The Manager  
Companies Announcements Office  
Australian Securities Exchange

Dear Sir/Madam,

**Further results of certification audit**

Kangaroo Island Plantation Timbers (KPT) has previously announced that, following an audit and inspection, it had achieved accreditation by the Forestry Stewardship Council® (FSC®) for its plantation-grown timber products.

KPT is now pleased to announce that its timber plantations have also been accredited under the Australian Standard for sustainable forest management (AS 4708), which enables it to market its timber products under the PEFC® and Responsible Wood® brands, subject to appropriate logo licensing arrangements.

The Company again expresses its thanks to PF Olsen Australia<sup>1</sup> for overseeing the certification process and reaffirms its commitment to the environmentally-sustainable and socially-responsible production of plantation timber on Kangaroo Island.

Yours sincerely,

Ms Victoria Allinson  
Company Secretary
