Income Maximiser Limited (ASX:PL8)

Market Overview

The Australian market continued its rally in May, rising 2.0% despite global markets falling strongly on concerns about the US-China trade war. This was due to a more optimistic market outcome following the unexpected re-election of the coalition government which, along with potential RBA cuts and an easing in lending standards from APRA, sparked a rally in banking and other companies with an exposure to the Australian property market. The re-election of the Coalition was good news for retirees who receive franking credit refunds as the Coalition's policy is to maintain the current system. However, Australia's 10year bond yield fell 33bps to 1.46% in May to the lowest level in Australia's history putting further pressure on the income an investor can receive from cash and fixed income investments.

The largest positive contributors to the Company's investments during the month were overweight positions in CSR and Aristocrat Leisure which announced a strong result as well as underweight positions in Treasury Wines and BlueScope Steel which is suffering as steel margins contract. However, overweight positions in Macquarie whose forecast earnings guidance was lower than the market anticipated, Cimic and QBE Insurance underperformed.

The Company's investments remain actively positioned to deliver superior income and franking whilst also being able to allocate to companies that are expected to provide solid capital returns.
