

ASX: MCA

Quarterly Activities Report

30 July 2018

Murray Cod Australia Limited (ASX:MCA) (the “Company”) is pleased to provide its quarterly activities report for the three months ended 30 June 2018, to be read in conjunction with the Appendix 4C.

Sales Report

During the March quarter revenue increased by 67% over the same period last year with pricing achieved at similar levels to the prior year despite the increased supply. New domestic and international sales enquiries continue to be received each week. Supply to these markets is impacted by availability of suitably sized fish. This strong product demand is extremely encouraging and unpins the Company’s aggressive production expansion plans and its strategy to diversify its product offering from whole fish to a range of processed products, with further details following.

Production and processing facility

MCA has been pleased with results of operations over the last quarter with livestock growth, staff recruitment, training and development activity building strong foundations for the planned future expansion of the Company.

The Company plans to commission its first processing facility over the coming twelve months. This facility will enable the company to engage in value adding activities such as filleting, smoking, skinning and various other processing activities with the aim to target additional product markets [both domestically and internationally] and to increase the sales margin for its Murray cod product. Further, through this processing facility the Company will maintain quality control of its product to ensure that customers’ expectations of a high-quality luxury food product are met or exceeded.

Insurance Update

We refer to prior announcement regarding this issue. After receiving legal advice the Board has resolved to refer this matter to the Insurance Ombudsman.

Westpac Funding

The Company has accepted the funding offer of \$5 million from Westpac as foreshadowed in the January 2018 Activities Report. To date none of the facility has been drawn down and The Company remains with credit funds in the bank as disclosed in the attached Quarterly Cash flow report

Export Markets

MCA continues to pursue high-margin export market opportunities. The Company has been invited to the Tokyo Seafood show in August to display its produce. Meetings in London are scheduled for early August with European distributors.

Aquna Brand

The Aquna brand has been tested on the public with encouraging feedback. It will be the key brand for the Company to use in maintaining its position as a high-quality, luxury food product. Aquna (pronounced A~KUNA) is derived from the aboriginal word meaning “flowing waters”. The four pillars of the brand are shown below.

.....
WHAT WE STAND FOR
.....
LIFE TASTES BETTER OUR WAY.
.....
We believe the best product comes from the best approach.
We want to make an impact on peoples plates and their wider lives by
inspiring a better way to deliver the future of food production.
.....

- Our premium taste credentials are built on real substance.
- Innovation at our core 'find a better way'.
- People will value a product with integrity.
- Our story is built around our impact on planet earth.

Smoked Product

The Company has undertaken extensive work in developing smoked Aquna Cod over the last quarter. The smoked product was tested at both the Sydney and Melbourne Good Food and Wine Shows where over 17,000 pieces of fish were sampled by the public. The packaging and market release details for the smoked product are being developed with an expected soft- launch focused initially on the eastern states of Australia in late 2018/early 2019.

Further Development.

The Company is in negotiations with two growers around potential lease sites. Soil tests power availability surveys and site inspections have been concluded and were all positive. We are awaiting Site design and planning approvals before the execution of lease agreements on these properties. One of these sites has the potential to be the same size as the Foleys corner site already developed and the other is a proposed super site that will have the capacity of 30-40 dams subject to approvals. Development is proposed to start on one of these sites in late 2018 early 2019.

Non Executive Director Role

As a result of a recent strategic review of roles and responsibilities the Company has increased the level of involvement Mr Martin Priestley will play in the Company and in particular the development of company strategy. As a result of this the Company has agreed to issue (subject to shareholder approval at the next AGM) Mr Priestley with two million options over ordinary shares in the Company. These options will have a strike price of 12.5 cents each and will be exercisable within three years of the date of issue.

About the Company

Murray Cod Australia is a vertically integrated producer for the breeding, growing and supply of premium Murray Cod to domestic and export markets. Murray Cod Australia uses an innovative farming technique with market-leading bio-security techniques while being environmentally friendly and sustainable. The Company has developed a land-based aquaculture model, using dams and irrigation water, which allows it to control the breeding, feeding, water conditions and biological inputs throughout the entire lifecycle of the fish, providing confidence for customers in the quality and sustainability of the produce. The business is located in the Riverina region of NSW.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
