

Metallica & Melior Merger

Creating a diversified Queensland mining company

8 November 2018

ASX: MLM

TSX-V: MLR

Disclaimer

Statements & material contained in this presentation, particularly those regarding possible or assumed future performance, production levels or rates, metal prices, metal markets, resources or potential growth of Metallica Minerals Ltd and Melior Resources Inc., industry growth or other trend projections are, or may be, Forward Looking Statements. Such statements relate to future events & expectations as such, involve known & unknown risks & uncertainties.

The Urquhart Bauxite (Bx) and Urquhart Point Heavy Mineral Sands (HMS) Projects, Esmeralda Graphite and the Cape Flattery Silica Sands and Goondicum Projects are at the exploration, advanced evaluation & feasibility stage & although reasonable care has been taken to ensure that the facts stated in this presentation are accurate & or that the opinions expressed are fair & reasonable, no reliance can be placed for any purpose whatsoever on the information contained in this document or on its completeness.

Actual results & developments of projects and market development may differ materially from those expressed or implied by these forward looking statements depending on a variety of factors.

Nothing in this presentation should be construed as either an offer to sell or a solicitation of an offer to buy or sell shares in any jurisdiction.

This material is used for a company summary presentation only, for more detailed information the reviewer should seek company information as provided in Metallica's ASX releases, Annual & Quarterly Reports and Melior's TSX News release, Annual and Quarterly Reports and Investor presentations.

Forward-looking statements are based on assumptions regarding Metallica Minerals Limited ("Metallica") and Melior Resources Inc. ("Melior"), business strategies, plans and objectives of the Company for future operations and development and the environment in which Metallica may operate.

Forward-looking statements are based on current views, expectations and beliefs as at the date they are expressed and which are subject to various risks and uncertainties. Actual results, performance or achievements of Metallica and Melior could be materially different from those expressed in, or implied by, these forward-looking statements. The forward-looking statements contained in this presentation are not guarantees or assurances of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Metallica and Melior, which may cause the actual results, performance or achievements of Metallica and Melior to differ materially from those expressed or implied by the forward-looking statements. For example, the factors that are likely to affect the results of Metallica and Melior include general economic conditions in Australia and globally; ability for Metallica to fund its activities; exchange rates; production levels or rates; demand for Metallica's and Melior's products, competition in the markets in which Metallica and Melior does and will operate; and the inherent regulatory risks in the businesses of Metallica and Melior. Given these uncertainties, readers are cautioned to not place undue reliance on such forward looking statements.

Clear Strategic & Financial Rationale

Merger creates a diversified Queensland mining company with an attractive portfolio capable of delivering shareholder value

1 Enhanced asset portfolio provides growth platform	<ul style="list-style-type: none"> ▶ Creates a scaled company with an attractive portfolio of complementary mineral sands and bauxite projects in Queensland ▶ Well balanced combination of production, development and exploration assets ▶ Provides strong growth platform to deliver shareholder returns
2 Goondicum – imminent & material cashflow	<ul style="list-style-type: none"> ▶ Long life, premium quality ilmenite project fully funded to commercial production ▶ Commissioning commenced and project on track to achieve positive cashflow in Q2 2019 ▶ Expected to generate significant cashflows with average EBITDA of ~\$14 million¹ per annum over 9 year mine life
3 Urquhart Bauxite – development case able to be optimised	<ul style="list-style-type: none"> ▶ Updated PFS completed in September 2018 indicated attributable average EBITDA of ~\$6m per annum over 5.5 year mine life² ▶ Low capex development approach currently being evaluated based on haul road approval (expected shortly) ▶ Significant opportunities available to optimise project configuration to improve margins and take advantage of strong bauxite demand outlook
4 Enhanced market presence and re-rating potential	<ul style="list-style-type: none"> ▶ Significant increase in market scale, strong balance sheet and improved share register enhances investment appeal and capability to fund and deliver project development and associated growth ▶ Attractive value relative to ASX peers with strong re-rating upside likely post merger
5 High quality board & management, and supportive shareholder	<ul style="list-style-type: none"> ▶ Combination of Melior's successful board and management team with Metallica's key board members creates an experienced and complementary team ▶ Supportive major shareholder and funder in Pala with strong success in mineral sands and other natural resource investments

1. Melior Resources Preliminary Economic Assessment (April 2018), Forecast Annualised Cashflows of ~US\$10.8m converted to A\$ at AUD:USD exchange rate of 0.76 (page 248)

2. Based on Metallica Minerals' 50% interest in the Urquhart Bauxite project and results of Updated Pre-Feasibility Study announced 12 September 2018

Merger Details

All scrip merger enables Metallica and Melior shareholders to retain interest in current assets while gaining the significant benefits of the merged group

