Forward-looking statements

The presentation includes certain forward-looking statements. Such forward-looking statements include statements relating to Sundance's strategies and plans and any indication of, and guidance on, future events, future earnings and future financial performance. Forward-looking statements can generally be identified by the use of words such as "expect", "anticipate", "likely", "intend", "should", "could", "may", "predict", "plan", "propose", "will", "believe", "forecast", "estimate", "target", "outlook", "guidance" or similar expressions.

The forward-looking statements in this presentation speak only as at the date of this presentation. Subject to any continuing obligations under applicable law or any relevant ASX listing rules, Sundance disclaims any obligation or undertaking to provide any updates or revisions to any forward-looking statements in this presentation. Any such forward-looking statements involve subjective judgment and analysis and are subject to significant uncertainties, risks and contingencies and other factors, including the risks described in this presentation under "Key risks". Such risks may be outside the control of and/or may be unknown to Sundance and the Sundance Related Persons. Any forward-looking statements included in this presentation, including projections, guidance on future revenues, earnings and estimates, and the future performance of Sundance post Acquisition, are provided as a general guide only. Forward-looking statements are based on assumptions and contingencies which are subject to change without notice. Neither Sundance nor any Sundance Related Person gives any representation, assurance or guarantee that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur. Actual results, performance or achievement may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based.

Not an offer

This presentation is for information purposes only and is not a prospectus, product disclosure statement or other disclosure or offering document under Australian law or any other law. This presentation has not been, nor will it be, lodged with the Australia Securities & Investments Commission.

Each recipient of this presentation should make its own enquiries and investigations regarding all information included in this presentation including the assumptions, uncertainties and contingencies which may affect Sundance's future operations and the values and the impact that future outcomes may have on Sundance.

Proved and probable reserves

Ryder Scott Company, L.P. (Ryder Scott) has prepared an independent estimate of the proved reserves, future production and income attributable to Sundance Energy's leasehold interests in the Eagle Ford shale play in the State of Texas, USA as of 1 January 2019. The Company's reserves at 31 December 2018 were announced and filed with the ASX on 11 and 15 March 2019

The volumes classified as reserves in the Ryder Scott report have been assigned to both oil and gas reserves and represent 100% of the total net proved and probable liquid hydrocarbon and gas reserves of the Assets at the report date (including producing, non-producing and undeveloped). The reserves estimate were prepared in accordance with the classification and reporting requirements of in accordance with SEC guidelines and definitions. The reserves estimates were calculated using a deterministic methodology.

Ryder Scott utilized proprietary data relating to existing production and lease operating costs from the current Asset wells to forecast a future production stream and associated cash flows based on the economic interest of the Company, and the U.S. Securities and Exchange Commission's 12-month average pricing rules, calculated as the unweighted arithmetic mean of spot prices on the first day of the preceding 12 months. This methodology resulted in a WTI Cushing average benchmark oil price of \$65.56/bbl, a Henry Hub average benchmark gas price of \$3.10/mmbtu, realized NGL pricing of ~43% of WTI Cushing average benchmark price. Lease operating expense estimates comprising a fixed and variable component based on historic operating expense reports. The reference point for the volumes produced is at the wellhead.

Qualified Resource Evaluator's Statement

The information in this presentation that relate to petroleum reserves in Eagle Ford leasehold interests held by the vendors and which are subject to the proposed acquisition by Sundance set out in this presentation, is based on, and fairly and accurately represents, in the form and content in which it appears, information and supporting documentation prepared by, or under the supervision of, Mr. Stephen E Gardner, qualified petroleum reserves and resources evaluator. Mr. Gardner is a member of the Society of Petroleum Engineers and the Society of Petroleum Evaluation Engineers, currently serving in the latter organization's Denver Chapter as Chairman. Mr. Gardner has sufficient experience that is relevant to the evaluation and estimation of petroleum reserves to qualify as a Qualified Reserves and Resources Evaluator as defined in the Australian Securities Exchange Listing Rules. Mr. Gardner is not an employee of Sundance or a related party but an employee of Ryder Scott Company, L.P.

Mr. Gardner has consented to the inclusion of Ryder Scott's reserve evaluations effective 1 January 2019 in the form and content in which they appear.

A Leading Pure Play Eagle Ford Producer

Strong Fourth Quarter Results Successfully Conclude Transformational 2018

- Brought 23 new wells online, the majority of which vastly outperformed type curve
- Full year net production of 10,333 boe/d exceeded top end of guidance
- Full year EBITDAX of \$100.1 MM met guidance target
- Development CapEx of \$176.1 MM was at low end of guidance range

2019 Strategic Focus on Operating Within Cash Flow to Deliver Strong Growth

- Strategic commitment to operating within cash flow during 2019
- Flexible development plan achieves cash flow neutrality or free cash flow generation under different price environments, while delivering production and EBITDA growth

High Quality Asset Base Enables Growth Even at Lower Oil Prices

- 52,300 net acres primarily in the Eagle Ford's Oil and Volatile Oil Window
- 429 undrilled Eagle Ford locations represent 17+ years drilling inventory⁽³⁾
- 93.2mmboe of 1P SEC reserves representing \$1,110 MM in PV-10 value
- Deep inventory of wells with full-cycle break even costs of ~\$30.00 per boe allows Sundance to deliver production and EBITDA growth under various oil price scenarios

Strong Balance Sheet and Liquidity Position

- \$47.1 MM of available short term liquidity⁽⁵⁾
- Estimated 4Q18 LQA Debt-to-EBITDA of 1.6x, with significant deleveraging in 2019
- Robust hedge book covers price protection for ~6,600 bopd of crude at ~\$60/bbl floor⁽⁶⁾

