About Vanguard

Since our establishment in 1975, Vanguard has strived to be the world's highest-value provider of investment products and services. We have an unwavering focus on our clients with a commitment to champion what's best for investors by offering outstanding service, while keeping costs low.

Over the years Vanguard has built a reputation as a global leader in client advocacy and earned the trust of millions of investors along the way. Our sole purpose has been to align our interest with those of our investors to ensure they have the best chance for investment success.

With more than AUD \$6.8 trillion in assets under management as of 30 June 2018, including more than AUD \$1.2 trillion in exchange traded funds, Vanguard is one of the world's largest global investment management companies.

In Australia, Vanguard has been helping investors meet their long-term financial goals with low-cost investment solutions for over 20 years.

Our unique structure - putting investors' interests first

What sets Vanguard apart – and lets Vanguard put investors first around the world – is the ownership structure of The Vanguard Group, Inc., in the United States.

Rather than being publicly traded or owned by a small group of individuals, The Vanguard Group is owned by Vanguard's US-domiciled funds and ETFs. Those funds, in turn, are owned by their investors.

This mutual structure aligns our interests with those of our investors and drives the culture, philosophy and policies throughout the Vanguard organisation worldwide. As a result, Australian investors benefit from Vanguard's stability and experience, low costs and client focus.

Our investment expertise

When you invest with Vanguard, you have more than 40 years of investing experience behind you. So no matter which investment products suit your needs, you can feel confident that Vanguard investments are built on a rigorous investment philosophy that stands the test of time.

Low-cost investing

We know we can't control the markets, but we can control the costs of investing. To that end, providing low-cost investments isn't a pricing strategy for us. It's how we do business.

We can keep costs low because of our unique ownership structure in the United States, which allows us to return profits to investors through lower costs.

Directors' report

The Responsible Entity of the Vanguard Multi-class Funds & Standalone ETFs (the "Funds") for the year ended 30 June 2018 was Vanguard Investments Australia Ltd (the "Responsible Entity").

The directors of Vanguard Investments Australia Ltd present their report together with the financial statements for the year ended 30 June 2018

Principal activities

The Funds invest in accordance with the investment policy of the Funds as set out in their respective Product Disclosure Statements (PDSs) and in accordance with the Funds' Constitution. The Funds seek to track the returns of the Funds' respective indices, before taking into account Fund fees and expenses.

The Vanguard Global Aggregate Bond Index (Hedged) Fund inception date was 12 April 2017 and commenced trading on 13 July 2017.

Vanguard Global Minimum Volatility Fund ETF Class units and Vanguard Global Value Equity Fund ETF Class units were listed and commenced trading on the ASX on 17 April 2018.

The ETF Class units of the Funds operate as Exchange Traded Funds (ETFs) listed on the Australian Securities Exchange.

The Funds did not have any employees during the year.

There were no significant changes in the nature of the activities of the Funds during the year.

Directors

The following persons held office as directors of the Responsible Entity during the year and up to the date of this report:

J M Norris

G W Reed (Resigned 31 July 2017)

C R Comegys (Resigned 31 August 2017)

C Kelton (Resigned 4 September 2018)

L Carr

C Lui (Appointed 31 August 2017)

J Platt (Appointed 31 October 2017)

F Kolimago (Appointed 4 September 2018)

Review and results of operations

The Funds invest in listed equity securities, listed unit trusts, listed property trusts, unlisted unit trusts, fixed interest securities, money market securities, derivatives and cash and cash equivalents. The investment policy of the Funds continue to be in accordance with the provisions of the Funds' Constitution.

Results

The results of the operations of the Funds were as follows:

Performance

The table below details the performance of the Funds as represented by the total return, net of fees, which is calculated as the aggregation of the percentage capital growth and percentage distribution of income. The total return is shown for the past five years to 30 June 2018 and assumes that all distributions were re-invested during that period. These are calculated in accordance with FSC Standard 6.0 Product Performance - calculation and presentation of returns. The directors assess the performance of the Funds by comparing each Fund's total return with the corresponding Index (the Benchmark) gross of fees.

Significant changes in state of affairs

The Vanguard Global Aggregate Bond Index Fund (Hedged) inception date was 12 April 2017. The Wholesale Class commenced trading on 13 July 2017 and the ETF Class was listed and commenced trading on the ASX on 10 October 2017.

Vanguard Global Minimum Volatility Fund ETF Class units and Vanguard Global Value Equity Fund ETF Class units were listed and commenced trading on the ASX on 17 April 2018.

Vanguard International Shares Select Exclusions Index Fund AUD Unhedged Class units commenced trading on 20 December 2017.

Glenn Reed resigned as a Director of Vanguard Investments Australia Ltd on 31 July 2017.

Rodney Comegys resigned as a Director of Vanguard Investments Australia Ltd on 31 August 2017.

Cynthia Lui was appointed as a Director of Vanguard Investments Australia Ltd on 31 August 2017.

Johanna Platt was appointed as a Director of Vanguard Investments Australia Ltd on 31 October 2017.

The Funds have amended their constitution to change the obligation to distribute trust income to unitholders effective 1 July 2017 as part of a process to become eligible to elect into the new AMIT tax regime.

In the opinion of the directors, there were no other significant changes in the state of affairs of the Funds that occurred during the financial year.

Matters subsequent to the end of the financial year

On 1 July 2018, Vanguard Global Value Equity Fund lost its AMIT status as it no longer meets the AMIT tax regime qualification.

Colin Kelton resigned as a Director of Vanguard Investments Australia Ltd on 4 September 2018.

Frank Kolimago was appointed as a Director of Vanguard Investments Australia Ltd on 4 September 2018.

No other matter or circumstance has arisen since 30 June 2018 that has significantly affected, or may significantly affect:

- (i) the operations of the Funds in future financial years; or
- (ii) the results of those operations in future financial years; or
- (iii) the state of affairs of the Funds in future financial years.

Likely developments and expected results of operations

The Funds will continue to be managed in accordance with the investment objectives and guidelines as set out in the governing documents of the Funds and in accordance with the provisions of the Funds' Constitution.

The results of the Funds' operations will be affected by a number of factors, including the performance of investment markets in which the Funds invest. Investment performance is not guaranteed and future returns may differ from past returns. As investment conditions change over time, past returns should not be used to predict future returns.

Indemnity and insurance of officers and auditors

No insurance premiums were paid for out of the assets of the Funds in regards to insurance cover provided to either the officers of Vanguard Investments Australia Ltd or the auditors of the Funds. So long as the officers of Vanguard Investments Australia Ltd act in accordance with the Funds' Constitution and the Law, the officers remain indemnified out of the assets of the Funds against losses incurred while acting on behalf of the Funds. The auditors of the Funds are in no way indemnified out of the assets of the Funds.