Structure	<ul style="list-style-type: none"> ▶ Recommended all scrip merger ▶ Metallica to be the parent entity and to maintain ASX listing ▶ Melior shareholders to receive (20) Metallica shares for every (1) Melior share held ▶ Merger to be via a court approved Plan of Arrangement of Melior in British Columbia, Canada
Offer Value¹	<ul style="list-style-type: none"> ▶ Implied Metallica share price of A\$0.045 per share (based on Melior 30-day VWAP at 11 September 2018) ▶ 31.9% premium to Metallica 30-day VWAP on 11 September 2018 (last Metallica trading day before merger announcement)
Board Representation	<ul style="list-style-type: none"> ▶ Equal representation, with three representatives from Metallica and Melior respectively
Relative Ownership	<ul style="list-style-type: none"> ▶ Metallica shareholders will own approximately 36% of merged group ▶ Melior shareholders will own approximately 64% of merged group
Shareholder Approvals	<ul style="list-style-type: none"> ▶ Both Metallica and Melior to obtain shareholder approval for merger
Conditions	<ul style="list-style-type: none"> ▶ Receipt of all regulatory, shareholder and other approvals ▶ Independent Expert concluding that the merger is reasonable for Metallica shareholders ▶ Other customary conditions

Source: IRESS, Bloomberg

1. Based on Melior Resources and Metallica Mineral's trading data as of 11 September 2018 (last Metallica trading day before merger announcement) – Melior Resources share price of A\$0.9044, Metallica Minerals 30-day VWAP of A\$0.03429 and implied Metallica share price of \$0.04522 (\$0.9044 divided by 20 equals \$0.04522), Premium calculated as (\$0.04522 / \$0.03429 minus 1) equaling 31.9%

Overview of Merged Group

Complementary combination of production, development and exploration assets in Queensland

Production – Melior

- Goondicum Ilmenite Project (100%)
- Ilmenite production of 160-200kt per annum
- Average EBITDA of ~\$14 million per annum
- 9 year mine life
- Mine production extension and expansion upside

Development – Metallica

- Urquhart Bauxite Project (50%)
- Annual DSO bauxite production of 1.5Mt per annum
- Average attributable EBITDA of ~\$6 million per annum
- 5.5 year mine life
- Mine life extension via screening lower grade material

