ENGAGEMENT OF FTI CONSULTING – STRATEGIC BUSINESS REVIEW

The Directors of Range International Limited (**Range**), have become aware of potential inconsistencies with production and operation processes and have engaged global advisory group FTI Consulting to assist in an investigation into these matters at Range's Pasuran factory.

FTI Consulting will look at all major areas of Range's business and manufacturing operations to ensure the company has a clear and profitable plan moving forward. In particular the review will identify any areas where any efficiencies, costs, controls and procedural improvements are required or may require further investigation including pricing reviews with external suppliers of raw materials.

FTI will provide Range with the findings of this investigation, and Range will report on any material findings as required or a Summary Report at the conclusion of the engagement.

Kim Bradley-Ware
Company Secretary

About Range International:

Range is a manufacturer of plastic pallets. Our ThermoFusion™ technology allows Range to make plastic pallets from 100% recycled plastic at a price that is competitive with wood pallets. Range currently has production lines operating in Indonesia and sells its pallets under the brand Re>Pal™.
