

## MONTHLY INVESTMENT REPORT – AS OF 28 FEBRUARY 2019

### COMMENTARY

#### Market Review

U.S. and China trade talks continue to dominate the headline news. Trade tensions appeared to improve as President Donald Trump delayed the 25% tariffs scheduled on \$200bn in Chinese imports. Fourth quarter 2018 earnings results in the U.S. have been broadly positive, suggesting underlying company fundamentals remain healthy. The U.S. economy continues to demonstrate solid growth and is providing a supportive environment for global markets. In Europe, the uncertainty surrounding Brexit continues to weigh on market sentiment with a critical U.K. Parliament vote expected in mid-March and Brexit day on 29 March drawing ever closer.

Against this backdrop, the global high yield market has continued to post positive returns, with the ICE BofAML Global High Yield Index (AUD-hedged) gaining 1.7% during the month.

#### NBI Review

NBI recorded a positive return of 1.94% in February. Since its inception, NBI has experienced no defaults in its portfolio and invested in a diversified portfolio of corporate bonds issued by large, liquid global companies.

For February, NBI announced a monthly distribution of 0.875 cents per Unit, which keeps it firmly on track to achieving its Target Distribution<sup>1</sup> of 5.25% per annum (net of fees and expenses) and maintains its objective of distributing reliable and consistent income.

#### Market Outlook

We believe fundamentals and valuations should offset the impact of a soft landing. Economic growth is expected to slow, but we believe the probability of a near-term recession remains low. Operating performance of underlying issuers has been stable; revenue and EBITDA growth remain in positive territory; leverage continues to decline; and, refinancing activity has significantly reduced the volume of bonds maturing in the near term. We believe NBI is well-positioned to provide downside protection should market volatility persist, while taking advantage of future opportunities to invest in lower quality securities.

- The Target Distribution is only a target and may not be achieved. Actual distributions will be monitored against the Target Distribution. The Target Distribution will be formally reviewed at least annually (as at the end of each financial year) and any reduction in Target Distribution will be notified by way of ASX announcement as required. Investors should review the "Risk Factors" set out in Section 8 of the PDS.
- Performance is calculated net of management costs, which includes the Responsible Entity fee, the Management fee, the Administration fee, along with custodian, audit and legal fees and other transactional and operational costs. Investors should review NBI's Product Disclosure Statement ("PDS") for full details of NBI, including, in particular, the "Fees and Other Costs" section of the PDS.
- Listing Date: 26 September 2018. Performance less than 1 year is not annualized.

## ENVIRONMENTAL, SOCIAL AND GOVERNANCE

- Since our inception in 1939, Neuberger Berman has remained singularly focused on delivering attractive investment results for our clients over the long term.
- The firm has considered ESG characteristics in investment processes as far back as the 1940s for avoidance screens and 1989 for integration into fundamental research in U.S. equities.
- Neuberger Berman has been a signatory in different initiatives worldwide such as UN-backed Principles for Responsible Investment (PRI) since 2012 and has been awarded top scores in the most recent assessment report of ESG integration efforts as of year-end 2017<sup>9</sup>.
- Investors should review the PDS for full details of NBI, including, in particular, the "Overview of the Investment Strategy" section of the PDS.
- For more information, please visit [www.nb.com/esg](http://www.nb.com/esg)

- Credit quality ratings are based on the Bank of America ("BoFA") Merrill Lynch Master High Yield Index composite ratings. The BoFA Merrill Lynch composite ratings are updated once a month on the last calendar day of the month based on information available up to and including the third business day prior to the last business day of the month. The BoFA Merrill Lynch composite rating algorithm is based on an average of the ratings of three agencies (to the extent rated). Generally the composite is based on an average of Moody's, S&P and Fitch. For holdings that are unrated by the BoFA Merrill Lynch Index composite, credit quality ratings are based on S&P's rating. Holdings that are unrated by S&P may be assigned an equivalent rating by the investment manager. No NRSO has been involved with the calculation of credit quality and the ratings of underlying portfolio holdings should not be viewed as a rating of the portfolio itself. Portfolio holdings, underlying ratings of holdings and credit quality composition may change materially over time.
- Total Return is calculated based on the pre-distribution month end NTA and assumes all distributions are reinvested.
- Calculated from the listing date of 26 September 2018 to 31 October 2018.
- The initial target distribution<sup>1</sup> amount per Unit, which will be paid monthly by the Trust, is 5.25% per annum (net of fees and expenses) on the Subscription Price. The most recent distribution is announced, but not yet paid.
- Yield to Worst — The lowest potential annualised total return that can be received on a bond without the issuer defaulting. This can be different from the yield to maturity because it assumes that the issuer will exercise any option it has to "call" the security at the earliest opportunity (to redeem and repay the principal value to an investor early).
- Neuberger Berman is independent of UN PRI.
