Important information

This Fund has been admitted to mFund, a managed fund settlement service operated by the Australian Securities Exchange (ASX).

This document provides information incorporated by reference in the AMP Capital Equity Income Generator ASX mFund investors Product Disclosure Statement (PDS) dated 30 August 2019, and forms part of the PDS. A copy of the PDS and the incorporated information can be obtained free of charge, on request by contacting us on 1800 759 543 or online at www.ampcapital.com/pds/waei/r.

Before making a decision about investing or reinvesting in the AMP Capital Equity Income Generator (the Fund), you should read the PDS and all incorporated information. The information in this document is general information only and does not take into account any investor's personal objectives, financial situation or needs. All investors should obtain financial advice that is tailored to their circumstances.

No company in the AMP Group or any investment manager assumes any liability to investors in connection with investment in the Fund or guarantees the performance of the Responsible Entity's obligations to investors, the performance of the Fund or any particular rate of return. The repayment of capital is not guaranteed. Investments in the Fund are not deposits or liabilities of any company in the AMP Group.

AMP Capital has provided consent to the statements made by or about AMP Capital in this document and has not withdrawn this consent prior to the issue of this document. No company in the AMP Group other than the Responsible Entity is responsible for any statements made in this document.

Registered name of Fund	AMP Capital Australian Equity Income Fund (ARSN 165 631 818)
Unit class	mFund Class R

FUND FEATURES

Overview of the Fund

The Fund aims to provide a dividend income stream that exceeds that of the S&P/ASX 200 Accumulation Index and is expected to grow over the longer term. The Fund will invest in a portfolio of Australian securities listed, or about to be listed, on the Australian Securities Exchange, that we believe will produce a strong level of dividends and a total return (including franking credits and before fees) above the broader Australian equity market as measured by the S&P/ASX 200 Accumulation Index*.

The Fund also aims to provide these returns with a lower volatility than the broader Australian equity market.

* Performance benchmark adjusted to include franking credits.

Our investment approach

The investment approach is designed to create a portfolio that meets the multiple objectives of the Fund, which are to provide:

- a dividend income stream (including franking credits) that exceeds that of the S&P/ASX 200 Accumulation Index and is expected to grow over time,
- total returns (including franking credits) above the performance benchmark* (before fees), and
- lower volatility than the market.

The Fund is managed with an income style and a focus on fundamental research. The Fund aims to invest in cash flow generative businesses that can either generate a high level of dividends or grow their dividend over time. For this reason, the Fund has an income style that may exhibit both value and growth characteristics at different points in time.

The Fund is managed in a tax aware manner and is specifically managed for Australian investors on low tax-rates. The value of franking credits is considered when making investment decisions and the Fund will participate in off-market buybacks when the investment team views it beneficial to do so.

* Performance benchmark adjusted to include franking credits.

An income focused process

The Australian Equity Income Team uses an investment process that is tailored for income specific issues. The investment team uses proprietary research, conducted in-house, to analyse companies through an income lens focussing on factors like dividend sustainability, dividend growth and franking credits. The investment team uses this analysis to find companies with undervalued, or underestimated, cash flow and dividends.

Risk is also defined through an income lens. The investment process defines risk as the permanent and significant loss of income or the failure to grow dividends over time. The investment team aims to find companies that can grow their dividend over time, while avoiding companies that cut their dividend. This is expected to result in a portfolio that has a lower volatility than the market.

The investment process is primarily focused on 'bottom-up' research, but the investment team does consider both sector and macroeconomic drivers that impact a company's cash flow.

Portfolio construction

The portfolio is constructed independent of a benchmark and is expected to be more concentrated than the S&P/ASX 200 Index. Sector diversification is maintained in a balanced way across sector groupings and is independent of market capitalisation.

The portfolio is constructed in a way that is expected to meet the Fund's multiple objectives. The portfolio is regularly monitored to ensure consistency with the Fund's income, total return and volatility objectives.

Portfolio monitoring

Each company is assessed on their ability to maintain or increase the current expected dividend. Where a particular company's dividend is deemed unsustainable, the holding is reviewed and typically exited.

