About Calix

Calix is a multi-award-winning Australian technology company that is developing new processes and materials to solve global challenges.

The core technology is a world-first, patented kiln built in Bacchus Marsh, Victoria that produces mineral honeycomb, which are very highly active minerals.

Calix uses these minerals, which are safe and environmentally friendly, to improve waste water treatment and phosphate removal, help protect sewer assets from corrosion, and help improve food production from aquaculture and agriculture with reduced antibiotic, fungicide, and pesticide use.

Calix's technology has also been adopted overseas, where the company is working with some of the world's largest companies, governments and research institutions on CO₂ capture.

Introduced 01/08/12 Amended 04/03/13

Rule 7.1 – Issues exceeding 15% of capital	
Step 1: Calculate “A”, the base figure from which the placement capacity is calculated	
Insert number of fully paid +ordinary securities on issue 12 months before the +issue date or date of agreement to issue