Exploration – Melior & Metallica

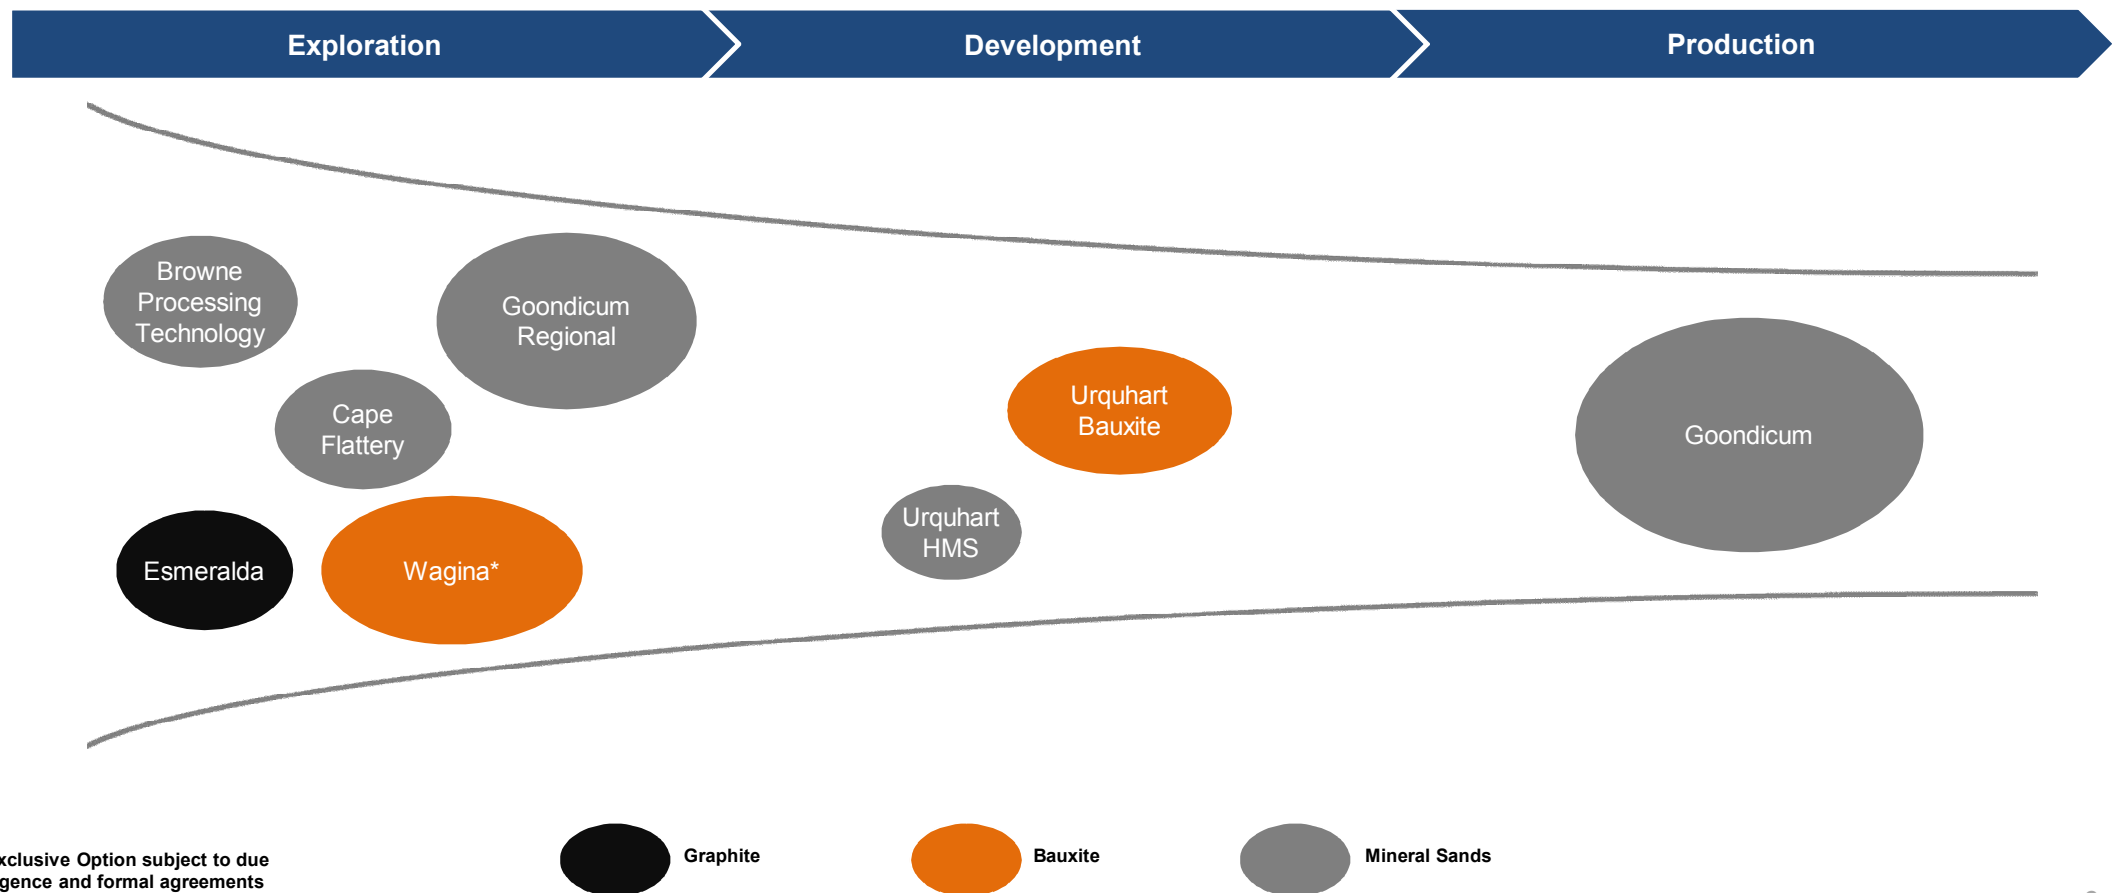

- Goondicum Regional (100%)
- Urquhart Point HMS & Bauxite Project (50%)
- Cape Flattery Silica Sand Project (100%)
- Esmeralda Graphite Project (100%)
- Browne Processing Technology (100%)

Attractive Portfolio & Strong Growth Pipeline

Well balanced portfolio and strong pipeline provides platform for growth and shareholder returns

High Quality Board & Management

Board will consist of an experienced team with complementary expertise and proven track records

George Lloyd <i>Chairman</i>	<ul style="list-style-type: none"> ▶ Significant corporate finance and board experience in natural resources and engineering services ▶ Currently non-executive Chairman of Ausenco ▶ Former non-executive director of Metro Mining and senior executive at RGC Limited (which merged with Westralian Sands to form Iluka in 1998)
Simon Slesarewich <i>Managing Director</i>	<ul style="list-style-type: none"> ▶ Mining engineer with over 20 years' experience across a range of operational and executive roles within mining and contracting sectors ▶ Currently a Director of the Queensland Resources Council (QRC) and Chairman of the QRC Exploration and Tenure committee ▶ Formerly CEO of Northern Discovery and Boardwalk Resources