Fees paid to and interests held in the Funds by the Responsible Entity or its associates

Fees paid to the Responsible Entity and its associates out of the Funds' property during the year are disclosed in note 14 of the financial statements

No fees were paid out of the Funds' property to the directors of the Responsible Entity during the year.

The number of interests in the Funds held by the Responsible Entity or its associates as at the end of the financial year are disclosed in note 14 of the financial statements.

Interests in the Funds

The movement in units on issue in the Funds during the year is disclosed in note 9 of the financial statements.

The value of the Funds' assets and liabilities are disclosed on the balance sheet and derived using the basis set out in note 2 of the financial statements.

Environmental Regulation

The operations of the Funds are not subject to any particular or significant environmental regulations under either Commonwealth, State or Territory law.

Rounding of amounts to the nearest thousand dollars

Amounts in the directors' report have been rounded to the nearest thousand dollars in accordance with ASIC Corporations (Rounding in Financial/Directors' Report) Instrument 2016/191, unless otherwise indicated.

Auditor's independence declaration

A copy of the auditor's independence declaration as required under Section 307C of the Corporations Act 2001 is set out on page 14.

This report is made in accordance with a resolution of the directors.

Notes to the financial statements

For the year ended 30 June 2018

1 General information

These financial statements cover the Vanguard Multi-class Funds & Standalone ETFs (the "Funds") as registered managed investment schemes. The respective constitution dates are as follows:

- Vanguard FTSE Asia ex Japan Shares Index ETF 16 November 2015
- Vanguard Australian Corporate Fixed Interest Index Fund 17 May 2016
- Vanguard Australian Fixed Interest Index Fund 6 December 1996
- Vanguard Australian Government Bond Index Fund 14 November 2008
- Vanguard MSCI Australian Large Companies Index ETF 17 December 2010
- Vanguard Australian Property Securities Index Fund 10 December 1997
- Vanguard Australian Shares High Yield Fund 21 February 2000
- Vanguard Australian Shares Index Fund 6 December 1996
- Vanguard MSCI Australian Small Companies Index ETF 9 August 2007
- Vanguard FTSE Europe Shares ETF 16 September 2015
- Vanguard Global Aggregate Bond Index Fund (Hedged) 12 April 2017
- Vanguard FTSE Emerging Markets Shares ETF 17 October 2010
- Vanguard MSCI Index International Shares (Hedged) ETF 25 September 2013
- Vanguard International Credit Securities Index Fund (Hedged) 11 December 2000
- Vanguard International Fixed Interest Index Fund (Hedged) 18 May 1999
- · Vanguard International Shares Index Fund 6 December 1996
- Vanguard Global Minimum Volatility Fund 31 August 2016
- Vanguard Global Value Equity Fund 31 August 2016
- Vanguard International Shares Index Fund (Hedged) 8 June 2000
- Vanguard International Shares Select Exclusions Index Fund 9 December 2016

The Responsible Entity of the Vanguard Wholesale Funds is Vanguard Investments Australia Ltd (the "Responsible Entity"). The Responsible Entity's registered office is Level 34, Freshwater Place, 2 Southbank Boulevard, Southbank Vic 3006.

The Funds invest in accordance with the investment policy of the Funds as set out in their respective Product Disclosure Statements (PDSs) and in accordance with the Funds' Constitution. The Funds seek to track the returns of the Funds' respective indices, before taking into account Fund fees and expenses.

The ETF Class units of the Funds operate as Exchange Traded Funds (ETFs) listed on the Australian Securities Exchange.

Reclassification of units from financial liability to equity

On 5 May 2016, a new tax regime applying to Managed Investment Trusts ("MITs") was established under the *Tax Laws Amendment (New Tax System for Managed Investment Trusts) Act 2016*. The Attribution Managed Investment Trust ("AMIT") regime allows MITs that meet certain requirements to make an irrevocable choice to be an AMIT. In order to allow the Funds to elect into the AMIT tax regime, the Funds' Constitution have been amended and the other conditions to adopt the AMIT tax regime have been met effective 1 July 2017. The Responsible Entity is therefore no longer contractually obligated to pay distributions to unitholders where the Fund meets the criteria set out under AASB 132.

On 3 April 2018, Vanguard Global Minimum Volatility Fund lost its AMIT status as it no longer meets the AMIT tax regime qualification.

Consequently, the units in the Vanguard FTSE Asia ex Japan Shares Index ETF, Vanguard MSCI Australian Large Companies Index ETF, Vanguard MSCI Australian Small Companies Index ETF, Vanguard FTSE Europe Shares ETF, Vanguard FTSE Emerging Markets Shares ETF and Vanguard MSCI Index International Shares (Hedged) ETF have been reclassified from a financial liability to equity on 1 July 2017. For the remaining Funds, their net assets attributable to unitholders remain disclosed as a liability as their multi-class structure means they have not met the strict criteria for recognition as equity, despite their election into the AMIT tax regime also. See note 9 for further information.

The financial statements were authorised for issue by the directors on 4 September 2018. The directors of the Responsible Entity have the power to amend and reissue the financial statements.

Notes to the financial statements (continued)

For the year ended 30 June 2018

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated in the following text.

(a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Accounting Standards Board and the *Corporations Act 2001* in Australia. The Funds are for-profit unit trusts for the purpose of preparing the financial statements.

The financial statements are prepared on the basis of fair value measurement of assets and liabilities except where otherwise stated.

The balance sheet is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and do not distinguish between current and non-current. All material balances are expected to be recovered or settled within twelve months, except for investments in financial assets held at fair value through profit or loss and net assets attributable to unitholders. The amount expected to be recovered or settled within twelve months after the end of each reporting period cannot be reliably determined.

The Funds manage financial assets at fair value through profit or loss based on the economic circumstances at any given point in time, as well as to meet any liquidity requirements. As such it is expected that a portion of the portfolio will be realised within 12 months, however, an estimate of that amount cannot be determined as at balance date.

In the case of net assets attributable to unitholders, the units are redeemed on demand at the unitholder's option. However, holders of these instruments typically retain them for the medium to long term. As such, the amount expected to be settled within 12 months cannot be reliably determined.

(i) Compliance with International Financial Reporting Standards

The financial statements of the Funds also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

(ii) New and amended standards adopted by the Funds

There are no standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning 1 July 2017 that have a material impact on the amounts recognised in the prior periods or will affect the current or future periods.