The Fund is regularly monitored to ensure enough income is generated to meet the Fund's target dividend yield. Where the Fund may be tracking below this target, changes are made to the portfolio to address this.

Fund profile

The Fund's investments

The Fund may invest up to 100% in Australian securities listed, or about to be listed, on the Australian Securities Exchange and may hold up to 15% cash.

Our investment team

Our Australian Equity Income Team has investment experts with specialist knowledge of the Australian equity market and experience throughout market cycles. The team has a deep understanding of issues that impact dividend sustainability and is focussed on delivering sustainable dividend income solutions to our clients.

Information about the team can be obtained by contacting us.

Diversification

Portfolio diversification is achieved through investment across a range of industries and sectors, which may include:

- financials (such as companies within banking and insurance)
- resources (such as companies in the mining industry)
- consumer services (such as supermarkets)
- healthcare
- telecommunications services
- industrials (such as companies primarily focused on the provision of commercial services and supplies, or machinery manufacturing or construction engineering)
- energy
- utilities
- listed REITs, and
- infrastructure.

Borrowing

The Fund may borrow to meet its short term liquidity needs. It is not our intention to gear the Fund through the use of borrowing.

Derivatives

The Fund may use derivatives such as options and futures with the aim of:

- protecting against risks of unfavourable changes in an investment's price
- enhancing returns by taking advantage of favourable mispricings within a market, as a cost-effective alternative to purchasing physical assets, and
- implementing the Fund's investment objectives.

We impose restrictions on the use of derivatives within the Fund and monitor the implementation of these restrictions in accordance with the AMP Capital Derivatives Risk Statement, which can be obtained online at www.ampcapital.com/derivativesriskstatement, or free of charge by contacting us.

Securities lending

The Fund engages in securities lending. Securities lending is an investment practice whereby securities of a fund are lent to a third party (the borrower) for a period of time in return for a fee. Title to the securities is transferred to the borrower, but that fund's exposure to capital movements and investment income remain unchanged. For the duration of the loan, the borrower is required to provide collateral in excess of the value of the securities loaned. Collateral is held by the Fund's custodian on behalf of the Fund. Subject to any restrictions deemed necessary by the investment manager, up to 95% of each individual security held by the Fund may be lent under the securities lending program.

See the 'Other important information' section for further details on securities lending, including associated risks and how we mitigate and manage them.

Environmental, social and governance (ESG) considerations

AMP Capital will take account of labour standards, environmental, social, ethical or governance considerations in the selection, retention or realisation of investments across all asset classes (other than cash, sovereign bonds, derivatives and exchange traded funds), in the manner set out in the 'Other important information' section of this document. However, where AMP Capital or an investment manager invests in a pooled vehicle or fund managed by an external investment manager and AMP Capital is unable to influence exclusive control over the investable universe of such a vehicle or fund, the negative screening outlined is not applied. The investment will then be subject to whatever ESG policy is adopted by the investment manager of that vehicle or fund.

The negative screening will also not apply to cash, sovereign bonds, derivatives and exchange traded funds.

RISKS OF INVESTING

All investing involves risk

Generally, the higher the expected return, the higher the risk.

Whilst the Fund is managed with the aim of providing competitive investment returns against the Fund's performance benchmark and protecting against risk, you should be aware that the Fund is subject to investment risks, which could include delays in repayment, the non-payment of distributions and loss of income and capital invested.

Investment risks can affect your financial circumstances in a number of ways, including:

- your investment in the Fund may not keep pace with inflation, which would reduce the future purchasing power of your money
- the stated aims and objectives of the Fund may not be met
- the amount of any distribution you receive from the Fund may vary or be irregular, which could have an adverse impact if you depend on regular and consistent distributions to meet your financial commitments, and
- your investment in the Fund may decrease in value, which means you may get back less than you invested.

As the risks noted in this section do not take into account your personal circumstances, you should also consider the information provided under 'Making an investment decision' in this section before making a decision about investing or reinvesting in the Fund.