Mark McCauley <i>Executive Director</i>	<ul style="list-style-type: none"> ▶ Substantial mining experience, both technical and financial, and has been involved in the development of several major mining projects ▶ Previously CFO of ASX listed Felix Resources during period where company grew from market capitalisation of \$35 million to over \$1 billion ▶ Managed Beldridge Enterprises Pty Ltd, the former owner of the Goondicum Project
Martyn Buttenshaw <i>Director</i>	<ul style="list-style-type: none"> ▶ Currently an advisor to Pala Investments Limited and director of Melior Resources and Kasbah Resources with significant mining experience ▶ Previously a director of Asian Mineral Resources and Sierra Rutile Ltd ▶ MBA from the London Business School and Mining Engineering from the Royal School of Mines, Imperial College, London
Peter Turnbull <i>Director</i>	<ul style="list-style-type: none"> ▶ Significant board experience across natural resources having held senior executive roles in publicly listed, private and government owned organisations ▶ Previously held executive roles at Newcrest Mining, BTR Nylex and Energex Limited, a major government owned energy company and a former director of corporate finance for the Securities and Futures Commission of Hong Kong ▶ Currently a non-executive director of Karoon Gas Australia and Chairman of Calix Limited
Ian Jacobson <i>Director</i>	<ul style="list-style-type: none"> ▶ 40 years' experience in aluminium industry with senior executive roles in operations and project development with Rio Tinto/Comalco, Alcoa and BHP ▶ Co-founder and the current Executive Chairman of SCCR Group providing a range of consulting services to the primary aluminium industry

