CHAIRMAN'S LETTER

17 June 2019

Dear Fellow Shareholders,

On behalf of the Board of NAOS Emerging Opportunities Company Limited (**Company**), I am pleased to provide you this Prospectus for the one-for-four Bonus Options issue to Eligible Shareholders (**Issue**).

The Company listed on the ASX in 2013 and aims to protect investor capital whilst providing a sustainable growing stream of dividends, franked to the maximum extent possible, and long term capital growth above the benchmark index. The Company aims to offer investors genuine, concentrated exposure to Australian listed micro-cap companies (market capitalisation generally less than \$250 million) with an industrial focus. The Company's investment philosophy is centred on the pillars of long-term, concentrated and high-conviction investing. Since listing, the Company has paid an aggregate 39.25 cents per Share of fully franked dividends (as at 31 May 2019).

ABOUT THE ISSUE

Many of our shareholders have been long term supporters of the Company from its beginning, and over time, have continued to grow their ownership in the Company. The Board is pleased to issue Bonus Options to Eligible Shareholders, which we consider presents several benefits, including:

- Eligible Shareholders will receive Bonus Options at no cost;
- Bonus Options will be tradeable on the ASX and may be bought or sold on-market at the prevailing market price;
- Eligible Shareholders are able to increase their shareholding in the Company by exercising the Bonus Options without paying any brokerage or commission;
- The exercise price of the Options (being, \$1.02) is equivalent to the most recent pre-tax Net Tangible Asset (NTA) per share of the Company, as at 31 May 2019;
- Where Options are exercised, this increases the size of the Company's portfolio, which in turn, unlocks the benefits of scale, meaning lower fixed costs on a per share basis as the Company grows.

GROWING AND LIMITING THE SIZE OF THE COMPANY TO A STRATEGICALLY OPTIMAL LEVEL

The Board believes that the Issue is a measured way to allow the Company to grow over the next 24 months. In our view, it would allow NAOS Asset Management (the Investment Manager) to take advantage of a number of investment opportunities that have arisen within the micro-cap end of the Australian stock market; whilst not placing undue pressure on the short-term performance and dividend reserves of the Company.

The Board remains committed to managing the capital base of the Company in a manner that provides the most suitable framework for maximising potential shareholder return. We believe that growing the size of the Company to between \$125 million to \$150 million is optimal as it not only allows the Investment Manager to maximise performance by still being able to access meaningful positions in quality companies; but also scales the Company to an appropriate size that lowers fixed costs on a per share basis.

This Prospectus contains detailed information about the Issue and the Company and a description of the key risks associated with an investment in the Company. I encourage you to read this Prospectus carefully and in its entirety before dealing in or exercising your Options. In addition, you should also consult with your stockbroker, solicitor, accountant or other independent professional adviser.

On behalf of the Board of Directors, I thank you for your continued support.

Yours faithfully

A handwritten signature in dark ink, appearing to read 'David E. Ruhl', written in a cursive style.

KEY RISKS

Please note that the risks highlighted below are not intended to be exhaustive. A summary of the key risks associated with dealing in and exercising the Options and an investment in the Company are described in section 5.

Micro-cap companies risk	The Company invests in micro-cap companies which may be more susceptible to losses and risks of insolvency due to having limited customers, product lines, markets or financial resources, or being heavily dependent on key personnel. Shares in micro-cap companies may be susceptible to wide price fluctuations, may trade less frequently and in smaller volumes and therefore may be affected by liquidity risk. Any of these factors may in turn materially adversely affect the performance of the Company and the trading price of its Shares and Options.
Liquidity risk for shares in portfolio companies	Positions in micro-cap stocks, such as those held by the Company, can be difficult to sell and convert into cash, as the market for these types of investments is inherently smaller and less liquid. The risks associated with a lack of liquidity of shares in portfolio companies are further increased due the Company's concentrated investment style and it having a substantial holding in all of the companies in the Investment Portfolio as noted in further detail in Section 3.3. This can result in a loss if the Company needs to sell, but is unable to sell, such investments within a particular time frame.
Concentration risk	The Company's investment strategy is concentrated in nature and as a result this may increase its exposure to abnormal falls in the market price of any single investment, which could adversely impact the value of the Shares and Options.
Market risk	The value of the Company's Investment Portfolio and the underlying market prices of its Shares and Options may fall due to movements in the broader equity market.
Exercise price of Options	There is no guarantee the Options will trade on the ASX or that there will be a liquid market for the Options. If Options are exercised, there is no guarantee that Shares issued on exercise of those Options will trade above the exercise price paid for those Shares.

