

## ASX RELEASE

### **Kleos Space announces initial product range and opens pre-ordering moving towards commercialisation**

**Luxembourg, 16<sup>th</sup> April 2019:** Kleos Space S.A. (ASX: KSS, Frankfurt: KS1), space-powered Radio Frequency Reconnaissance data provider, has moved towards commercialisation of its global maritime geolocation Data-as-a-Service products with the launch of a new website at [kleos.space](http://kleos.space) with pre-order functionality.

Kleos' RF Reconnaissance data products are available on the site in three levels – Guardian RF, Guardian LOCATE and Guardian UDT – and can be pre-ordered by registered users on a monthly or annual basis.

The data product will be delivered to customers in the Summer (European) of 2019 after data collection by the Kleos' Scouting Mission satellites and having been processed through the Kleos' algorithms on the ground.

The multi-satellite Scouting Mission system will form the foundation of a constellation that delivers a global picture of hidden maritime activity, enhancing the intelligence capability of government and commercial entities when AIS (Automatic Identification System) is defeated, imagery unclear and targets out of patrol range.

Andy Bowyer, CEO of Kleos Space said: "Pre-order functionality is a major step towards commercialising our data products to large end-market customers. Our new site clearly defines our product offering and allows end users to pre-order data sets that complement their existing data assets, leading to enhanced accuracy and situational awareness."

"Kleos' independent, data products provide defence, security and commercial users with access to a cost-effective daily geolocation intelligence. Our Scouting Mission satellites will provide daily geolocation observation while our planned full constellation will provide near-real time updates."

"Pre-order functionality and strategic partnerships with intelligence providers will enable Kleos to begin generating revenue from our Scouting Mission satellites following the successful collection of data."

**About Kleos Space S.A.**

Kleos Space S.A. (ASX: KSS) is a space enabled, activity-based intelligence, data as a service company based in Luxembourg. Kleos Space aims to guard borders, protect assets and save lives by delivering global activity-based intelligence and geolocation as a service. The first Kleos Space satellite system, known as Kleos Scouting Mission (KSM), will deliver commercially available data and perform as a technology demonstration. KSM will be the keystone for a later global high capacity constellation. The Scouting Mission will deliver targeted daily services with the full constellation delivering near-real-time global observation. For more information please visit: [www.kleos.space](http://www.kleos.space).