Clear Benefits to Shareholders

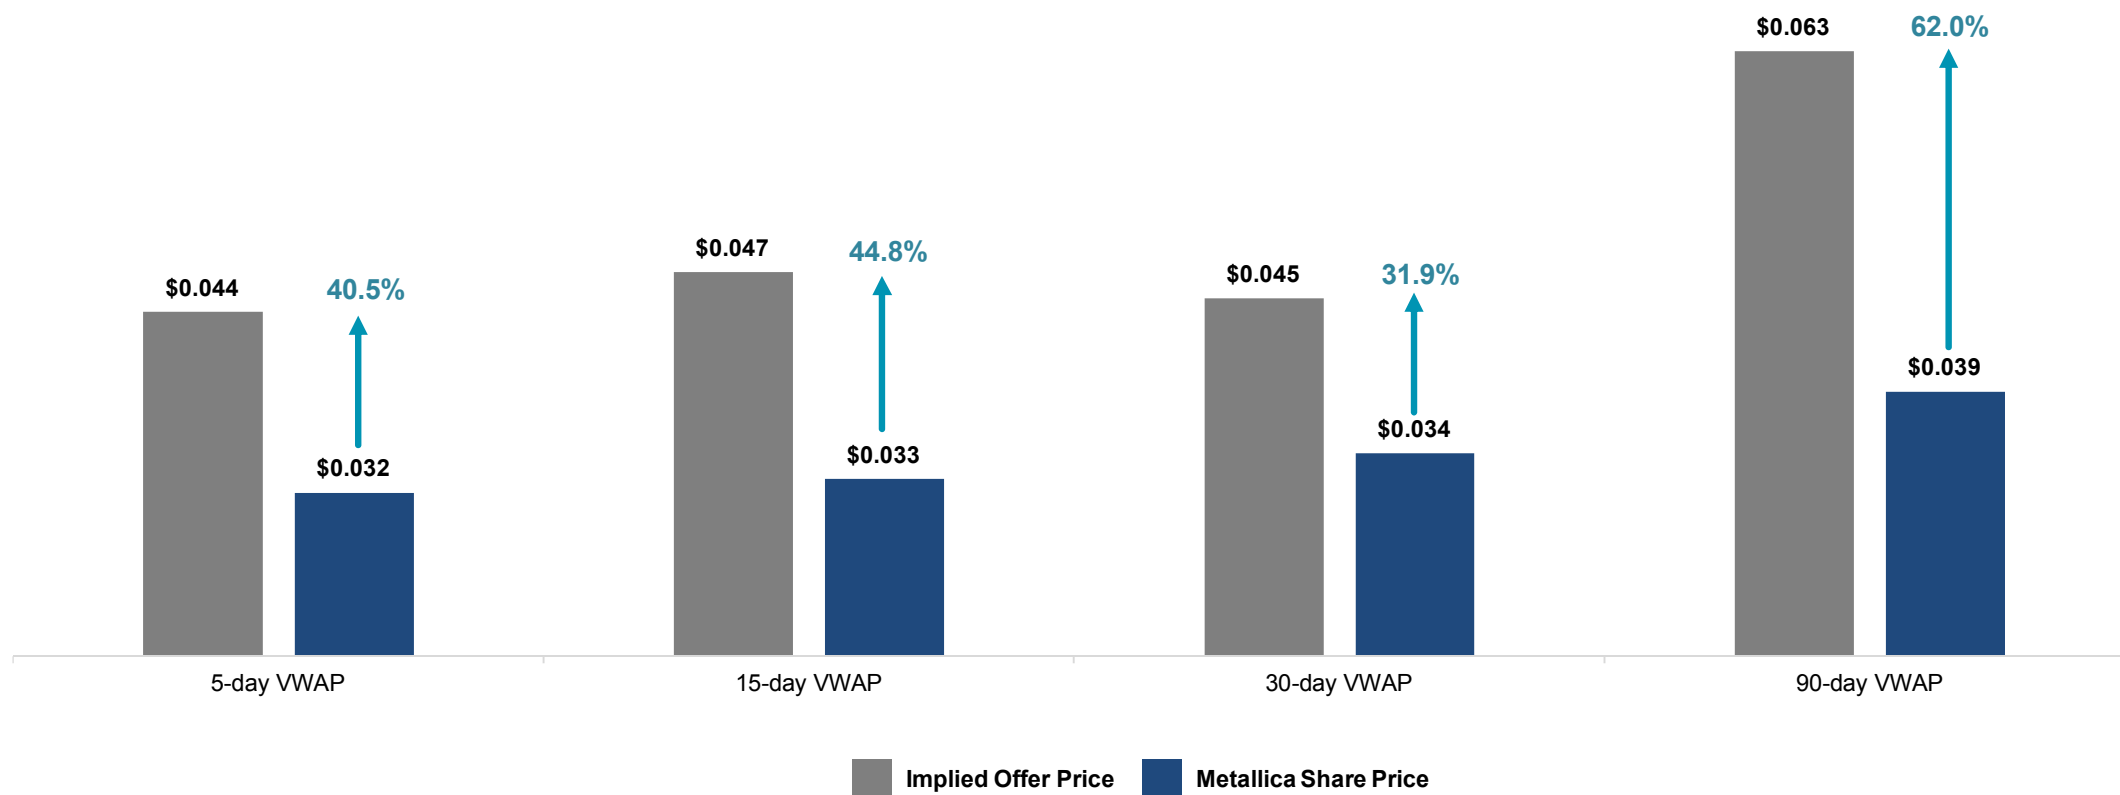

The Boards of Metallica and Melior believe there are significant benefits to both sets of shareholders

Benefits for Metallica Shareholders	Benefits for Melior Shareholders
<ul style="list-style-type: none"> ✓ Immediate and material increase in value through an attractive premium to recent trading (refer slide 8) ✓ Exposure to production and cashflow from Goondicum with significant exploration upside already identified ✓ Access to Melior's high quality board and management team, with track record of delivering value to shareholders ✓ Ability to optimise Urquhart Bauxite development and reduce risks ✓ Continuing material interest in the future upside in Metallica portfolio ✓ Benefits of diversification and lower investment risk ✓ New, supportive major shareholder and funder 	<ul style="list-style-type: none"> ✓ Achieve ASX listing and benefit of enhanced investor appetite and favourable peer comparisons ✓ Provides diversification via exposure to Urquhart Bauxite project and portfolio of exploration assets located in Queensland ✓ Opportunity to create value by leveraging Melior's development, operational and financing strengths ✓ Continued focus on core competencies, being development of profitable industrial minerals and strategic commodity products ✓ Ability to amortise corporate costs across broader asset base ✓ Enhanced production growth profile following development of Urquhart Bauxite
Benefits for All Shareholders	
<ul style="list-style-type: none"> ✓ Participation in the future growth of the merged group's complementary portfolio of production, development and exploration assets ✓ Delivers an immediate growth story and diversifies single project risk ✓ Increased liquidity and scale of merged group – enhanced access to both equity and debt markets to fund current and future growth opportunities ✓ Greater market scale, relevance and liquidity – Melior's strong institutional shareholder base well balanced by Metallica's retail shareholders ✓ Enhanced market scale and strong combined balance sheet strengthens future growth prospects and supports re-rating of merged group 	

Merger Premiums

The merger implies premiums of 40% to 62% for Metallica shareholders

Source: IRESS, Bloomberg

1. Based on Melior Resources and Metallica Minerals trading data (to 4 decimal point) as of 11 September 2018 (last Metallica trading day before merger announcement), Melior Resources' implied Metallica Minerals share price is calculated as the Melior Resources' share price on the date (5), (15), (30) and (90) days prior to last Metallica trading day before merger announcement (11 September 2018), converted to AUD at AUD:CAD exchange rate, divided by the exchange ratio of (20) Metallica Minerals shares for every (1) Melior Resources shares

