

NB GLOBAL CORPORATE INCOME TRUST (ASX: NBI)

Global • Income • Diversification

N | B

MONTHLY INVESTMENT REPORT – AS OF 30 APRIL 2019

INVESTMENT OBJECTIVE & STRATEGY

- Aims to provide a consistent and stable monthly income stream
- Invests in high yield bonds issued by large, liquid global companies
- Strong emphasis on capital preservation by focusing on credit quality

Market Review and Outlook

The global high yield market rallied for a fourth consecutive month with the ICE BofAML Global High Yield Index (AUD-hedged) gaining 1.3% during the month and boosting its year-to-date return to 8.0%. The strong start for the asset class has been driven by a number of factors, including better-than-expected corporate earnings and the dovish stances adopted by the U.S. Federal Reserve and European Central Bank.

We remain constructive on the fundamentals of high yield credit, which exhibits reasonable leverage levels and strong interest coverage resulting in a benign default outlook for 2019. Operating performance of underlying issuers has been stable, revenue and EBITDA growth remain in positive territory, leverage continues to decline, and refinancing activity has significantly reduced the amount of bonds maturing in the near term. Economic growth is expected to slow however central banks continue to push a more dovish narrative. All told, we believe spreads could continue to tighten over the near term.

NBI Review

NBI holds a diversified portfolio of corporate high yield bonds issued by large, liquid global companies. In this environment, the portfolio is positioned in higher quality bonds with small opportunistic allocation to select CCC securities where we see attractive relative value. We believe the portfolio is well-positioned to provide downside protection if market volatility rises whilst taking advantage of future opportunities within lower quality securities.

For April, NBI recorded a positive return of 1.5% and announced a monthly distribution of 0.875 cents per Unit, which keeps it firmly on track to achieving its Target Distribution¹ of 5.25% per annum (net of fees and expenses) and maintains its objective of distributing reliable and consistent income.

NTA PER UNIT / ASX UNIT PRICE PERFORMANCE

PERFORMANCE (NET)²

30 April 2019	1 Month	3 Months	6 Months	1 Year	Since Inception ³
Total Return (%)⁴	1.48	4.58	6.66	–	5.45
Distribution (%) *	0.44	1.32	2.64	–	2.64

* Distribution return calculated based on payment date of distribution. (April distribution announced on 23 April 2019, and distributed in May 2019.)

Past Performance is not a reliable indicator of future performance.

- The Target Distribution is only a target and may not be achieved. Actual distributions will be monitored against the Target Distribution. The Target Distribution will be formally reviewed at least annually (as at the end of each financial year) and any reduction in Target Distribution will be notified by way of ASX announcement as required. Investors should review the "Risk Factors" set out in Section 8 of the PDS.
- Performance is calculated net of management costs, which includes the Responsible Entity fee, the Management fee, the Administration fee, along with custodian, audit and legal fees and other transactional and operational costs. Investors should review NBI's Product Disclosure Statement ("PDS") for full details of NBI, including, in particular, the "Fees and Other Costs" section of the PDS.
- Listing Date: 26 September 2018. Performance less than 1 year is not annualized.
- Total Return is calculated based on the pre-distribution month end NTA and assumes all distributions are reinvested.
- Credit quality ratings are based on the Bank of America ("BoFA") Merrill Lynch Master High Yield Index composite ratings. The BoFA Merrill Lynch composite ratings are updated once a month on the last calendar day of the month based on information available up to and including the third business day prior to the last business day of the month. The BoFA Merrill Lynch composite rating algorithm is based on an average of the ratings of three agencies (to the extent rated). Generally the composite is based on an average of Moody's, S&P and Fitch. For holdings that are unrated by the BoFA Merrill Lynch Index composite, credit quality ratings are based on S&P's rating. Holdings that are unrated by S&P may be assigned an equivalent rating by the investment manager. No NRSO has been involved with the calculation of credit quality and the ratings of underlying portfolio holdings should not be viewed as a rating of the portfolio itself. Portfolio holdings, underlying ratings of holdings and credit quality composition may change materially over time.
- Calculated from the listing date of 26 September 2018 to 31 October 2018.
- The initial target distribution¹ amount per Unit, which will be paid monthly by the Trust, is 5.25% per annum (net of fees and expenses) on the Subscription Price. The most recent distribution is announced, but not yet paid.
- Yield to Worst — The lowest potential annualised total return that can be received on a bond without the issuer defaulting. This can be different from the yield to maturity because it assumes that the issuer will exercise any option it has to "call" the security at the earliest opportunity (to redeem and repay the principal value to an investor early).

DISCLAIMERS

Equity Trustees Limited ("Equity Trustees") (ABN 46 004 031 298, AFSL 240975), is the Responsible Entity for the NB Global Corporate Income Trust ("NBI"). Equity Trustees is a subsidiary of EQT Holdings Limited (ABN 22 607 797 615), a publicly listed company on the Australian Securities Exchange (ASX: EQT). This publication has been prepared by Neuberger Berman Australia Pty Ltd (ACN 146 033 801) ("NB Australia") to provide you with general information only. In preparing this publication, we did not take into account the investment objectives, financial situation or particular needs of any particular person.
