ABN 19 161 234 395

### Quarterly Report July to September 2018

#### **Corporate**

The Board continues to review and evaluate potential corporate opportunities in the mining sector and is of the view that present market conditions will provide more opportunities going forward than seen in recent years.

#### **Exploration Projects**

As at the end of September 2018, no further exploration activities occurred in the tenement held by the Company in Xinjiang Autonomous Region.

Until the Company is able to carry out its plan to develop its existing assets, the directors are committed to carrying out meaningful work by identifying and assessing opportunities that may be valuable to the Company.

#### **Kyzyl-Leto Copper Project**

Kyzyl-Leto has Chinese classified Non – JORC compliant mineralization of 4,271,500 tons at 1.93% copper for 82,300 tons of copper metal and an exploration license area of 13.05 square kilometers. Under the Chinese System of Resources Classification the resources have been classified as 332 and 333 which represent – Discovered but Indicated and Inferred respectively. The Company plans to bring this project into production as soon as possible.

The Kyzyl-Leto East and West prospects remain prospective for additional copper mineralization targeting potential extensions to currently know mineralization. The priority is to target higher copper grades, increase tonnage and confidence in the mineralization at the Kyzyl-Leto East and West prospects Post infill drilling JORC Compliant Resources could be estimated and economic studies applied to the appropriate level of classified resource.

Within the broader Kyzyl license there remains strong exploration potential to discover additional outcropping and possible concealed mineralization related to other QAP intrusive bodies. Initial exploration completed has identified several other QAP dykes with low to moderate grade copper mineralization at surface. Additional work programs are proposed that will evaluate known copper anomalies but also assist in discovering potentially concealed mineralization.

#### **Competent Person's Requirement – Exploration Results and Mineral Resources**

Information in this announcement that relates to the Company's exploration results or estimates

of mineral resources or ore reserves was originally provided in the Company's Replacement Prospectus dated 4 August 2014 and announced on the ASX on 19 September 2014 (Replacement Prospectus). The Company confirms that it is not aware of any new information or data that materially affects the information included in the Replacement Prospectus and in the case of estimates of mineral resources or ore reserves, that all material assumptions and technical parameters underpinning the estimates in the Replacement Prospectus continue to apply and have not materially changed.

## Tenement Holdings and Movements

### Mining Tenements and Beneficial Interest held as at the end of the September 2018 Quarter

Summary of Kyzyl-Leto Project Chinese Classified Resources:

Chinese Classification	Tonnes	%	Grade Cu%	Copper Metal	Location	% Interest held by ERX
Kyzyl-Leto West (No.2 prospect)						
332	1448700	80.8	1.47	21287	Yining,Xinjiang Province,China	100
333	345300	19.2	1.79	6170	Yining,Xinjiang Province,China	100
Total	1794000		1.53	27457		
Kyzyl-Leto West (No.2+1 prospect)						
332	65900	28.5	0.87	571	Yining,Xinjiang Province,China	100
333	165500	71.5	0.89	1479	Yining,Xinjiang Province,China	100
