Notes to the Financial Statements

1. Summary of Significant Accounting Policies

The principal accounting policies adopted in the preparation of the half year financial statements are set out below.

The condensed interim financial statements were authorised for issue on 29 January 2019 by the Board of Directors.

Basis of Preparation

The half year financial statements are general purpose financial statements for the half year ended 31 December 2018 and have been prepared in accordance with the requirements of the *Corporations Act 2001* and *AASB 134 Interim Financial Reporting*.

The Company is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

The report does not include full disclosures of the type normally included in an annual financial report. It is recommended that this half year Financial Report is to be read in conjunction with the Annual Financial Report for the year ended 30 June 2018 and any public announcements made by the Company during the half year in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

The half year financial statements have been prepared on an accruals basis, and are based on historical costs, except for the revaluation of certain non-current assets and financial instruments which are carried at their fair values. Cost is based on the fair values of the consideration given in exchange for assets.

In accordance with ASIC Corporations (rounding in Financial Reports) instrument 2016/191, the amounts in the Financial Report have been rounded to the nearest dollar.

(a) Accounting Policies

In accordance with its application requirements, the Company adopted AASB 9 from 1 July 2018. All of the Company's investments in financial assets continued to be accounted for at fair value through profit or loss under AASB 9. Accordingly, first time application of AASB 9 had no impact on the Company's accounting for its investments in financial assets. On initial application of AASB 9, the Company also adopted the expected credit loss impairment model. The adoption had no material impact on the carrying amounts of the Company's receivables.

The Statement of Financial Position is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current.

2. Dividends

No dividends were declared during the period ended 31 December 2018.

In accordance with the Investment Management Agreement, the Investment Manager will reinvest all of their after-tax proceeds from any performance fees via a share purchase mechanism. In August 2018, 2,361,065 shares were issued to the owners of the Manager under this mechanism in respect of the performance fees incurred by the Company during the reporting period.

(b) Comparatives

As noted in the 30 June 2018 annual report, under the Investment Management Agreement, the Company will not pay any management fees that would otherwise have been payable to the Manager until such time as all of the Company's offer costs have been recouped. These offer costs of \$10,012,057 (net of tax) had initially been recognised in equity as Capitalised Costs of the Offer in the comparative period. Given these costs will be recouped, the Board assessed that the offer costs should be taken to the Statement of Profit or Loss and Other Comprehensive Income as Offer Costs Expense, which offsets Receivable Income to result in a reported outcome more representative of the economic substance of the arrangement of nil Receivable Income on the Statement of Profit or Loss and Other Comprehensive Income. The comparative balances are consistent with the treatment in the 30 June 2018 Annual Report.

5. Financial Instruments Measured at Fair Value

AASB 13: Fair Value measurement requires the disclosure of fair value information using a fair value hierarchy reflecting the significance of the inputs in making the measurements. The fair value hierarchy consists of the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (i.e. derived from prices).
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table presents the Company's financial assets and liabilities measured and recognised at fair value as at 31 December 2018.

	Number of Shares	Number of Shares
Weighted average number of ordinary shares outstanding during the period used in calculating basic and diluted earnings per share	276,870,731	129,490,292

- (A) The weighted average number of shares used as the denominator in calculating basic and diluted earnings per share is based on the average number of shares from 30 June 2018 to 31 December 2018.
- (B) The prior period earnings per share of 2.9 cents would have been 1.37 cents per share if calculated from 25 September 2017, being the allotment date, as the Company only had one share on issue and no earnings up to this date.

7. Subsequent Events

There has not been any matter or circumstance, other than that referred to in the financial statements or notes thereto, that has arisen since the end of the reporting period, that has significantly affected, or may significantly affect, the operations of the Company, the results of those operations, or the state of affairs of the Company in future financial years.

8. Capital Commitments and Contingent Liabilities

There are no contingent liabilities or contingent assets at 31 December 2018.

9. Segment Information

The Company has only one reportable segment. The Company is engaged solely in investment activities, deriving revenue from dividend income, interest income and from the sale of its investments.
