NOTE 1: SIGNIFICANT ACCOUNTING POLICIES

Except as described below, the accounting policies applied by the Consolidated Entity in this Consolidated Interim Financial Report are the same as those applied by the Consolidated Entity in the Consolidated Annual Financial Report as at and for the year ended 30 June 2018. NOTE 6: CONTINGENT LIABILITIES AND COMMITMENTS

There has been no change in contingent liabilities and commitments since the last annual reporting date.

NOTE 7: EVENTS SUBSEQUENT TO REPORTING DATE

Since the end of the financial period, the directors are not aware of any matter that has significantly affected or may significantly affect the operations of the Company in subsequent financial periods.

NOTE 8: FAIR VALUE MEASUREMENT

The Consolidated Entity measures and recognises the following assets and liabilities at fair value on a recurring basis after initial recognition:

- available-for-sale financial assets; and
- freehold properties.

Valuation techniques

The Consolidated Entity selects a valuation technique that is appropriate in the circumstances and for which sufficient data is available to measure fair value. The availability of sufficient and relevant data primarily depends on the specific characteristics of the asset or liability being measured. The valuation techniques selected by the Consolidated Entity are consistent with one or more of the following valuation approaches:

- Market approach: valuation techniques that use prices and other relevant information generated by market transactions for identical or similar assets or liabilities.
- Income approach: valuation techniques that convert estimated future cash flows or income and expenses into a single discounted present value.
- Cost approach: valuation techniques that reflect the current replacement cost of an asset at its current service capacity.

Each valuation technique requires inputs that reflect the assumptions that buyers and sellers would use when pricing the asset or liability, including assumptions about risks. When selecting a valuation technique, the Consolidated Entity gives priority to those techniques that maximise the use of observable inputs and minimise the use of unobservable inputs. Inputs that are developed using market data (such as publicly available information on actual transactions) and reflect the assumptions that buyers and sellers would generally use when pricing the asset or liability are considered observable, whereas inputs for which market data is not available and therefore are developed using the best information available about such assumptions are considered unobservable.

The following tables provide the fair values of the Consolidated Entity's assets and liabilities measured and recognised on a recurring basis after initial recognition and their categorisation within the fair value hierarchy:

Fair Value Measurement

	Level	31 December 2018	30 June 2018

NOTE 8: FAIR VALUE MEASUREMENT (cont'd)

Freehold Properties	27,227,510	Income Approach using discounted cashflow methodology and capitalisation approach.	Adopted capitalisation rate Adopted terminal yield Adopted discount rate	8.00% - 8.50% 8.50% 10.25%	A significant increase or decrease in the adjustment would result in a significantly lower (higher) fair value.	A significant increase or decrease in the adjustment would result in a significantly lower/higher fair value.

Valuation process

The Board reviews the freehold property valuation process on a semi-annual basis. All valuations are performed either by independent professionally qualified external valuers.

If the external valuation is more than three years old then the property is externally valued. For those with an external valuation less than three years old an assessment is made as to which properties are likely to have had material movements in the book value reported at the last reporting period to determine whether they should be revalued externally. At each reporting date the management will perform initial desktop assessment of current value through a capitalisation of income and discounted cashflow approach. If the result is materially different external independent valuation is conducted.

Non-derivative financial assets and liabilities

The fair value of cash, receivables, payables and short-term borrowings is considered to approximate their carrying amount because of their short maturity. The directors consider the carrying amount of the investments and long-term borrowings in the financial statement approximated their fair value.