Risks specific to the Fund

Share market investments

Share market investments have historically produced higher returns than cash or fixed interest investments over the long term. However, the risk of capital loss exists, especially over the shorter term. You should be aware that past share market investment performance is not an indication of future performance.

Specific risks may include a slowdown in economic growth, individual companies reporting disappointing profits and dividends, and management changes. Where a fund is invested in listed securities, the value of these securities may decrease as a result of these and other events.

Companies

Specific risks relating to individual companies may include disappointing profits and dividends, and management changes.

Where a company is geared there is the risk that the value of the company and/or the company's returns may be affected by factors such as increased borrowing costs or a change in interest rates.

Investment management

There is a risk that the investment manager will not perform to expectation or factors such as changes to the investment team or a change of investment manager may affect the Fund's performance.

Derivatives

There are risks of losses to the Fund through the use of derivatives, and where derivatives are used by underlying funds in which the Fund invests, including:

- the value of a derivative may not move in line with the value of the underlying asset
- a derivative position cannot be reversed
- losses may be magnified, and
- the party on the other side of a derivative contract defaults on financial or contractual obligations.

Liquidity

Liquidity refers to the ease with which an asset can be traded (bought and sold). An asset subject to liquidity risk may be more difficult to buy or sell and it may take longer for the full value to be realised.

Where the Fund has exposure to investments which are generally considered to be illiquid, it may be subject to liquidity risk.

We manage the Fund's portfolio with the aim of ensuring that exposure to illiquid assets is no greater than 20%. However, in circumstances where the Fund's portfolio consists of less than 80% in value of liquid assets, we may not be able to meet withdrawal requests within the periods specified under the 'Payment times' section of this document, and may suspend processing all withdrawal requests for such period as we determine.

In addition, we will not meet withdrawal requests if the Fund ceases to be 'liquid' for the purposes of the Corporations Act. However, although we are not obliged to, we may offer investors the opportunity to make withdrawals where the Fund is not 'liquid' during this period, as set out under the 'Processing withdrawal requests' section of this document.

Property investments

Although the Fund does not invest in property directly, many of the factors affecting the property market will affect the property securities held by the Fund. These factors, which may also affect the performance of the Fund, include the quality of underlying properties, geographic location, costs and losses associated with natural disasters, or other disasters or events, outside of our reasonable control, demand and supply for commercial properties, the rental profile of the properties owned and the level of rental income.

The carrying value of the Fund's investments used to generate the Fund's unit price may not reflect their currently realisable value. This may be due to a range of factors, including buy/sell spreads, liquidity pressures, market sentiment at the time of sale, the volume of assets being sold, availability of willing purchasers for an asset and delays between valuation and realisation of an asset.

Sector

There is the risk that returns may be adversely affected where the Fund's investments have a high exposure to a particular sector or sectors.

Securities lending

Although engaging in securities lending may benefit the Fund by providing increased returns, there is a risk of capital loss.

This may arise if the borrower fails to return the borrowed securities, or if some of the collateral provided by the borrower to cover the value of the lending is affected by the share market investments risk listed below, or the insolvency of a party to the arrangement, including where collateral is pooled and/or held under the laws of a foreign country.

The greater volume of securities lent, the greater potential for capital loss.

Small companies

The specific risks relating to small companies, which include disappointing profits and dividends, as well as management changes, may be magnified for small companies due to their scale of operations.

Additionally, small companies may be exposed to other risks, including:

- cash may not be available to meet ongoing or unexpected business requirements, and
- shares in small companies may be traded less frequently and in lower volumes.

Such risks could affect these companies' share prices and subsequently the stability and value of the Fund's portfolio.

Other risks

Other risks of investing may apply and you should seek appropriate advice before investing.

Making an investment decision

As the risks noted in this document do not take into account your personal circumstances, you should consider the following before making a decision about investing or reinvesting in the Fund:

- **Obtain professional advice** to determine if the Fund suits your investment objectives, financial situation and particular needs.
- **Ensure** you have read the most up-to-date AMP Capital Equity Income Generator PDS, available on our website at www.ampcapital.com/pds/waei/r.
- **Consider** the suggested minimum investment timeframe for the Fund, as set out in the Fund's PDS.
- **Regularly review** your investments in light of your investment objectives, financial situation and particular needs.