The amendments made by AASB 2016-2 Amendments to Australian Accounting Standard - Disclosure Initiative: Amendments to AASB 107 require disclosure of changes in liabilities arising from financing activities. The relevant information is provided in note 9.

(b) Financial instruments

(i) Classification

The Funds' investments are classified as at fair value through profit or loss. They comprise:

· Financial instruments held for trading

Derivative financial instruments such as futures, forward foreign exchange contracts, options and swaps are included under this classification. The Funds do not designate any derivatives as hedges in a hedging relationship.

Financial instruments designated at fair value through profit or loss upon initial recognition

These include financial assets that are not held for trading purposes and which may be sold. These are investments in listed equity securities, listed unit trusts, listed property trusts, unlisted unit trusts, fixed interest securities and money market securities.

Financial assets and financial liabilities designated at fair value through profit or loss upon initial recognition are those that are managed and their performance evaluated on a fair value basis in accordance with the Funds' documented investment strategy. The Funds' policy is for the Responsible Entity to evaluate the information about these financial instruments on a fair value basis together with other related financial information

(ii) Recognition/derecognition

The Funds recognise financial assets and financial liabilities on the date they become party to the contractual agreement (trade date) and recognise changes in fair value of the financial assets or financial liabilities from this date.

Investments are derecognised when the right to receive cash flows from the investments has expired or the Funds have transferred substantially all risks and rewards of ownership.

For the year ended 30 June 2018

2 Summary of significant accounting policies (continued)

(b) Financial instruments (continued)

(iii) Measurement

Financial assets and liabilities held at fair value through profit or loss

At initial recognition, the Funds measure a financial asset at its fair value. Transaction costs of financial assets carried at fair value through profit and loss are expensed in the statement of comprehensive income.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the statement of comprehensive income within net gains/(losses) on financial instruments held at fair value through profit or loss in the period in which they arise. This also includes dividend expense on short sales of securities, which have been classified at fair value through profit or loss.

For further details on how the fair value of the financial instruments is determined are disclosed in note 4.

(iv) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

(c) Net assets attributable to unitholders

Units are redeemable at the unitholders' option, however, applications and redemptions may be suspended by the Responsible Entity if it is in the best interests of the unitholders.

The units can be put back to the Funds at any time for cash based on the redemption price, which is equal to a proportionate share of the Funds' net asset value attributable to the unitholders.

The units are carried at the redemption amount that is payable at balance sheet date if the holder exercises the right to put the unit back to the Funds. This amount represents the expected cash flows on redemption of these units.

Units are classified as equity when they satisfy the following criteria under AASB 132 Financial instruments: Presentation:

- the puttable financial instrument entitles the holder to a pro-rata share of net assets in the event of the Fund's liquidation
- the puttable financial instrument is in the class of instruments that is subordinate to all other classes of instruments and class features are identical
- the puttable financial instrument does not include any contractual obligations to deliver cash or another financial asset, or to exchange
 financial instruments with another entity under potentially unfavorable conditions to the Fund, and it is not a contract settled in the Fund's
 own equity instruments; and
- the total expected cash flows attributable to the puttable financial instrument over the life are based substantially on the profit or loss.

Effective from 1 July 2017, Vanguard FTSE Asia ex Japan Shares Index ETF, Vanguard MSCI Australian Large Companies Index ETF, Vanguard MSCI Australian Small Companies Index ETF, Vanguard FTSE Europe Shares ETF, Vanguard FTSE Emerging Markets Shares ETF and Vanguard MSCI Index International Shares (Hedged) ETF units have been reclassified from financial liability to equity as they satisfied all the above criteria.

(d) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less from the date of acquisition that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

Payments and receipts relating to the purchase and sale of investment securities are classified as cash flows from operating activities, as movements in the fair value of these securities represent the Funds' main income generating activity.

(e) Margin accounts

Deposits held with brokers for margin, represent restricted margin deposits for derivative financial instruments.

The reported balance for collateral margins represents the level of restricted cash required to be settled as at close of business at balance date.

For the year ended 30 June 2018

2 Summary of significant accounting policies (continued)

(f) Investment income

Interest income is recognised in profit or loss for all financial instruments that are held at fair value through profit or loss using the effective interest method. Interest income on assets held at fair value through profit or loss is included in the net gains/(losses) on financial instruments. Other changes in fair value for such instruments are recorded in accordance with the policies described in note 2(b).

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Funds estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but do not consider future credit losses. The calculation includes all fees paid or received between the parties to the contract that are an integral part of the effective interest rate, including transaction costs and all other premiums or discounts.

Dividend income is recognised on the ex-dividend date with any related foreign withholding tax recorded as an expense. The Funds currently incur withholding tax imposed by certain countries on investment income.

Trust distributions are recognised on an entitlements basis.

(g) Expenses

All expenses, including Responsible Entity's fees and custodian fees, are recognised in the statement of comprehensive income on an accruals basis

(h) Income tax

Under current legislation, Funds that have elected into the AMIT tax regime are not subject to income tax provided they attribute the entirety of their taxable income to their unitholders.

The Vanguard Global Minimum Volatility Fund does not meet the AMIT tax regime qualification and is not subject to income tax as its unitholders are presently entitled to the income of the Fund.

The benefits of imputation credits and foreign tax paid are passed on to unitholders.

(i) Distributions

Distributions are payable as set out in the Funds' product disclosure statement. Such distributions are determined by the Responsible Entity of the Funds. Distributable income includes capital gains arising from the disposal of financial assets and liabilities held for trading. Unrealised gains and losses on financial assets and liabilities held for trading that are recognised as income are transferred to net assets attributable to unitholders and are not assessable and distributable until realised. Capital losses are not distributed to unitholders but are retained to be offset against any realised capital gains.

(j) Increase/decrease in net assets attributable to unitholders

Income not distributed is included in net assets attributable to unitholders. Where the Funds' units are classified as liabilities, movements in net assets attributable to unitholders are recognised in the statement of comprehensive income as finance costs.

(k) Functional and presentation currency

(i) Functional and presentation currency

Items included in the Funds' financial statements are measured using the currency of the primary economic environment in which it operates (the 'functional currency'). This is the Australian dollar, which reflects the currency of the economy in which the Funds compete for funds and is regulated. The Australian dollar is also the Funds' presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translations at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when fair value was determined. Translation differences on assets and liabilities carried at fair value are reported in the statement of comprehensive income on a net basis within net gains/ (losses) on financial instruments held at fair value through profit or loss.

For the year ended 30 June 2018

2 Summary of significant accounting policies (continued)

(I) Due from/to brokers

Amounts due from/to brokers represent payables for securities purchased and receivables for securities sold that have been contracted for but not yet delivered by the end of the year. A provision for impairment of amounts due from brokers is established when there is objective evidence that the Fund will not be able to collect all amounts due from the relevant broker. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and default in payments are considered indicators that the amount due from brokers is impaired.