Goondicum – Attractive Near Term Production

Low capital project set to generate robust and material cashflows

Attractive Project	<ul style="list-style-type: none"> ▶ Large ilmenite-rich resource from surface with zero strip ratio ▶ Simple surface mining and conventional processing ▶ Past capital investment (~US\$120m) and operations provide significant infrastructure and financial and operating advantages
Favourable Economics¹	<ul style="list-style-type: none"> ▶ Low capex of US\$7.0m for funding restart and project enhancements based on past operating knowledge² ▶ Premium sulfate ilmenite product attracting top tier pricing and valuable phos rock (apatite) co-product ▶ Long term TZMI Goondicum ilmenite price forecast of US\$204/t FOB vs. LOM all-in opex of approximately US\$124/t FOB after apatite credits
Imminent & Long Life Production	<ul style="list-style-type: none"> ▶ Commissioning underway and positive cashflow on track for Q2 2019 ▶ Annual production of 160kt of ilmenite and 40kt of apatite per annum ▶ Average LOM EBITDA of approximately \$14 million per annum³ ▶ Mine life of approximately 9 years
Leading Off-take Partners	<ul style="list-style-type: none"> ▶ 600,000 tonne offtake agreement with Hainan Wensheng High Tech, a leading Chinese producer of zircon, ilmenite and rutile products – includes option to extend offtake for additional 5 year period⁴ ▶ Life of mine off-take signed with leading domestic agriproducts manufacturer, SOFT Agriculture, for phos rock⁵
Significant Exploration Upside	<ul style="list-style-type: none"> ▶ Mining lease occupies only 20% of 'Goondicum Crater' ▶ Exploration licenses encompasses 28 km² ▶ Crater demonstrates consistent geology and mineralisation, providing strong potential to expand production and/or extend mine life
IP Development Upside⁶	<ul style="list-style-type: none"> ▶ Proprietary Browne Processing Technology being developed in partnership with CSIRO ▶ Process upgrades TiO₂ content of standard sulphate ilmenite from approximately 50% TiO₂ up to +80% TiO₂ at a lower temperature than conventional slagging reducing capital costs and power requirements

1. Melior Resources TSXV announcement dated 20 April 2018 – Melior Announces Updated NI43-101 Resource Report and Preliminary Economic Assessment for the Goondicum Project

2. Capital expenditure includes re-start capital only and excludes life of mine sustaining capital of \$16 million

3. Melior Resources Preliminary Economic Assessment (April 2018), Forecast Annualised Cashflows of US\$10.8m average LOM converted to AUD at AUD:USD exchange rate of 0.76 (page 248)

4. Melior Resources TSXV announcement dated 10 April 2018 – Melior Takes Key Step Towards Restart of Production and Signs \$12.25 Million in Debt Facilities and 600,000 Tonne Ilmenite Offtake

5. Melior Resources TSXV announcement dated 8 November 2017 – Melior Signs 10-Year Fertiliser Off-Take Agreement with Soft Agriculture

6. Melior Resources TSXV announcement dated 22 February 2018 – Melior Engages Leading Scientific Agency CSIRO to Advance its Browne Technology

Positive Ilmenite Price Dynamic & Outlook

Supply side tightness and Chinese environmental controls provides positive price and demand outlook

TiO₂ Feedstock Demand and Supply Dynamics

Demand

- ▶ Global market of ~7.3m TiO₂ units, expected to grow at 2.3% CAGR
- ▶ Historically demand growth correlated with global GDP growth
- ▶ Pigment output growth led by the chloride process, which will require an increase in chloride slag
- ▶ Increased demand for chloride slag and chloride pigment production is expected in China, due to tighter environmental controls

Positive Ilmenite Pricing Outlook

Supply

- ▶ Supply is expected to remain relatively flat in the short to medium term, followed by a declining profile if no new supply is brought online
- ▶ Net sulphate ilmenite is expected to decline without further investment, as more product is utilised to produce chloride slag

Pricing

- ▶ Supply tightness is expected to lead to price appreciation in the medium term, as new projects are needed to meet forecast demand profile

Based on TZMI 2018 Research Estimates

Urquhart Bauxite – Complementary Development

Low capex PFS completed with ability to optimise project to take advantage of rising bauxite demand outlook to enhance robustness and financial returns

Attractive Location & Project Features	<ul style="list-style-type: none"> ▶ Well located just five kilometres southwest of Weipa on Queensland's Cape York ▶ Globally recognised and well known product brand ▶ Shallow orebody amenable to free dig mining and DSO exports with low strip ratio ▶ Favourably located on Embley River which is currently used for transhipment operations
PFS Completed¹	<ul style="list-style-type: none"> ▶ Base case based on current reserves of 6.5Mt (with 3.25Mt attributable based on 50% ownership interest) ▶ Simple contract mining, haulage and transhipment operation ▶ Low capex development approach with construction of 15km haul road to connect project to existing barge load facility at Hey Point ▶ 5.5 year operation with maximum targeted annual production of ~1.5Mtpa (100% basis) ▶ Estimated LOM capex of approximately \$2m (100% basis)
Sales Strategy	<ul style="list-style-type: none"> ▶ Product ideally suited to Chinese seaborne bauxite market and remains 100% unencumbered ▶ Joint off-take and sales strategy being progressed by marketing specialist
Haul Road Approval Progressing²	<ul style="list-style-type: none"> ▶ Haul road permit pending approval from third party and Queensland government ▶ Positive progress being made with highest levels of the Queensland government engaged and senior government officials assisting
Ability to Optimise	<ul style="list-style-type: none"> ▶ 8.5Mt of lower grade transitional material to be beneficiated through dry screening to extend mine life ▶ Potential to optimise JV to unlock further project value by consolidating ownership and improving operations to enhance project robustness and increase financial returns ▶ Ability to access Melior's tax losses of \$26m to provide tax shield to enhance cashflows and post tax returns