FEES AND COSTS

Fee summary

This document shows fees and other costs that you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole.

Taxes are set out in another part of this document. You should read all the information about fees and costs because it is important to understand their impact on your investment. Unless otherwise specified, all dollar amounts are Australian dollars.

Table 1

AMP Capital Equity Income Generator

Type of fee or cost	Amount	How and when paid
Fees when your money moves in or out of the managed investment product		
Establishment fee The fee to open your investment.	Nil	Not applicable
Contribution fee The fee on each amount contributed to your investment.	Nil	Not applicable
Withdrawal fee The fee on each amount you take out of your investment.	Nil	Not applicable
Exit fee The fee to close your investment.	Nil	Not applicable
Management costs¹		
The fees and costs for managing your investment.	0.72% pa of the Fund's net assets	Management costs are comprised of: <ul style="list-style-type: none"> • a management fee² – calculated daily and paid monthly out of the Fund's assets and reflected in the unit price. • indirect costs³ – paid out of the Fund's assets or interposed vehicle's⁴ assets once the cost is incurred and reflected in the unit price. Calculated on the basis of the Responsible Entity's reasonable estimate or knowledge of such costs.
Service fees		
Switching fee The fee for changing investment options.	Nil	Not applicable
<ol style="list-style-type: none"> 1. This amount comprises the management fee and estimated indirect costs. The sum of these figures may differ to the total management costs, due to rounding. For more information about management costs, see 'Management costs' under the heading 'Additional explanation of fees and costs'. 2. The management fee may be negotiated with investors who are wholesale clients for the purposes of the Corporations Act. See 'Differential fees' under the heading 'Additional explanation of fees and costs'. 3. For more information on the meaning and calculation of indirect costs, see 'Indirect costs' under the heading 'Additional explanation of fees and costs'. 4. For more information on the meaning of interposed vehicles, see 'Indirect costs' under the heading 'Additional explanation of fees and costs'. 		

Important

Advice fees agreed between you and your financial adviser and other service fees may apply to your investment in the Fund. Advice fees may be in the form of an investment advice fee and/or an ongoing advice fee. Please refer to 'Payments to your financial adviser' in this section for information about the advice fees that may be payable. Broker fees may also be payable to your broker for accessing the Fund through mFund. Please refer to 'mFund costs' in this section for fees that may be payable.

Additional explanation of fees and costs

Management costs

Management costs are expressed as a percentage of the Fund's net assets, rounded to two decimal places. Management costs are made up of a management fee, an estimated performance fee (if applicable) and estimated indirect costs. Any management fees, performance fees or indirect costs charged by interposed vehicles are included in the management costs in Table 1; they are not an additional cost to you.

Management costs components

The management costs shown in Table 1 comprise the following components. The sum of these figures may differ to the total management costs, due to rounding. All figures in the table below are expressed as a percentage of the net assets of the Fund.

Management fee (% pa)	Indirect costs (% pa)	
	Recoverable expenses ¹	Estimated other indirect costs
0.72%	0.00%	0.00%

1. The recoverable expenses are the expenses reimbursed from the Fund in the previous financial year. Past recoverable expenses reimbursed from the Fund may not be a reliable indicator of future recoverable expenses. See the 'Recoverable expenses' section for further information.

Management fee

The management fee is charged by the Responsible Entity for managing and operating the Fund. The management fee of 0.72% pa is charged on the value of the gross assets of the Fund. When calculating the value of the gross assets of the Fund for this purpose, we may value any units held by the Fund in underlying funds by reference to the gross assets of the underlying funds (that is, disregarding the value of any borrowings, other liabilities or provisions in those underlying funds) rather than the net asset value. For the purposes of the management costs calculation in Table 1, the management fee has been expressed as a percentage of the Fund's net assets.

Indirect costs

Indirect costs are generally any amount the Responsible Entity knows or estimates will reduce the Fund's returns, that are paid from the Fund's assets or the assets of interposed vehicles.