(m) Receivables and accrued income

Receivables may include amounts for dividends, interest and trust distributions. Dividends and trust distributions are accrued when the right to receive payment is established. Interest is accrued at the end of each reporting period from the time of last payment in accordance with the policy set out in note 2(f) above. Amounts are generally received within 30 days of being recorded as receivables.

(n) Payables

Payables include liabilities and accrued expenses owing by the Funds which are unpaid as at the end of the reporting period.

As the Funds have a contractual obligation to distribute their distributable income, a separate distribution payable is recognised in the balance sheet as at the end of each reporting period where this amount remains unpaid as at the end of the reporting period

(o) Applications and redemptions

Applications received for units in the Funds are recorded net of any entry fees payable prior to the issue of units in the Funds. Redemptions from the Funds are recorded gross of any exit fees payable after the cancellation of units redeemed.

(p) Goods and Services Tax (GST)

The GST incurred on the costs of various services provided to the Responsible Entity by third parties have been passed onto the Funds. The Funds qualify for Reduced Input Tax Credit recovery rate of between 55% and 100%, hence Responsible Entity's fees, custodial fees and other expenses have been recognised in the statement of comprehensive income net of the amount of GST recoverable from the Australian Taxation Office (ATO). Accounts payable are inclusive of GST. The net amount of GST recoverable from the ATO is included in receivables in the balance sheet. Cash flows relating to GST are included in the statement of cash flows on a gross basis.

(q) Comparative revisions

Comparative information has been revised where appropriate to enhance comparability. Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

(r) Use of estimates

The Funds make estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

For the majority of the Funds' financial instruments, quoted market prices are readily available. However, certain financial instruments, for example, over-the-counter derivatives or unquoted securities, are fair valued using valuation techniques. Where valuation techniques (for example, pricing models) are used to determine fair values, they are validated and periodically reviewed by experienced personnel of the Responsible Entity, independent of the area that created them.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

For certain other financial instruments, including amounts due from/to brokers and payables, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments.

For the year ended 30 June 2018

2 Summary of significant accounting policies (continued)

(s) Investment entity exception

AASB 10 Consolidated Financial Statements for investment entities includes an exception to the consolidation rules for those entities qualifying as "investment entities". Subsidiaries of investment entities will be accounted for at fair value through profit or loss, in accordance with AASB 139 Financial Instruments: Recognition and Measurement.

A parent entity will need to make an assessment of whether it meets the definition of an investment entity. An investment entity is defined as an entity that:

- (a) obtains funds from one or more investors for the purpose of providing those investor(s) with investment management services:
- (b) commits to its investor(s) that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both; and
- (c) measures and evaluates the performance of substantially all of its investments on a fair value basis.

The Funds have multiple investments that they control. However, the Funds have determined that they are investment entities under the definition in AASB 10, as they meet the following criteria:

- (a) the Funds have obtained funds from unitholders for the purpose of providing them with investment management services;
- (b) the Funds' business purpose, which is communicated directly to unitholders, is investing solely for returns from capital appreciation and investment income; and
- (c) the performance of investments made by the Funds are measured and evaluated on a fair value basis.

The Funds also meet all of the typical characteristics of an investment entity, including:

- (a) holding more than one investment;
- (b) having more than one investor;
- (c) having investors that are not related parties of the entity; and
- (d) having ownership interests in the form of equity or similar interests.

As the Funds measure all of their controlled entities at fair value through profit or loss, they only present separate financial statements.

(t) New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the 30 June 2018 reporting period and have not been early adopted by the Funds. The directors' assessment of the impact of these new standards (to the extent relevant to the Funds) and interpretations is set out below:

(i) AASB 9 Financial Instruments (and applicable amendments), (effective from 1 January 2018)

AASB 9 *Financial Instruments* addresses the classification, measurement and derecognition of financial assets and financial liabilities. It has now also introduced revised rules around hedge accounting and impairment. The standard is not applicable until 1 January 2018 but is available for early adoption.

The directors have assessed the impact of AASB 9 on the Funds' financial statements as follows.

For Funds that hold equity instruments, given no debt instruments are held by the Funds, which could result in a reclassification of the financial instruments to amortised cost or fair value through other comprehensive income ('FVOCI'), the adoption of AASB 9 is not expected to have a significant impact on the recognition and measurement of the Funds' financial instruments.

For Funds that hold debt instruments, fair value information remains the most relevant information in asset performance evaluation and the fund manager's compensation. As a result, the Funds will continue to report all financial assets at fair value through profit or loss.

The derecognition rules have not been changed from the previous requirements, and the Funds do not apply hedge accounting.

For the year ended 30 June 2018

2 Summary of significant accounting policies (continued)

(t) New accounting standards and interpretations (continued)

(ii) AASB 15 Revenue from Contracts with Customers (effective from 1 January 2018)

The AASB has issued a new standard for the recognition of revenue. This will replace AASB 118 which covers contracts for goods and services and AASB 111 which covers construction contracts.

The new standard is based on the principle that revenue is recognised when control of a good or service transfers to a customer - so the notion of control replaces the existing notion of risks and rewards.

The Funds' main sources of income are interest, dividends and gains on financial instruments held at fair value. All of these are outside the scope of the new revenue standard. As a consequence, the directors do not expect the adoption of the new revenue recognition rules to have a significant impact on the Funds' accounting policies or the amounts recognised in the financial statements.

(u) Rounding of amounts

The Funds are registered schemes of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, relating to the "rounding off" amounts in the financial statements. Amounts in the financial statements have been rounded off to the nearest thousand dollars unless otherwise indicated.

3 Financial risk management

The Funds' activities expose them to a variety of financial risks: market risk (including price risk, foreign exchange risk and interest rate risk), credit risk and liquidity risk.

The Funds' overall risk management program focuses on ensuring compliance with the Funds' Product Disclosure Statement and seeks to maximise the returns derived for the level of risk to which the Funds are exposed. The Funds use derivative financial instruments to moderate and create certain risk exposures. Financial risk management is carried out by the investment management department of the Responsible Entity under policies approved by the Board of Directors of the Responsible Entity (the "Board").

The Funds use different methods to measure different types of risks to which they are exposed. These methods are explained on the following pages.

(a) Market risk

(i) Price risk

The Funds are exposed to equity securities and derivative price risk. This arises from investments held by the Funds for which prices in the future are uncertain. Where non-monetary financial instruments are denominated in currencies other than the Australian dollar, the price in the future will also fluctuate because of changes in foreign exchange rates. Paragraph (ii) 'Foreign exchange risk' below sets out how this component of price risk is managed and measured.