Dilution risk	If you do not exercise the Options that you receive and other investors exercise their Options, your shareholding in the Company will be diluted.
Dividends risk	There is no guarantee that dividends will be paid in the future, or that, dividends will remain at current levels or increase over time or that they will be franked. The payment of a dividend is contingent upon various factors, including but not limited to, the financial performance and profitability of the Company, the level of profit reserves, underlying performance of the Investment Portfolio and changes in regulations.

2. DETAILS OF THE ISSUE AND HOW TO EXERCISE OPTIONS

2.1 TERMS OF THE ISSUE

Eligible Shareholders in the Company will receive 1 bonus Option for every 4 Shares in the Company that they hold at 5:00pm (Sydney time) on the Record Date, at no cost.

The Option exercise price is \$1.02, which reflects the pre-tax net tangible assets per Share of the Company at 31 May 2019. The Expiry Date is 29 June 2021.

The Options are exercisable at any time from their date of issue until 5:00pm (Sydney time) on 29 June 2021.

Each Option entitles the holder to purchase one additional Share in the Company at the exercise price of \$1.02 at any time before the Options expire on the Expiry Date on 29 June 2021.

The number of Options issued to you will be shown on the Option Holding Statement which will be sent to Eligible Shareholders separately. In the calculation of any entitlement, fractions will be rounded down to the nearest whole number. You do not need to take any action to receive the Options which will be issued to Eligible Shareholders shortly after the date of this Prospectus.

2.2 USE OF ADDITIONAL CAPITAL RECEIVED ON EXERCISE OF THE OPTIONS

The money raised by Option holders exercising their Options will be used by the Investment Manager to make further investments consistent with the Company's investment strategy of investing in Australian listed micro-cap companies (market capitalisation generally less than \$250 million) with an industrial focus. This will facilitate the Company's aim of growing the Investment Portfolio to between generally \$125 million to \$150 million; a size that is considered to allow the Investment Manager to most effectively execute the Company's investment strategy and therefore maximise the performance of the Company. The Company's investment strategy is described in further detail in section 3.1. No cash is raised by the Company on issue of the Options.

2.3 EXERCISING OPTIONS

Eligible Shareholders may exercise Options wholly or in part at any time before 5:00pm (Sydney time) on the Expiry Date, by paying \$1.02 per Option and duly completing an Option Exercise Form.

Eligible Shareholders will be sent a personalised Option Exercise Form together with a holding statement shortly after the date of this Prospectus.

An Option Exercise Form is only valid and effective when the Registry has received the full amount of the exercise price in cleared funds, any time before 5:00pm (Sydney time) on the Expiry Date. Payment can be made by enclosing your cheque with the form or it can be made by BPAY. The BPAY details are contained in your personalised Option Exercise Form.

If you need a new Option Exercise Form, please contact the Registry via the details set out in section 8.

2.4 RIGHTS ATTACHING TO OPTIONS AND SHARES

On exercise of an Option, Eligible Shareholders will be issued with one Share. The terms of the Options are set out in section 6.5 of this Prospectus. Detailed provisions relating to the rights attaching to Shares are set out in the Company's Constitution and the Corporations Act 2001 (Cth). A copy of the Constitution can be inspected during office hours at the registered office of the Company or provided free of charge by contacting the Company by telephone on (02) 9002 1576 or by email at enquiries@naos.com.au.

Please refer to section 6.5 for the terms of the Options and section 6.6 for a summary of the rights attaching to the Shares.

2.5 TAXATION IMPLICATIONS

The taxation consequences of being granted Options will depend on an Eligible Shareholder's particular circumstances. It is each Eligible Shareholder's responsibility to make their own enquiries concerning the taxation consequences of dealing in or exercising any Options, or dealing in any Shares issued on exercise of Options.

The Directors do not consider that it is appropriate to give Eligible Shareholders advice regarding the taxation consequences of being granted Options under this Prospectus or exercising these Options as it is not possible to provide a comprehensive summary of the possible taxation positions of all Eligible Shareholders. The Company, its advisers and officers do not accept any responsibility or liability for any taxation consequences to Eligible Shareholders in respect of the Issue or any subsequent dealing or exercise of the Options or Shares issued on exercise of Options.

