

## San Jorge mining update – Drilling and fleet mobilisation

- 20 holes drilled during the past week to bring the October project total to 55 holes drilled.
- Grade control drilling completed for initial mining target area.
- Drill rigs relocated targeting second area for commencement of grade control.
- Mining fleet equipment continues to arrive on site via ongoing barge deliveries.
- Operations remain on track for the first commercial shipment in Q1 2019.

Axiom Mining Limited ('Axiom') is pleased to announce that San Jorge mine construction continues on track with weekly project development activities including completion of infill grade control drilling of the first proposed pit for mining; construction of new on-site office facilities; and regular delivery of incoming items and accessories to grow and support the site and mining fleet.

“Operational momentum is building at San Jorge with prominent changes occurring on site over the past two weeks, the transition from advanced exploration to mine construction being clearly evident,” said Axiom CEO, Mr Ryan Mount.

*On-site heavy machinery for mining; currently utilised for mine construction*

*Landing craft barge arrival*