In any asset sector the returns of individual securities are a combination of the market returns and returns specific to each security. By diversifying their holdings across the market, index funds are generally well protected from the specific risk of individual securities. Vanguard employs an indexing investment strategy in all asset classes in which the Funds invest.

At 30 June, the fair value of equities and related derivatives exposed to price risk were as follows:

	ex Japan Sh	Vanguard FTSE Asia ex Japan Shares Index ETF		MSCI ₋arge dex ETF	Vanguard A Property Se Index F	ecurities	Vanguard Australian Shares High Yield Fund

The table presented in note 3(b) summarises the impact on operating profit before finance costs attributable to unitholders and liabilities attributable to unitholders from possible changes in market prices that were reasonably based on the risk that the Funds were exposed to at reporting date.

For the year ended 30 June 2018

3 Financial risk management (continued)

(a) Market risk (continued)

(ii) Foreign exchange risk

The Funds have exposure to foreign assets and holds both monetary and non-monetary assets denominated in currencies other than the Australian dollar. Foreign exchange risk arises as the value of monetary securities denominated in other currencies will fluctuate due to changes in exchange rates. The foreign exchange risk relating to non-monetary assets and liabilities is a component of price risk, not foreign exchange risk. The risk is measured using sensitivity analysis.

The Vanguard FTSE Asia ex Japan Shares Index ETF, Vanguard FTSE Europe Shares ETF, Vanguard Global Aggregate Bond Index Fund (Hedged), Vanguard FTSE Emerging Markets Shares ETF, Vanguard MSCI Index International Shares (Hedged) ETF, Vanguard International Credit Securities Index Fund (Hedged), Vanguard International Fixed Interest Index Fund (Hedged) and Vanguard International Shares Index Fund have exposure to foreign assets and holds both monetary and non-monetary assets denominated in currencies other than the Australian dollar. Foreign exchange risk arises as the value of monetary securities denominated in other currencies will fluctuate due to changes in exchange rates. The foreign exchange risk relating to non-monetary assets and liabilities is a component of price risk not foreign exchange risk. The risk is measured using sensitivity analysis.

The foreign exchange risk disclosures have been prepared on the basis of the Funds' direct investments and not on a look-through basis to investments held via interposed investment funds. In addition, any currency hedging to minimise the impact of foreign exchange risk has not been incorporated into the disclosures unless the derivatives are held directly in these Funds.

In accordance with the Funds' policy, the Investment Manager monitors the Funds' foreign exchange exposure on a daily basis.

The tables below summarise the Funds' assets and liabilities that are denominated in a currency other than the Australian dollar.

Note 3(b) summarises the impact of an increase/decrease of foreign exchange rates of each Funds' operating profit and net assets attributable to unitholders through changes in fair value or changes in future cash flows.

(iii) Cash flow and fair value interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Funds are exposed to cash flow interest rate risk on financial instruments with variable interest rates. Financial instruments with fixed rates expose the Funds to fair value interest rate risk.

The Funds' interest bearing financial assets and financial liabilities expose it to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The risk is measured using sensitivity analysis.

The interest rate risk disclosures have been prepared on the basis of the Funds' direct investments and not on a look-through basis for investments held indirectly through unit trusts. Consequently the disclosure of interest rate risk below may not represent the true interest rate risk profile of the Funds where the Funds have significant investments in unit trusts which also have exposure to the interest rate markets.

For the year ended 30 June 2018

The table presented in note 3(b) summarises the impact of an increase/decrease of interest rates on the Funds' operating profit and net assets attributable to unitholders through changes in fair value or changes in future cash flows.

For the year ended 30 June 2018

3 Financial risk management (continued)

(b) Summarised sensitivity analysis

The following tables summarise the sensitivity of the Funds' operating profit and net assets attributable to unitholders to interest rate risk, foreign exchange risk and price risk. The reasonably possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical levels of changes in interest rates and foreign exchange rates as well as the indices that the individual Funds are designed to track. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of the economies, markets and securities in which the Funds invest. As a result, historic variations in risk variables are not a definitive indicator of future variations in the risk variables.

Price risk movement represents the range of historical index returns from the average return minus one standard deviation to the average return plus one standard deviation. For a normal distribution approximately two-thirds of the outcomes are expected to fall within plus or minus one standard deviation of the mean. Outcomes are expected to occur outside these ranges, approximately one-third of the time.

(c) Credit risk

The Funds are exposed to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when they fall due.

The main concentration of credit risk, to which the Funds are exposed, arises from the Funds' investments in debt securities. The Funds are also exposed to counterparty credit risk on derivative financial instruments, cash and cash equivalents, amounts due from brokers and other receivables. None of these assets are impaired nor past due but not impaired.

For Funds which invest in forward exchange contracts there is a risk associated with unrealised profits.

Credit risk is managed by ensuring that:

- · counterparties with respective credit limits are approved by the Responsible Entity; and
- transactions are undertaken with a number of counterparties.

The Funds invest in fixed interest securities and money market securities which have credit ratings as rated by well-known rating agencies. For unrated fixed interest securities a rating is assigned by the investment manager using an approach that is consistent with the approach used by rating agencies.

The maximum exposure to credit risk at the reporting date is the carrying amount of the financial assets. There were no significant concentrations of credit risk to counterparties at 30 June 2018 or 30 June 2017.

For the year ended 30 June 2018

3 Financial risk management (continued)

(c) Credit risk (continued)

(i) Debt securities

There is credit risk associated with debt securities. Vanguard seeks to reduce this risk by selecting only debt securities with a sufficiently high credit rating and by diversifying the Funds' holding across issuers.

Vanguard will try to minimise the credit risk associated with holding bonds by primarily holding government and supranational (issued by government-owned or government-guaranteed entities) bonds or other investment-grade entities. Investment-grade issuers are defined as those rated BBB- or higher by Standard & Poor's or Baa3 or higher by Moody's. An analysis of debt by rating is set out in the table below.

For the year ended 30 June 2018

3 Financial risk management (continued)

(c) Credit risk (continued)

(ii) Derivatives

The Responsible Entity has established counterparty limits such that, at any time, exposure to derivative financial instruments equivalent to less than 5% of the value of a Fund are with any individual counterparty, and all contracts are with counterparties included in the Board's Approved Counterparties list.