Before deciding to exercise your Options, you should consider whether the Shares to be issued and allotted on exercise of the Options are a suitable investment for you. Please refer to the risks set out in Section 5.

If you are in doubt as to the course you should follow, you should seek advice on the matters contained in this Prospectus from a stockbroker, financial adviser, accountant, solicitor or other professional adviser immediately.

2.6 QUOTATION OF OPTIONS

Within 7 days after the date of this Prospectus, an application will be made to ASX for the Options to be quoted on the ASX. If ASX does not give permission for quotation of the Options within 3 months after the date of this Prospectus (or a later date permitted by ASIC), none of the Options will be issued. Options may be transferred or transmitted in any manner approved by the ASX. There is no guarantee the Options will trade on the ASX or that there will be a liquid market for the Options. If Options are exercised, there is no guarantee that Shares issued on exercise of those Options will trade at or above the exercise price paid for those Shares.

2.7 MARKET PRICES OF SHARES ON ASX

The highest and lowest closing market sale prices of the Company's Shares on ASX during the three (3) months immediately preceding the date of this Prospectus and the respective dates of those highest and lowest sales were \$1.15 (14 March 2019) and \$0.86 (12 June 2019).

The latest available sale price of the Company's Shares on ASX at the close of trading on 14 June 2019 (the last trading day prior to the date of this Prospectus) was \$0.87.

The Options are not in an existing class of quoted securities and therefore there is no sale price history for the Options.

2.8 OVERSEAS DISTRIBUTION

No action has been taken to register or qualify the issue of Options under this Prospectus, or to otherwise permit a public issuance of Options, in any jurisdiction outside Australia, New Zealand or Hong Kong.

The Company has formed the view that it is unreasonable to make the Issue to overseas Shareholders in jurisdictions outside Australia, New Zealand and Hong Kong (**Excluded Holders**) having regard to:

- the number of Excluded Holders within the relevant jurisdictions;
- the number and value of Shares held by those Excluded Holders; and
- the cost of complying with overseas legal requirements within the relevant jurisdictions.

The Issue is not being extended and the Options are not being issued to Shareholders with registered addresses outside Australia, New Zealand and Hong Kong.

The distribution of this Prospectus in jurisdictions outside Australia, New Zealand and Hong Kong may be restricted by law. This Prospectus may not be released or distributed in the US or to US Persons. 3. ABOUT THE COMPANY AND THE INVESTMENT MANAGER

3.1 ABOUT THE COMPANY

The Company is a listed investment company that was established in 2012 and its Shares are listed on the Australian Securities Exchange (ASX: NCC).

The Company aims to provide investors with genuine, concentrated exposure to Australian listed micro-cap companies (market capitalisation generally less than \$250 million) with an industrial focus.

3.2 INVESTMENT STRATEGY & PERFORMANCE

The Company seeks to protect investor capital whilst providing a sustainable growing stream of dividends, franked to the maximum extent possible, and long-term capital growth above the benchmark index, being the S&P/ASX Small Ordinaries Accumulation Index (XSOAI).

Since its inception on 26 February 2013, as at 31 May 2019, the Investment Portfolio has returned 11.15% per annum or 93.69% on a total return basis, outperforming the S&P/ASX Small Ordinaries Accumulation Index (XSOAI) which has increased by 6.12% per annum or 45.02% over the same period.

The table below sets out the Investment Portfolio's performance for various periods ending 31 May 2019:

Investment Portfolio Performance

	1 Month	1 Year	3 Years (P.A.)	5 Years (P.A.)	6 Years (P.A.)	Inception (P.A.)	Inception (Total Return)
NCC Investment Portfolio Performance*	-1.43%	-12.30%	+2.68%	+6.02%	+9.60%	+11.15%	+93.69%
S&P/ASX Small Ordinaries Accumulation Index	-1.25%	+2.06%	+9.85%	+8.82%	+8.38%	+6.12%	+45.02%
Performance Relative to Benchmark	-0.18%	-14.36%	-7.17%	-2.80%	+1.22%	+5.03%	+48.67%

*Investment Portfolio performance is post all operating expenses, before fees, taxes and initial IPO and placement commissions. Performance has not been grossed up for franking credits received by Shareholders. References to P.A. and Total Return include part performance for the month of inception of the Investment Portfolio (26 February 2013). Returns compounded for periods greater than 12 months.

