

ASX Announcement

Material contract and first multi-site win

15 January 2018

Highlights

- First multi-site win for the Group
- UK water utility Southern Water implements Envirosuite at 3 sites
- Adds \$220,000 (AUD equivalent) to the Group's Annual Recurring Revenue (ARR)
- Envirosuite aiming to become the default solution provider to wastewater treatment operators in the UK

Envirosuite Limited (the "Company" or "Group") is pleased to announce another material contract win in the UK Wastewater sector where Envirosuite is already in use at seven other sites operated by three other water utilities.

Southern Water is a private water utility company responsible for public wastewater collection and treatment in Hampshire, the Isle of Wight, West Sussex, East Sussex and Kent, as well as being the major operator in the public water supply and distribution in those regions.

Following a four-month commercial trial Southern Water has elected to move directly to a multi-site rollout across three wastewater facilities.

Jason Aldred, Head of Waste Recycling and Energy Production at Southern Water said:

"We are very pleased to be adopting the Envirosuite platform to assist us in efficiently managing our relationships with our local communities and to benefit from the proactive management of potential issues that the platform provides."

Envirosuite Limited, Chief Executive Officer, Peter White said,

"We welcome Southern Water to the growing number of water utility clients in the UK now using the Envirosuite platform. It is a very significant step in our growth as a Company and industry recognition of our world-leading platform to move from site-by-site sales to multi-site implementations."

In accordance with ASX GN8 for LRs 3.1-3.1B, the Company further advises that the contract is on standard terms and that there are no other material conditions to be satisfied.