1. Metallica Minerals 15km haul road to connect project to port infrastructure at Hey Point remains outstanding – refer to discussion in Metallica Minerals' 2018 Annual Report dated 11 October 2018

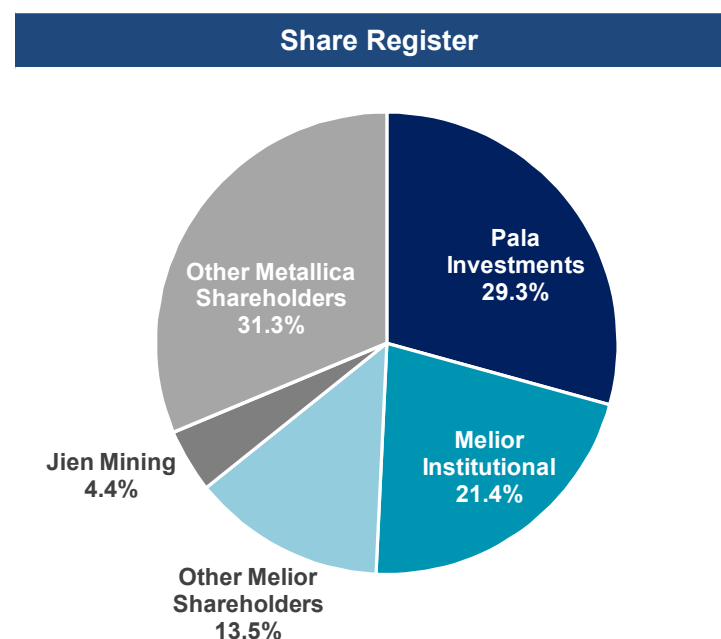

2. Metallica Minerals' ASX Announcement dated 12 September 2018 – Updated Pre-Feasibility Study

Merged Company – Overview

Attractive capital structure and well balanced register with supportive major shareholder in Pala which has a successful track record in minerals sands and other natural resource investments

Capital Structure	
Shares Outstanding ¹	902.0m
Share Price ²	\$0.03
Market Capitalisation	\$27.1m
Cash ³	\$10.4m
Debt ⁴	\$18.3m
Net Debt	\$7.9m
Enterprise Value	\$34.9m

1. Metallica Minerals shares outstanding – 322,447,408, Melior Resources' shares outstanding – 28,979,963. At an exchange ratio of (20) Metallica Minerals shares for (1) Melior Resources' shares, Melior Resources' shareholders will receive 579,599,260 Metallica Minerals shares as part of merger. The combined shares on issue following merger will equal 902,046,668
2. Metallica Minerals' last traded share price – \$0.03 (6 November 2018)
3. Cash consists of Melior Resources' cash balance of US\$2.5m (converted at AUD:USD of 0.71) and Metallica Minerals' cash balance of \$6.1m cash and \$0.8m in AUZ shares (Metallica Minerals holds approximately 16.8m AUZ shares @ \$0.049 per share)
4. Based on Melior Resources' debt of ~US\$13m as of 6 November 2018 (converted at AUD:USD of 0.71)

Merged Company – Attractive Value Proposition

Melior and the merged company provides attractive value relative to ASX mineral sands development peers with strong re-rating upside post merger

Goondicum Mineral Resource Estimates based on Melior Resources Preliminary Economic Assessment April 2018) (NI43-101)

Exploration Upside

- Mining lease occupies only 20% of Goondicum crater
- Exploration licenses encompass 28 km²
- Area demonstrates consistent geology and mineralisation
- Further exploration required with key targets identified

Urquhart Bauxite Project Overview

Well located with potential for attractive cashflows and financial returns

Urquhart Bauxite Project Overview ¹	
Ownership	50%
Mineral Resource	9.5Mt @ 52.8 Al ₂ O ₃ & 13.7% SiO ₂
Mineral Reserve	6.5Mt @ 52.7 Al ₂ O ₃ & 13.3% SiO ₂
Project Status	Fully permitted pending Haul Road approval
Capital Expenditure	~\$1.1 million
Production Commences	3-6 weeks following decision to mine
Life of Mine	5.5 years
Production LOM (50%)	3,266kt
Annual Production (100%)	1.5Mtpa
Revenue LOM (50%)	\$195 million
EBITDA LOM (50%)	\$34.4 million
Price Forecast	59.62/t CFR
Operating Cost	49.08/t CFR
Cash Margin	\$10.5/t

1. Refer to Metallica Minerals Updated PFS-Urquhart Bauxite Project released on ASX 12 September 2018

Urquhart Bauxite Reserves & Resources

Beneficiation of 8.5Mt low grade material to expand mine life optimising existing Reserves & Resources