Historical performance is not an indication of the future performance of the Investment Portfolio. Performance returns of the Company will differ to the Investment Portfolio performance due to fees payable to the Investment Manager and tax payable by the Company.

3.3 DIVIDEND PROFILE

The Company aims to pay a growing stream of dividends bi-annually, franked to the maximum extent possible, provided the Company has sufficient profit reserves and franking credits and it is within prudent business practices to do so.

On 15 February 2019, the Board declared a fully franked interim dividend of 3.75 cents per Share for the six month period ending 31 December 2018. As shown in the table below, since inception of the Investment Portfolio, the Company has paid an aggregate 39.25 cents per share in dividends and has grown the dividend each year.

There is no guarantee that the Company's aim to pay dividends will be met. Further to this, the level of franking attached to any dividend will depend on tax paid and on the number of Options exercised prior to that dividend record date.

The subscription by the Company and NSC for these additional shares in BRI is subject to various conditions including approval under section 611 section 7 of the Corporations Act as the acquisition will result in each of the Investment Manager, the Company, NSC, Sebastian Evans and NEOF having a relevant interest in over 20% of BRI's voting shares (i.e. approximately 27.4% of the voting shares in BRI which are held across two of the listed investment companies and one unregistered management investment scheme that the Investment Manager manages). If all conditions are satisfied, then the Company will acquire an additional 1,619,048 ordinary shares in BRI and will hold a total of 6,024,522 shares in BRI, which means it will hold approximately 9.93% of the total issued share capital of BRI.

3.5 ABOUT THE INVESTMENT MANAGER: NAOS ASSET MANAGEMENT LIMITED

The Company's Investment Portfolio is managed on behalf of the Company by NAOS Asset Management Limited (**NAOS**). NAOS is a specialist fund manager that manages approximately \$260 million, and across its three listed investment companies (**LICs**) has close to 8,000 shareholders (as at 31 May 2019). NAOS is an unlisted public company, with approximately 66% of the company being owned by its directors and employees. Warwick Evans and Sebastian Evans who are directors of the Company are also directors and substantial shareholders of NAOS. NAOS directors and most employees hold shareholdings in the LICs, which demonstrates that NAOS is well aligned with the interests of the LIC shareholders.

The table below sets out the key investment beliefs of NAOS.

VALUE WITH LONG TERM GROWTH

We believe in investing in businesses where the earnings today are not a fair reflection of what the same business will earn over the longer term. Ultimately, this earnings growth can be driven by many factors including revenue growth, margin growth, cost cutting, acquisitions and even share buybacks. The end result is earnings growth over a long-term investment horizon even if the business was perceived to be a value type business at the time of the initial investment.

QUALITY OVER QUANTITY

Excessive diversification, or holding too many investments, may be detrimental to overall portfolio performance. We believe it is better to approach each investment decision with conviction.

INVEST FOR THE LONG TERM

As investors who are willing to maintain perspective by taking a patient and disciplined approach, we believe we will be rewarded over the long term. If our investment thesis holds true we persist. Many of our core investments have been held for three or more years where management execution has been consistent and the value proposition is still apparent.

MANAGEMENT ALIGNMENT

We believe in backing people who are proven and aligned with their shareholders. One of the most fundamental factors which is consistent across many company success stories in our investment universe is a high-quality proven management team with 'skin in the game'. NAOS Directors and staff members are significant holders of shares on issue across our strategies, so the interests of our shareholders are well aligned with our own.

IGNORE THE INDEX

This means we are not forced holders of stocks with large index weightings that we are not convinced are attractive investment propositions. We actively manage each investment to ensure the best outcome for our shareholders and only invest in companies that we believe will provide excellent/ sustainable long-term returns.

PURE EXPOSURE TO INDUSTRIALS

With the big four banks making up a large portion of total domestic equity holdings for the self-managed super fund investor group, many Australian investors are at risk of being overexposed to one sector and may be missing out on opportunities to invest in quality companies in industries such as Media, Advertising, Agriculture or Building Materials. Australian listed industrial companies outside the ASX 50 are our core focus, and we believe the LICs we manage provide pure access to these companies which may be lesser known by the broader investment community.