The Funds also restrict their exposure to credit losses on derivative instruments they hold by entering into master netting arrangements with counterparts with whom they undertake a significant volume of transactions. Master netting arrangements do not result in an offset of balance sheet assets and liabilities unless transactions are settled on a net basis. However, the credit risk associated with favourable contracts is reduced by master netting arrangements to the extent that if an event of default occurs, all amounts with the counterparty are closed and settled on a net basis. The Funds' overall exposure to credit risk on derivative instruments subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangements. As at 30 June 2018, the Funds do not have outstanding netting arrangements that materially impact offsetting of financial assets and liabilities on the balance sheet. As a result, the financial assets and liabilities are presented on a gross basis.

During the year, the Funds could enter into collateral arrangements for forward foreign exchange contracts, repurchase agreements and reverse repurchase agreements to assist in enhancing returns in a risk controlled environment for the cash flow management of the Funds. Refer to Note 6 for the balances in relation to these arrangements as of year end.

(iii) Settlement of securities transactions

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered low, as delivery of securities sold is only made once the broker has made payment. Payment is made on purchase once the securities have been received by the Fund. The trade will fail if either party fails to meet its obligations.

(iv) Cash and cash equivalents

The exposure to credit risk for cash and cash equivalents is low as all counterparties have a rating of A1+ short-term Standard & Poor's credit ratings (or Moody's equivalent).

In accordance with the Responsible Entity's derivatives policy, the Responsible Entity monitors the Funds' exposures on a daily basis, which the Board of Directors reviews quarterly. The derivatives policy is subject to annual review.

(v) Other

The Funds are not materially exposed to credit risk on other financial assets. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of the financial assets.

The clearing and depository operations for the Funds' security transactions are mainly concentrated with one counterparty, namely JP Morgan Chase & Co. JP Morgan Chase & Co is a member of a major securities exchange, and at 30 June 2018 had a credit rating of A-1 (30 June 2017: A-1). At 30 June 2018, substantially all cash and cash equivalents, balances due from brokers and investments are held in custody by JP Morgan Chase & Co.

(d) Liquidity risk

Liquidity risk is the risk that the Funds may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Funds are exposed to daily cash redemptions of redeemable units. The Funds primarily hold investments that are traded in active markets and can be readily disposed. The Funds' financial instruments include investments in equity investments, fixed interest securities and derivative contracts traded over-the-counter and on an exchange. The Funds' listed securities are considered to be readily realisable as they are all listed on major stock exchanges. The Funds may use futures to gain market exposure without investing directly in the securities. This allows the Funds to maintain liquidity without being under-invested in their respective investment policies. The derivatives are not used to leverage the Funds' portfolios.

For the year ended 30 June 2018

3 Financial risk management (continued)

(d) Liquidity risk (continued)

The tables below analyses the Funds' financial liabilities into relevant maturity groupings based on the remaining period at the end of the reporting period. The amounts in the table are contractual undiscounted cash flows.

4 Fair value measurement

The Funds measure and recognise the following assets and liabilities at fair value on a recurring basis:

- Financial assets / liabilities designated at fair value through profit or loss (FVTPL) (see note 6 and 7)
- Financial assets / liabilities held for trading (see note 6 and 7)
- Derivative financial instruments (see note 8)

The Funds have no assets or liabilities at fair value on a non-recurring basis in the current reporting period.

AASB 13 requires disclosure of fair value measurements by level of the following fair value hierarchy;

- (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- (b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2); and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

For the year ended 30 June 2018

4 Fair value measurement (continued)

(i) Fair value in an active market (level 1)

The fair value of financial assets and liabilities traded in active markets is based on their quoted market prices at the end of the reporting period without any deduction for estimated future selling costs.

The Funds value their investments in accordance with the accounting policies set out in note 2(b) to the financial statements. For the majority of investments, the Funds rely on information provided by independent pricing services for the valuation of investments.

The quoted market price used for financial assets held by the Funds is the current bid price; the appropriate quoted market price for financial liabilities is the current asking price. When the Funds hold derivatives with offsetting market risks, they use mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this bid or asking price to the net open position, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

(ii) Fair value in an inactive or unquoted market (level 2 and level 3)

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. These include the use of recent arm's length market transactions, reference to the current fair value of a substantially similar other instrument, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions. The carrying amounts of the Funds' assets and liabilities at the balance sheet date approximate their fair values

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the end of the reporting period applicable for an instrument with similar terms and conditions.

For other pricing models, inputs are based on market data at the end of the reporting period. Fair values for unquoted equity investments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

The fair value of derivatives that are not exchange traded is estimated at the amount that the Funds would receive or pay to terminate the contract at the balance sheet date taking into account current market conditions (volatility and appropriate yield curve) and the current creditworthiness of the counterparties. The fair value of a forward contract is determined as a net present value of estimated future cash flows, discounted at appropriate market rates as at the valuation date. The fair value of an option contract is determined by applying the Black-Scholes option valuation model.

Investments in other unlisted unit trusts are recorded at the redemption value per unit as reported by the investment managers of such funds.

Some of the inputs to these models may not be market observable and are therefore estimated based on assumptions.

The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Funds hold. Valuations are therefore adjusted, where appropriate, to allow for additional factors including liquidity risk and counterparty risk.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Fund for similar financial instruments.

Recognised fair value measurements

The following tables present the Funds' financial assets and liabilities (by asset class) measured at fair value according to the fair value hierarchy at 30 June 2018 and 30 June 2017.

			Vanguard FT	SE Asia ex Jap	oan Shares Ind	lex ETF

The Funds' policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

For the year ended 30 June 2018

4 Fair value measurement (continued)

Transfers between levels

The following tables present the transfers between levels during the year ended 30 June 2018:

		Vanguard FTSE Asia ex Japan Shares Index ETF			Vanguard Australian Shares Index Fund			Vanguard Global Value Equity Fund		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3	
30 June 2018	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	
Transfers between level 1 and 2:										
Equity securities	1,850	(1,850)	-	-	-	-	-	-	-	
Transfers between level 2 and 1:										
Equity securities	(51)	51	-	-	-	-	(19)	19		
30 June 2017										
Transfers between level 1 and 2:										
Equity securities	(717)	717	-	(216)	216	-	-	-	-	

The equity securities transferred into level 2 relates to the frequency of quoted price valuations. There were no transfers into and out of level 3 during the reporting period.

An overview of the risk exposures relating to financial liabilities at fair value through profit or loss is included in note 3.

For the year ended 30 June 2018

8 Derivative financial instruments

In the normal course of business the Funds enter into transactions in various derivative financial instruments with certain risks. A derivative is a financial instrument or other contract which is settled at a future date and whose value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variable.

Derivative financial instruments require no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.