Urquhart Bauxite Mineral Resource Estimate (100%)						
Classification	Area	Mt	Al ₂ O ₃ (%)	SiO ₂ (%)	AAI (%)*	RSi (%)**
Measured	A	3.0	54.4	11.8	43.2	5.0
Indicated	A	3.9	53.3	13.1	40.8	5.2
Inferred	A	0.3	54.2	11.3	42.0	4.7
Inferred	B	2.3	49.9	17.4	37.2	6.0
Inferred	Sub-total	2.6	50.3	16.8	37.6	5.9
Total		9.5	52.8	13.7	40.7	5.3

*AAI – Available alumina @ 150°C

**RSi – Reactive silica @ 150°C

Metallica Minerals ASX Announcements dated 14 November 2016 – Significant Increase to Mineral Resource at Urquhart Bauxite

Urquhart Bauxite Mineral Reserve Estimate (100%)						
Classification	Area	Mt	Al ₂ O ₃ (%)	SiO ₂ (%)	THA (%)	RSi (%)**
Proved	A	2.964	53.7	12.3	42.3	5.4
Probable	A	3.568	51.9	14.2	39.1	5.9
Ore Reserve	A	6.532	52.7	13.3	40.6	5.7

Other Assets

Assets	Commodity	Comments
Urquhart Point HMS (50% owned)	Mineral Sands	<ul style="list-style-type: none"> Consists of the Urquhart Point heavy mineral sands (HMS) project Located south of Weipa on the western side of Cape York Peninsular in North Queensland The HMS project is small scale and has an unused 120tph mobile HMS processing plant Additional work to be undertaken in the short term to assess the optimal means of creating value
Cape Flattery Silica Sand Project (100% owned)	Mineral Sands	<ul style="list-style-type: none"> Exploration permit adjacent to Mitsubishi's Cape Flattery Mine, the world's largest source of high purity silica sand A maiden sampling program was completed in April 2018 and confirmed the presence of high purity silica sand Remains an early stage exploration project with further work required to assess economic potential
Esmeralda Graphite Project (100% owned)	Graphite	<ul style="list-style-type: none"> Located in North Queensland and is an igneous or hydrothermal style graphite deposit Two drill holes previously intersected broad graphite mineralisation up to 95m thick at a depth of just over 70m Remains an early stage exploration project with further work required to build resource base and assess its economic merits
Goondicum Regional (100% owned)	Mineral Sands (Ilmenite & Apatite)	<ul style="list-style-type: none"> The current mining lease only covers 20% of Goondicum crater, with the remaining Goondicum Crater area secured with an existing Mineral Development License application (approximately 28km²) Additional areas for exploration within the Goondicum Crater have been identified providing significant resource upside
Wagina Bauxite Project	Bauxite	<ul style="list-style-type: none"> Entered \$190,000, 12 month loan agreement with South West Pacific Bauxite (75% owner of Wagina Project) to secure option to carry out exclusive due diligence on Wagina Project – due diligence continuing currently Wagina discovered by Rio Tinto with studies indicating a mining operation producing 2-3Mtpa of bauxite for ~10 years is feasible with bauxite located at or near surface
Browne Processing Technology¹	Ilmenite Processing Technology	<ul style="list-style-type: none"> Partnership with the CSIRO developing processing technique which upgrades the TiO₂ content of standard sulphate ilmenite from approximately 50% TiO₂ up to +80% TiO₂ at lower temperatures compared to conventional slagging processes The lower temperature process has potential to significantly reduce the capital costs, energy consumption, and operational complexity compared with conventional slagging facilities

1. Melior Resources TSXV announcement dated 22 February 2018 – Melior Engages Leading Scientific Agency CSIRO to Advance its Browne Technology

Pala Overview

Strong track record of investing and financing mining investments from development into production, with significant experience and success in minerals sands

Overview

- ▶ Founded in 2006, Pala is a mining and natural resources focused private equity firm based in Zug, Switzerland
- ▶ Pala invests in development and production stage mining companies, as well as products and services that serve the mining sector
- ▶ Pala is flexible in its investment approach, investing in equity, debt structures, convertibles, and product streams globally
- ▶ Pala has a strong track record of successful investment across a diverse range of hard mineral commodities including base metals, precious metals, coal, uranium, coal-bed methane and industrial minerals
- ▶ Pala has invested in over 90 companies in 25 countries across six continents
- ▶ Employs ~20 people with both commercial and technical experience in the mining industry
- ▶ Recent investments include:
 - A\$2 million loan to Kasbah Resources to complete DFS on its Achmmach Tin Project (May 2018)
 - A\$50 million senior secured loan to Image Resources to fund construction and commissioning of its Boonanarring Mineral Sands Project¹ (March 2018)
 - A\$4 million 18-month convertible term debt facility with RNC Minerals to fund ramp-up of its Beta Hunt gold mine (September 2017)

Selection of Investments & Financings (Current & Exited)

Refer to Pala Investments Limited website and Pala Corporate Presentation October 2018 (<http://www.pala.com/en/news.html>)

1. Pala contributed 38.5% towards the \$50 million senior secured loan – Castlake L.P contributed the remaining 61.5%