PERFORMANCE V LIQUIDITY FOCUS

We believe in taking advantage of inefficient markets; the perceived risk associated with low liquidity (or difficulty buying or selling large positions) combined with investor short-termism presents an opportunity to act based purely on the long-term value proposition where the majority may lose patience and move on. Often illiquidity is caused by aligned founders or management having significant holdings in a company. NAOS benefits from a closed-end

LIC structure, which means we do not suffer 'redemption risk' and we can focus on finding quality undervalued businesses regardless of their liquidity profile.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG)

As an investment manager, NAOS recognises and accepts its duty to act responsibly and in the best interests of shareholders. We believe that a high standard of business conduct and a responsible approach to environmental, social and governance (ESG) factors is associated with a sustainable business model over the longer term that benefits not only shareholders but also the broader economy. NAOS supports the UN Principles for Responsible Investment and is guided by these principles in incorporating ESG into our investment practices.

5. RISK FACTORS

5.1 INTRODUCTION

This section describes some of the risks associated with dealing in and exercising the Options. The selection of risks set out below has been based on an assessment of a combination of the probability of the risk occurring and impact of the risk if it did. There is no guarantee or assurance that the importance of different risks will not change or other risks will not emerge.

You should carefully consider the risks described below and all of the other information set out in this Prospectus before deciding to deal in or exercise any Options. If any of the events or developments described below occurs, the Company's business, financial condition or performance could be negatively affected. In that case, the market price of the Options and the Shares could decline, and you could lose all or part of your investment.

5.2 RISKS SPECIFIC TO THE ISSUE

Exercise price of Options

There is no guarantee the Options will trade on the ASX or that there will be a liquid market for the Options. If Options are exercised, there is no guarantee that Shares issued on exercise of those Options will trade above the exercise price paid for those Shares.

Dilution

If you do not exercise the Options, because either you sell those Options on market, because you allow those Options to expire without being exercised, or you do not receive Options because you are an Excluded Holder, and other investors exercise their Options, your shareholding will be diluted.

5.3 RISKS SPECIFIC TO THE COMPANY

It is not possible to describe or foresee all the risks that may adversely impact the Company. However, some of the specific risk factors which may significantly impact the future performance of the Company include the following:

Micro-cap companies risk

The Company invests in micro-cap companies in terms of market capitalisation. Micro-cap companies often have limited customers, product lines, markets or financial resources, may be heavily dependent on key personnel and can be more susceptible to losses and risks of insolvency. Micro-cap companies may be recently established entities with limited public information or operating history and may be engaged in new-to-market concepts which may be speculative in nature. Shares in micro-cap companies may be susceptible to wider price fluctuations, may trade less frequently and in smaller volumes and therefore may be affected by liquidity risk to a greater degree than shares in larger companies. Any of these factors may in turn materially adversely impact the performance of the Company and the trading price of its Shares and Options.

Liquidity risk

Positions in micro-cap stocks such as those held by the Company, can be difficult to sell and convert into cash, as the market for these types of investments is inherently smaller and less liquid. The risks associated with a lack of liquidity of shares in the portfolio companies are further increased due the Company's concentrated investment style and it having a substantial holding in all of the companies within the Investment Portfolio as noted in further detail in Section 3.3. Although the Investment Manager constructs its investment strategy having regard to liquidity constraints, there is a risk that one or more of the holdings in the Investment Portfolio (from time to time) may become illiquid. This can result in a loss if the Company needs to sell such investments within a particular time frame.

Concentration risk

The Company's investment portfolio is concentrated in nature and it has a substantial holding in all the companies within the Investment Portfolio as noted in further detail in Section 3.3. As a result, there is the risk that the Investment Portfolio may be less diversified than other listed investment companies. This may increase the exposure that the Company has to abnormal falls in the market price of any single investment and in turn could negatively impact the value of Shares.

Market risk

There is a risk that investments that form part of the Company's Investment Portfolio may fall in value over short or extended periods of time due to movements in the broader equity market. Shareholders in the Company are exposed to this risk both through their holdings in Shares and Options as well as through the Company's Investment Portfolio.

Dividend risk

Although the Company aims to provide a growing stream of dividends bi-annually, franked to the maximum extent possible, provided it is within prudent business practices, there is no guarantee that dividends will be paid in the future, or that, dividends will remain at current levels or increase over time or that they will be franked. The payment of a dividend is contingent upon various factors, including but not limited to, the financial performance and profitability of the Company, the level of profit reserves, underlying performance of the Investment Portfolio and changes in regulations which are outside the control of the Company (refer to "regulatory risk" below for further information). The extent to which dividends are franked depends on available franking credits. The Company's ability to generate franking credits is dependent upon the receipt of franked dividends from the Investment Portfolio and the payment of tax.