Fourth Quarter & Full Year Operational & Financial Results

4Q and Full Year Production

- 4Q18 and FY18 average net daily production of 14,170 boe/d and 10,333 boe/d respectively
- Exceeds FY18 net production guidance and meets 4Q18 net production guidance
- Represents a ~66% and 18% year-over-year increase as compared to 4Q17 and FY17 respectively
- 2018 net production exit rate of 15,732 boe/d

4Q and Full Year Financial Results

- 4Q18 revenue of \$58.3 MM, a ~106% year-over-year increase compared to 4Q17
- 4Q18 and FY18 Adjusted EBITDAX of \$48.2 MM and \$100.1MM respectively, achieving full year guidance
- Respective EBITDAX margins of ~73% and ~61%
- Average 4Q18 prices realized excluding the impact of hedging was \$60.30 per barrel of oil, \$3.03 per mmbtu of gas, and \$26.20 per barrel of NGLs. On a blended basis, average pricing was \$49.23 per Boe.
- Average 4Q18 prices received including the impact of hedges were \$70.38 per barrel and \$56.04 per Boe

Production & Sales Volume Growth⁽¹⁾

2019 Plan Will Deliver Continued Production and Sales Volume Growth

Guidance Highlights

- 1Q19 volumes were impacted by Sundance's decision in late 4Q18 to slow development in response to the pronounced commodity price decrease. 1Q19 volumes were additionally curtailed by 1,500-2,000 boepd due to the previously disclosed, short-term midstream capacity constraints
- 2019 plan provides production and EBITDA growth while operating within cash flow. Free cash flow anticipated in 2H19⁽¹⁾
- 2019 plan formulated at conservative oil price deck. Should prices improve, incremental cash flow will be utilized to pay down debt, return capital or for additional development activities as appropriate
- FY19 volume excludes sales volume and associated EBITDA from the held for sale Dimmit assets

(1) As per internal Company estimates at 01 March 2019.

Underlying Assumptions for Reserve PV(10) estimates

Unless otherwise noted, the PV(10) values provided in this presentation were based on Ryder Scott's evaluations effective 1 January 2019, and are subject to the following underlying assumptions⁽¹⁾:

1. SEC Pricing

- Reserves were calculated using the 12-month average price, calculated as the unweighted arithmetic mean of spot prices on the first day of the preceding 12 months
- Oil Pricing: WTI Cushing average benchmark price of \$65.56/bbl
- NGL Pricing: Realized NGL pricing of ~43% of WTI Cushing average benchmark price of \$65.56/bbl
- Gas Pricing: Henry Hub average benchmark price of \$3.10/mmbtu

2. Costs

Operating costs for the leases and wells in the Ryder Scott report were provided by Sundance and based on Sundance's operating expense reports. The operating costs include only those costs directly applicable to the leases or wells. This includes a portion of general and administrative costs allocated directly to the leases and wells. The operating costs supplied by Sundance were reviewed by Ryder Scott for their reasonableness using information supplied by Sundance for this purpose. No deduction was made for loan repayments, interest expenses, or exploration and development prepayments that were not charged directly to the leases or wells.

Development costs were supplied by Sundance based on authorisations for expenditure for the proposed work or actual costs for similar projects. The development costs supplied by Sundance were reviewed by Ryder Scott for their reasonableness using information supplied by Sundance for this purpose. The estimated cost of abandonment after salvage was supplied by Sundance and accepted without independent verification.

Current costs used by Sundance were held constant throughout the life of the properties.

Cost estimates for a pro-forma 1P PV(10) estimate of \$1,109.9mm include operating costs totalling \$1,052.3m, Ad Valorem Taxes totalling \$73.4m and development costs totalling \$1,143.1m.

(1) The Company's reserves at 31 December 2018 were announced and filed with the ASX on 11 and 15 March 2019

Summary Sundance Investment Highlights

High Quality Asset Base – Material Inventory With Low Full-Cycle Break Even Costs

- 17+ years of highly attractive Tier 1 drilling inventory with \$1,110MM of 1P PV10 as at year end 2018⁽¹⁾
- Full-cycle break even costs of ~\$30.00 per boe allows production and EBITDA growth under various oil price scenarios
- Highly attractive single well economics across assets at existing commodity prices

Capital Discipline – Cash Flow Neutral Development Program

- 23 wells brought online in 2018, 25 wells planned for 2019
- 2019 development plan driven by focus on capital discipline and operating within cash flow
- Enhanced scale facilitates unit cost improvements in capital expenditures, operating and overhead expenses

Advantaged Net Back Pricing – Firm Transport With Attractive Midstream & Pricing Economics

- Midstream contracts for recently acquired assets provide firm capacity to process and transport all products to Houston market for prevailing LLS/MEH pricing
- Brent pricing exposure via recently signed physical offtake deal for all legacy volumes

Strong Balance Sheet – Ample Liquidity & Rapid Deleveraging

- 4Q18 40% increase to borrowing base provides increased liquidity cushion
- Fully funded 2019 capital program scaled to remain within cash flow
- 4Q18 LQA Debt-to-EBITDA of 1.6x, with significant deleveraging in 2019⁽²⁾

Strong Free Cash Flow Generation

- Company positioned to be self funding and cash flow neutral or positive by EOY 2019⁽²⁾

(1) As prepared by Ryder Scott at December 31, 2018 using SEC-based pricing. The Company's reserves at 31 December 2018 were announced and filed with the ASX on 11 and 15 March 2019

(2) Per internal Company estimates as at 01 March 2019 using NYMEX strip pricing.
