## **BOSCH AND DRONESHIELD PARTNER IN THE COUNTERDRONE SPACE**

**DroneShield Ltd's (ASX:DRO or DRO.AU)** ("DroneShield"), a global leader in drone detection and mitigation, and **Bosch**, the world leader in security and safety solutions, have entered into a partnership in the counterdrone space under the Bosch Integration Partner Program (IPP).

Bosch Security and Safety Systems provides a range of surveillance solutions globally, and leads with its range and customer adoption of its products across industries, including prison, airport, critical infrastructure, and other sectors.

DroneShield is a global leader in the counterdrone industry, with its product suite including multi-sensor detection systems and products enabling detection and mitigation of unwanted drones.

Going forward, DroneShield will be offering an integrated system for drone detection and mitigation, with DroneShield's products integrated with Bosch's video surveillance products. This product integration of the two companies' offerings has been completed, and the combined solution is available to customers at present.

Hsiang Nung Kuah, Bosch Business Unit Security, Director, Regional BU Marketing, said: "Bosch is pleased to add DroneShield as the preferred counterdrone partner to our suite of capabilities. Drone security is becoming a rapidly increasing problem for our existing and prospective customers across the sectors, and we expect DroneShield's capability to service this emerging need."

Oleg Vornik, DroneShield's CEO, added: "We look forward to working with Bosch across customer segments. Most customers seek to make the most use of their existing installed hardware and systems, and adding our capabilities to the large installed and growing base that Bosch has in Asia-Pacific and globally, is expected to drive significant value to the customers – that is, the customers are able to utilise their existing surveillance hardware to gain a new counterdrone capability."

**About DroneShield:** Based in Sydney (Australia), Virginia and Washington, DC (USA) and London (UK), DroneShield is a worldwide leader in drone security technology. The Company has developed the pre-eminent drone security solution that protects people, organisations and critical infrastructure from intrusion from drones.