Equity Investment risks

As the Company is a listed investment company that seeks to invest in ASX listed micro-cap companies, the Company is exposed to risks inherently associated with investing in listed securities, including:

- the performance of the companies in which the Company invests;
- the level of dividend payments made by the companies in which the Company invests;
- the market prices of the securities in which the Company invests;
- the market liquidity of the securities in which the Company invests;
- the size of the Company's Investment Portfolio;
- the concentrated investment style of the Investment Manager (which may increase the exposure that the Investment Portfolio has to abnormal falls in the market price of any single investment); and
- the ability to diversify risk.

Discount to NTA

Shares in the Company may trade on the ASX at a discount to the net asset value of the Investment Portfolio on a per share basis and the performance of the Shares and the Options may not be correlated with the performance of the Investment Portfolio.

Economic risk

The investment returns of the Company's Investment Portfolio are influenced by market factors including changes in the economic conditions (e.g. changes in interest rates and inflation), changes in the financial markets, changes to the legislative and political environment, as well as changes in investor sentiment. In addition, unexpected and unpredictable events affecting the economy (for example, natural disasters, acts of terrorism and war) could add to wider equity market volatility.

Regulatory risk

The Company is exposed to the risk of changes to applicable laws and regulations or their interpretation, which could have a negative effect on the Company, its investments or returns to shareholders and the Company is also exposed to risks of non-compliance with reporting or other legal obligations.

Investment strategy risk

The success and profitability of the Company significantly depends on the ability of the Investment Manager to successfully and profitably manage the Company's Investment Portfolio and invest in securities that have the ability to generate a return for the Company. There is a risk that the Investment Manager may fail to make investments that generate a return and may make investments that lose money.

Reputational Risk

There is a risk of impairment of the Company's reputation arising from factors which could include poor performance, failure to meet regulatory obligations, involvement in public controversy in companies in which it invests or other high-profile issues, shareholder dissatisfaction, inappropriate director remuneration or contagion from reputational concerns of other listed investment companies.

Industry risk

There are several industry risk factors that may affect the future operation or performance of the Company. These factors are outside the control of the Company. Such factors include increased regulatory and compliance costs and variations in legislation and government policies generally.

Reliance on the Investment Manager and its investment team

The Company is exposed to the risk that the Investment Manager may cease to manage the Company's Investment Portfolio. The ability of the Investment Manager to continue to manage the Investment Portfolio is dependent on a range of factors including, the maintenance of its Australian Financial Service Licence, its continued solvency and the retention of its investment team. The loss of key personnel within the Investment Manager could have a negative effect on the performance of the Investment Manager and the Company.

5.4 GENERAL RISKS

The Company is also subject to general risks factors outside the control of the Company which may have a significant impact on the future performance of the Company. This includes but is not limited to the following:

- economic conditions in Australia and internationally which may have a negative impact on capital markets;
- many developed economies face major structural issues, particularly high sovereign debt levels;
- markets are likely to remain volatile for some time given international financial conditions;
- earnings of companies in Australia which in the medium term may be negatively impacted by the general weakness in economic conditions;
- a slowdown in emerging markets, including China which may impact economic growth in Australia;
- changes in investor sentiment and perceptions in local and international stock markets;
- changes in interest rates, exchange rates and the rate of inflation;
- changes in domestic or international fiscal, monetary, regulatory and other government policies; and
- geo-political conditions such as acts or threats of terrorism, military conflicts or international hostilities.

In addition, investors should be aware that there are risks associated with any investment in securities. Prospective investors should recognise that the trading price of the Company's Shares and Options may fall as well as rise with movements in the equity capital markets in Australia and internationally.

Specifically, as a listed company the Company is subject to the Listing Rules which require continuous disclosure to the market of any information possessed by the Company which a reasonable person would expect to have a material effect on the price or value of its Shares.

The Board has adopted a Continuous Disclosure Policy which sets out the obligations of the Directors, officers and employees of the Company to ensure that the Company satisfies the continuous disclosure obligations imposed on it under the Listing Rules and the Corporations Act. The Continuous Disclosure Policy provides information as to what a person should do when they become aware of information which could have a material effect on the Company’s securities and the consequences of non-compliance.

6.2 LEGAL FRAMEWORK FOR THIS PROSPECTUS

As a disclosing entity, the Company has issued this Prospectus in accordance with section 713 of the Corporations Act applicable to prospectuses for an offer of continuously quoted securities (or options to acquire continuously quoted securities) that were continuously quoted securities at all times in the three months before the issue of this Prospectus.