Derivative transactions include a wide assortment of instruments, such as forwards, futures and options. Derivatives are considered to be part of the investment process. The use of derivatives is an essential part of the Funds' portfolio management. Derivatives are not managed in isolation. Consequently, the use of derivatives is multifaceted and includes:

- hedging to protect an asset or liability of a Fund against a fluctuation in market values or to reduce volatility
- a substitution for trading of physical securities
- adjusting asset exposures within the parameters set in the investment strategy, and adjusting the duration of fixed interest portfolios or the weighted average maturity of cash portfolios.

While derivatives are used for trading purposes, they are not used to gear (leverage) a portfolio. Gearing a portfolio would occur if the level of exposure to the markets exceeds the underlying value of the Funds.

The Funds hold the following derivative instruments:

Forward currency contracts

Forward currency contracts are primarily used by the Funds to manage against foreign currency risks on their investments. The Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed upon price on an agreed future date. Forward currency contracts are valued at the prevailing bid price at the end of each reporting period. The Funds recognise a gain or loss equal to the change in fair value at the end of each reporting period

Futures

Futures are contractual obligations to buy or sell financial instruments on a future date at a specified price established in an organised market. The futures contracts are collateralised by cash or marketable securities. Changes in futures contracts' values are usually settled net daily with the exchange. Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates at a future date at a specified price, established in an organised financial market.

The Funds' derivative financial instruments at year end are detailed below:

Risk exposures and fair value measurements

Information about the Funds' exposure to credit risk, foreign exchange risk, and interest rate risk and about the methods and assumptions used in determining fair values is provided in note 3 to the financial statements. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of derivative financial instruments disclosed above.

9 Net assets attributable to unitholders

Under AASB 132 *Financial instruments: Presentation*, puttable financial instruments meet the definition of a financial liability to be classified as equity where certain strict criteria are met. The Funds shall classify a financial instrument as an equity instrument from the date when the instrument has all the features and meets the conditions. Otherwise the financial instrument should be disclosed as a liability.

On 1 July 2017, the Funds have elected into the AMIT tax regime. The Funds' Constitution have been amended on the same date and they no longer have a contractual obligation to pay distributions to unitholders.

The impact of this for the Vanguard FTSE Asia ex Japan Shares Index ETF, Vanguard MSCI Australian Large Companies Index ETF, Vanguard MSCI Australian Small Companies Index ETF, Vanguard FTSE Europe Shares ETF, Vanguard FTSE Emerging Markets Shares ETF and Vanguard MSCI Index International Shares (Hedged) ETF is that their net assets attributable to unitholders is no longer disclosed as a liability, but rather as equity. As a result of the reclassification, the Funds' distributions are no longer classified as finance cost in the statement of comprehensive income, but rather as distributions paid in the statement of changes in equity.

For the remaining Funds (except Vanguard Global Minimum Volatility Fund), their net assets attributable to unitholders remain disclosed as a liability as their multi-class structure means they have not met the strict criteria for recognition as equity, despite their election into the AMIT tax regime also. Vanguard Global Minimum Volatility Fund lost its AMIT status as of 3 April 2018, and as a result, the units in this Fund are classified as a liability as at 30 June 2018.

For the year ended 30 June 2018

9 Net assets attributable to unitholders (continued)

Movement in number of units and net assets attributable to unitholders during the year were as follows:

^{*}The Vanguard International Shares Index Fund ("VISIF") offers four classes of units, Ordinary Units, Class R Units, ETF Class Units and Class B Units. Until 21 December 2004, Class R Units were issued on the basis that all distributions were compulsorily reinvested in further Class R Units (unless the Responsible Entity elects to pay a cash distribution). The ETF Class Units commenced on 18 November 2014 and are traded on the Australian Securities Exchange. The Class B Units commenced on 18 November 2014 and represents Vanguard Global Share Index Fund's (Hedged) holdings in VISIF. All units in VISIF are denominated in AUD and are of equal value.

Each unit represents a right to an individual share in the Funds and does not extend to a right to the underlying assets of the Funds. The Vanguard FTSE Asia ex Japan Shares Index ETF, Vanguard MSCI Australian Large Companies Index ETF, Vanguard MSCI Australian Small Companies Index ETF, Vanguard FTSE Europe Shares ETF, Vanguard FTSE Emerging Markets Shares ETF and Vanguard MSCI Index International Shares (Hedged) ETF have no separate classes of units and each unit has the same rights attaching to it as all other units of the Funds.

For the year ended 30 June 2018

9 Net assets attributable to unitholders (continued)

Capital risk management

The Funds consider their net assets attributable to unitholders as capital, notwithstanding net assets attributable to unitholders are classified either as a liability or equity. The amount of net assets attributable to unitholders can change significantly on a daily basis as the Funds are subject to daily applications and redemptions at the discretion of unitholders.

Daily applications and redemptions are reviewed relative to the liquidity of the Funds' underlying assets on a daily basis by the Responsible Entity. Under the terms of the Funds' Constitution, the Responsible Entity has the discretion to reject an application for units and to defer or adjust a redemption of units if the exercise of such discretion is in the best interests of unitholders.

The Funds' investment strategy remains unchanged and the Funds continue to hold direct investments which provide exposure to liquid assets including equity securities, income securities, interest earnings and cash equivalent securities. As such, the Funds will meet any capital requirements from the liquidation of liquid assets, which include cash and cash equivalents.

10 Distributions to unitholders paid and payable

The fair value of financial assets held in the investee fund is included in financial assets at fair value through profit or loss in the balance sheet.

Interest held represents the entity's year end percentage interest in the Wholesale class of the investee funds.

The Funds' maximum exposure to loss from its interest in investee funds is equal to the total fair value of its investments in the investee funds as there are no off-balance sheet exposure relating to any of the investee funds. Once the Fund has disposed of its shares in an investee fund, it ceases to be exposed to any risk from that investee fund.

The proportion of ownership interest is equal to the proportion of the voting power held.

The Funds did not hold any investments in Vanguard Investments Australia Ltd during the year.

Other transactions within the Funds

Apart from those details disclosed in this note, no directors have entered into a material contract with the Funds during the financial year and there were no material contracts involving directors' interests subsisting at year end.

Vanguard International Credit Securities Index Fund (Hedged)						
Fixed interest securities - international	778,750	23,104	2.97%	1,330,423	41,459	3.11%
Vanguard International Fixed Interest Index Fund (Hedged)						
Fixed interest securities - international	1,737,049	35,744	2.06%	2,784,879	54,507	1.95%

Interest revenue is recognised on an entitlements basis, and is shown in the income statement as part of net gains/losses on financial instruments designated at fair value. This is due to the discount securities and fixed interest securities being classified as financial instruments designated at fair value through profit or loss upon initial recognition, as detailed in note 2(b).

