## Fund Review

Global markets moved higher again in July, on the prospects of Central Bank easing, with the S&P500 +1.3%, FTSE 100 +2.2%, Nikkei 225 +1.2%, while the Shanghai Composite eased, -1.6%.

The Australian market delivered another strong result, finishing the month +3.0% and finally surpassing its pre-GFC high, bringing the total return for the last 12 months to +13.2%.

The RBA followed up its June rate cut with another 25bp cut in July, sending the cash rate to a record low of 1.0%, with the aim of reducing the unemployment rate and stimulating wages growth. While the domestic economy has slowed, there was further evidence that the housing market has stabilised.

The combination of falling interest rates and increased geopolitical risks around trade disputes and Brexit, saw investors seek out more defensive parts of the market, resulting in strong performances from sectors such as Consumer Staples (+9.6%), Healthcare (+6.0%) and IT (+5.1%). This presented a headwind for the Fund, as we are underweight these sectors due to their very high valuations and low dividend yields.

By contrast, more cyclical sectors of the market such as Metals & Mining (+1.1%), Materials (+1.2%), Energy (+1.5%) and Financials (+1.8%) lagged, albeit while still all delivering positive returns.

Stocks the Fund holds which performed well included, Flight Centre (+10.9%), Calx (+8.9%), Wesfarmers (+8.4%), Ausdrill (+8.2%) and NAB (+7.2%). Stocks which detracted from performance included Perpetual (-6.5%), Crown Resorts (-4.7%), Rio Tinto (-4.7%) and Woodside Petroleum (-4.6%).

## Fund Activity

During the month, we took profits and reduced our holdings in CocaCola Amatil and Medibank Private, both of which had performed strongly in recent times.

At month end, stock numbers were 32 and cash was 8.2%

## Distribution

In order to provide a regular income stream, EIGA pays monthly distributions. We aim to pay equal cash distributions each month, based on our estimate of the dividend income to be generated over the year. Franking credits, surplus income and any realised capital gains will then be distributed, as per usual, with the June distribution.

Looking forward to the current financial year, EIGA is again targeting a 7% distribution yield, comprising 5% cash plus 2% franking credits.

## Outlook

The market is currently trading slightly above its long-term average, with a FY20 P/E ratio of 16.4x and offering an attractive gross dividend yield of 5.3%.

Within the overall market, we are currently finding many good value, high-yielding investment opportunities. Across both the industrial and resources sectors, we are seeing many quality companies trading on attractive valuations which should deliver solid returns to investors from these levels.

By contrast, there remain large pockets of expensive growth and momentum style stocks which present significant de-rating risks if the lofty growth rates implied in their valuations are not able to be met. We do not hold these types of stocks as they do not meet our value criteria.

**EIGA continues to offer a higher forecast gross yield than the overall market and, as always, our focus will continue to be on investing in quality companies which are offering attractive valuations and have the ability to deliver high levels of franked dividend income to investors. Further, we believe the current very low interest rates highlight the relative attractiveness of financially-sound, high dividend yielding equities.**