This Prospectus is a transaction-specific prospectus. In general terms, a transaction specific prospectus is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a securities exchange. Investors should therefore have regard to the other publicly available information of the Company before deciding whether to invest.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that it has complied with the requirements of ASX as applicable to disclosing entities from time to time, and which require the Company to notify ASIC of information available to the securities market conducted by ASX, throughout the three months before the issue of this Prospectus.

Information that is already in the public domain has not been included in this Prospectus other than that which is considered necessary to make this Prospectus complete.

As at the date of this Prospectus, there is no information that has been excluded from continuous disclosure in accordance with the Listing Rules and which is required to be set out in this Prospectus.

To the extent that they are applicable to the Company, the Board has adopted the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations.

6.5 TERMS OF THE OPTIONS

The terms of the Options are set out below.

- **Exercise Price:**
Each Option has an exercise price of A\$1.02.
- **Exercise Period:**
An Option may be exercised on any business day from the date of grant to 29 June 2021 (inclusive) but not thereafter. An Option Exercise Form is only effective when the Company has received the full amount of the exercise price in cash or cleared funds.
- **Expiry Date:**
The expiry date for the Options is 29 June 2021.
- **Quotation of Options:**
The Company will apply for quotation of the Options on the ASX.
- **Register:**
The Company will maintain a register of holders of Options in accordance with section 168(1)(b) of the Corporations Act.
- **Transfer/Transmission:**
An Option may be transferred or transmitted in any manner approved by the ASX.
- **Exercise:**
On valid exercise, the Company will issue one Share for each Option exercised. Options may be exercised wholly or in part by delivery to the Registry of the Option Exercise Form together with payment of the aggregate exercise price in the manner prescribed in section 2.3 of this Prospectus and any further instructions on the Option Exercise Form.
- **Quotation of Shares:**
The Company must make an application for quotation of Shares issued on exercise of the Options on ASX in accordance with the Listing Rules.
- **Dividend entitlement:**
Options do not carry any dividend entitlements. Shares issued on exercise of Options rank equally with other issued Shares of the Company on and from issue. Shares issued upon the exercise of Options will only participate in a future dividend or other shareholder action if such Shares have been issued on or prior to the applicable record date for determining entitlements.
- **Voting Rights**
The Options do not confer upon the holder a right to receive notices of general meetings (except as may be required by law), nor any right to attend, speak at or vote at general meetings of the Company.
- **Reorganisations:**
If there is any reorganisation of the issued share capital of the Company, the rights of the Option holders will be varied to the extent necessary to comply with the ASX Listing Rules which apply to the reorganisation at the time of reorganisation.
- **Participating rights**
For determining entitlements, Option holders may only participate in new issues of Securities to holders of Shares in the Company if the Option has been exercised and Shares allotted in respect of the Option before the record date of the proposed new issue. The Company must give at least six business days' notice to Option holders of any new issue before the record date for determining entitlements to the issue in accordance with the Listing Rules.
- **Adjustments**
If between the date of issue and the date of exercise of an Option the Company makes one or more rights issues (being a pro-rata issue of Shares in the capital of the Company that is not a bonus issue) in accordance with the Listing Rules, the Exercise Price of Options on issue will be reduced in respect of each rights issue according to the following formula:

$$NE = OP - E [P - (S + D)] / (N + 1)$$

Where:

NE is the new exercise price of the Option;

OP is the old exercise price of the Option;

E is the number of underlying Shares into which one Option is exercisable;

P is the volume weighted average market price per Share recorded on ASX during the 5 trading days ending on the day before the ex-rights date or ex-entitlements date (excluding special crossings and overnight sales);

S is the subscription price for Shares to be issued under the pro rata issue

D is the amount of any dividend due but not yet paid on the existing Shares (except those to be issued under the pro rata issue);

N is the number of existing Shares with rights or entitlements that must be held to receive a right to one new Share under the pro rata issue.

If there is a bonus issue to the holders of Shares, the number of Shares over which the Option is exercisable will be increased by the number of Shares which the holder of the Option would have received if the Option had been exercised before the record date for the bonus issue.

- **ASX listing:**

The Company must apply for quotation of the Shares issued on exercise of the Options to the ASX in accordance with the Listing Rules. Shares so issued will rank equally with other issued Shares of the Company.
