly attractive project, with 257Mt of JORC 2012 Resource already identified. PAK has an exploration program scheduled for the 2018 northern summer window. Pre-drilling environmental studies have been successfully completed and the majority of approvals required to commence the planned exploration program have been received. The Company continues to work closely with the Ministry of Energy, Mines and Petroleum Resources (MEM) towards receiving final approval for its Notice of Works.

In May 2017 Palaris Australia Pty Ltd delivered a favourable Elko Project Study Report which highlighted why Elko is such a highly attractive opportunity for PAK including:

- Projected Low Capital Entry
- Competitive Infrastructure Advantage
- Coking coal quality comparable to Canadian peers

Commenting on the sale of the South Hazell Project, PAK's Chairman Geoff Hill said:

"While the PAK board identifies value in the South Hazell Project, the current offer for the property is an ideal opportunity for PAK to realise this value without additional expenditure. The sale enables PAK to focus our attention on the exceptional Elko Project which provides significant leverage to PAK shareholders in the prolific East Kootenay Coal Basin."

## **About North Coal**

North Coal is a privately held coal development company focused on advancing the Michel Coal project in the Elk Valley, British Colombia.
