Xref Ranks 22nd in List of Top 50 Australian Tech Companies

Xref Limited (ASX: XF1), the human resources technology company, is thrilled to have appeared at number 22 in the list of top 50 fastest growing Australian technology companies, during last week's [Deloitte Technology Fast 50 Awards](#).

Inclusion on this list is an instant mark of success since only those with minimum cumulative revenues of \$8 million, from the previous three years, are eligible to apply. Achieving a place in the top half of the winning cohort is testament to the significant growth Xref has been able to achieve during that time.

Executive Director, CEO Lee-Martin Seymour, said: *"These awards recognise Australia's greatest technology success stories and we couldn't be more delighted to be included. Needless to say, we could not achieve results like this without the dedication, heart and pioneering attitude of our team. We are extremely grateful and proud to have such an incredible group of people on this journey with us."*

Executive Director, CTO, Tim Griffiths, said: *"We are in fantastic company on this list and are humbled to have appeared alongside some inspirational, best-of-breed technology providers. As we continue to evolve the platform, expand the team and increase the range of services we're offering clients, it's accolades like this that bring our growth to life."*

Xref's software as a service (SaaS) platform collects 60% more data, five times faster than traditional methods and, by automating a vital task, protects companies from fraud, discrimination and privacy breaches.
