Overview and Investment Philosophy

VG1, the Company, provides investors with access to a concentrated portfolio, predominately comprised of Long and Short Positions in global listed securities; and the investment expertise of VGI Partners, the Manager.

The Manager's risk-adjusted return philosophy is implemented through three key tenets:

1. Capital preservation - The Manager believes that risk comes from not properly understanding your investments and places a great deal of importance on assessing downside risk.

2. Superior long-term compound growth - The Manager believes that great businesses purchased with a 'margin of safety' held for the long term are best placed to provide superior compound returns.

3. Concentration - The Manager aims to be concentrated enough in its best ideas so as not to dilute overall returns but hold enough Long positions in order to provide an appropriate level of diversification. The Top 5 Long positions typically represent 40-50% of the portfolio NAV.

Commentary

The portfolio's Long positions added +**2.1%** to performance for the month of May 2018 and the Short portfolio, consisting of single stock Short positions, was flat for the month. The Australian Dollar appreciated against the US Dollar during May which detracted **-0.8%** from the return. The Manager has been patiently and steadily deploying the portfolio such that as at 31 May 2018 the portfolio was approximately 80% of targeted individual stock weightings. Given the Manager's focus on preservation of investors' capital, the Manager may take several more months to fully deploy the portfolio, depending on market conditions.