Interest revenue is net of withholding taxes of \$465,001 for Vanguard Global Aggregate Bond Index Fund (Hedged), \$11,819 of Vanguard International Credit Securities Index Fund (Hedged) and \$195,448 for Vanguard International Fixed Interest Index Fund (Hedged).

18 Events occurring after the reporting period

On 1 July 2018, Vanguard Global Value Equity Fund lost its AMIT status as it no longer meets the AMIT tax regime qualification.

Colin Kelton resigned as a Director of Vanguard Investments Australia Ltd on 4 September 2018.

Frank Kolimago was appointed as a Director of Vanguard Investments Australia Ltd on 4 September 2018.

There are no significant events that have occurred since balance date which would impact on the financial position of the Funds as disclosed in the balance sheet as at 30 June 2018 or on the results and cash flows of the Funds for the year ended on that date.

19 Contingent assets, contingent liabilities and commitments

There are no outstanding contingent assets, liabilities or commitments as at 30 June 2018 (2017: Nil).

Directors' declaration

In the opinion of the directors of the Responsible Entity:

- (a) the financial statements and notes set out on pages 15 to 121 are in accordance with the Corporations Act 2001, including:
 - complying with Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements; and
 - (ii) giving a true and fair view of the Funds' financial position as at 30 June 2018 and of their performance, as represented by the results of their operations for the financial year ended on that date.
- (b) there are reasonable grounds to believe that the Funds will be able to pay their debts as and when they become due and payable.
- (c) Note 2(a) confirms that the financial statements comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

This declaration is made in accordance with a resolution of the directors.

referred to collectively as Vanguard Multi-class Funds & Standalone ETFs.

Our opinion

In our opinion:

The accompanying financial report of Vanguard Multi-class Funds & Standalone ETFs (the Funds) is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the Funds' financial positions as at 30 June 2018 and of their financial performance for the year then ended
- (b) complying with Australian Accounting Standards and the Corporations Regulations 2001.

What we have audited

The financial report comprises:

- the balance sheets as at 30 June 2018
- the statements of comprehensive income for the year then ended
- the statements of changes in equity for the year then ended
- the statements of cash flows for the year then ended

^{*} denotes listed Funds

- the notes to the financial statements, which include a summary of significant accounting policies
- the directors' declaration.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial report* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

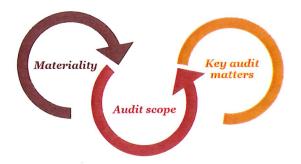

Independence

We are independent of the Funds in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Our audit approach

An audit is designed to provide reasonable assurance about whether the financial report is free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial report as a whole, taking into account the geographic and management structure of the Funds, their accounting processes and controls and the industry in which they operate.

Materiality

- For the purpose of our audit we used approximately 2.5% of the Fund's net assets to set overall materiality for the Vanguard International Shares Select Exclusions Index Fund.
- For all of the other funds we used approximately 1% of the Fund's net assets to set our overall materiality for each Fund.

- We applied this threshold, together with qualitative considerations, to determine the scope of our audit and
 the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements on the
 financial report as a whole.
- We chose net assets because, in our view, it is the metric against which the performance of the Funds are most commonly measured and is a generally accepted benchmark in the fund industry.
- We selected 1% and 2.5% based on our professional judgement noting that they are within the range of commonly acceptable net asset related thresholds in the industry.

Audit Scope

- Our audit focused on where the directors made subjective judgements; for example, significant accounting
 estimates involving assumptions and inherently uncertain future events.
- Our audit approach reflects the nature of the investments held by the Funds and the consideration of the
 work undertaken by third party service providers. The key service provider relevant to our audit is the
 administrator and custodian, who maintains the accounting records of the Funds and provides custodian
 services for the investments.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report for the current period. The key audit matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Further, any commentary on the outcomes of a particular audit procedure is made in that context. We communicated the key audit matters to the Audit Committee.

Key audit matter

Investments in financial assets and financial

Refer to note 2 (Summary of significant accounting policies) and note 4 (Fair value measurement)

At 30 June 2018, investments in financial assets and financial liabilities comprised primarily of investments in equity securities, listed unit trusts, listed property trusts, unlisted unit trusts, fixed interest securities, money market securities, repurchase agreements and derivatives.

Investments in financial assets and financial liabilities was a key audit matter because investments represent the principal element of the balance sheet. A discrepancy in the valuation or existence of investments could cause the net asset value to be materially misstated which would also impact the Funds' reported performance as the valuation of investments is the main driver of movements in the profit of the Funds.

How our audit addressed the key audit matter

To assess the design and operating effectiveness of the service providers' relevant controls, we:

- inspected the assurance reports provided to Vanguard Investments Australia Ltd (the "Responsible Entity") by the service provider setting out the controls in place at that service provider, and that included an independent audit opinion over the design and operating effectiveness of those controls
- considered the Responsible Entity's analysis of the results of the tests undertaken and the conclusions formed by the auditor on the design and operating effectiveness of controls to the extent relevant to our audit of the Funds.

Key audit matter

How our audit addressed the key audit matter

We obtained an audit report from the third party service provider's independent auditors on the valuation and existence of the Fund's investments as at balance date. We compared the number and value of the investments at 30 June 2018 as recorded in the Funds' financial report and underlying accounting records to this report.

For investments not held in custody at the custodian we performed the following procedures, amongst others:

- We obtained a confirmation from the counterparties for collateral held or from the unit registry of the Responsible Entity for investments in unlisted unit trusts at year end and compared the confirmed balance to the accounting records.
- We compared the price used by the Funds to value unlisted unit trust investments with the 30 June 2018 price quoted by the unlisted unit trust's Responsible Entity, as well as a comparison to redemptions of units for that quoted price at year-end.
- We obtained the trade ticket and the account statement for repurchase agreements and agreed the amounts to the accounting records.

Other information

The directors of the Responsible Entity are responsible for the other information. The other information comprises the information included in the annual report for the year ended 30 June 2018, including the Director's report, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors of the Responsible Entity for the financial report

The directors of the Responsible Entity of the Funds are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and *Corporations Act 2001* and for such internal control as the directors of the Responsible Entity determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors of the Responsible Entity are responsible for assessing the ability of the Funds to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Responsible Entity either intend to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at:

http://www.auasb.gov.au/auditors_responsibilities/ar2.pdf, for the listed funds and http://www.auasb.gov.au/auditors_responsibilities/ar6.pdf, for the unlisted funds. These descriptions forms part of our auditor's report.