Generally, an interposed vehicle is a body, trust or partnership in which the Fund's assets are invested. It includes, for example, an underlying fund.

The amount of indirect costs include, but are not limited to:

- recoverable expenses of the Fund
- management costs of an interposed vehicle (including recoverable expenses, performance-related fees and any other indirect costs of underlying managers or interposed vehicles in which the Fund invests), and
- a reasonable estimate of the costs of investing in over-the-counter (OTC) derivatives (either at the Fund level or in interposed vehicles), which may be used by the Fund to gain economic exposure to assets.

The amount of indirect costs shown in the 'Management costs component' table is based on the Responsible Entity's knowledge of, or where required, reasonable estimate of, such costs. Indirect costs are generally calculated on the basis of indirect costs paid by the Fund in the Fund's previous financial year. As such, the actual indirect costs may differ from the amount shown in the 'Management costs components' table. Indirect costs are deducted from the returns on your investment or from the Fund's assets as a whole. They are reflected in the unit price and are not an additional cost to you.

Estimated indirect costs are included in the management costs in Table 1.

Recoverable expenses

The Fund's constitution entitles the Responsible Entity to be reimbursed from the Fund for any expenses incurred in relation to the proper performance of its duties.

The Responsible Entity may also recover other expenses relating to the operation of the Fund. These expenses include but are not limited to audit and legal fees, tax and accounting services, custody, administration and registry services, regulatory compliance, the cost of preparing disclosure documents and costs associated with a securities lending program (if applicable). Internal expenses incurred in connection with these matters may also be recovered from the Fund. Recoverable expenses are included in the management costs in Table 1.

Updated fees and costs information

The management costs components are based on the Responsible Entity's actual knowledge, or reasonable estimate, of the particular fee or cost. Estimates may be based on a number of factors, including (where relevant), previous financial year information, information provided by third parties or as a result of making reasonable enquiries, and typical costs of the relevant investment. As such, the actual fees and costs may differ and are subject to change from time to time. Updated information that is not materially adverse to investors will be updated online at www.ampcapital.com/feesandcosts, or you may obtain a paper copy or an electronic copy of any updated information from us, free of charge, on request. However, if a change is considered materially adverse to investors, the Responsible Entity will issue a replacement PDS and/or updated incorporated information, both of which will be available online. You can also obtain a copy of these documents free of charge, by contacting us.

Transactional and operational costs

The Fund incurs transactional and operational costs when dealing with the assets of the Fund. Transactional and operational costs may include transactional brokerage, clearing costs, stamp duty, the buy and sell spreads of any underlying fund and the costs of (or transactional and operational costs associated with) derivatives. These costs will differ according to the type of assets in the Fund, or the purpose for which any derivatives are acquired, and will be paid out of the Fund's assets.

We estimate the Fund's transactional and operational costs to be approximately 0.43% of the net assets of the Fund.

Buy and sell spreads

Transactional and operational costs associated with dealing with the Fund's assets may be recovered by the Fund from investors, in addition to the fees and costs noted in Table 1.

Investments and withdrawals in the Fund may incur buy and sell spreads, which are designed to ensure, as far as practicable, that any transactional and operational costs incurred as a result of an investor entering or leaving the Fund are borne by that investor, and not other investors.

Buy and sell spreads are calculated based on the actual or estimated costs the Fund may incur when buying or selling assets. They will be influenced by our experience of the costs involved in trading these assets or the costs that the Fund has actually paid, and will be reviewed whenever necessary to ensure they remain appropriate.

When you enter or leave the Fund, any buy or sell spread applicable at that time is a cost to you, additional to the fees and costs noted in Table 1, and is reflected in the unit price. The buy and sell spreads are retained within the Fund, as assets of the Fund; they are not fees paid to the Responsible Entity, AMP Capital or any investment manager.

The buy spread is taken out of application amounts. The sell spread is taken out of withdrawal amounts. As at the date of this document, a buy spread of 0.20% and a sell spread of 0.20% apply to the Fund.

Based on the buy and sell spreads noted above, an investment of \$50,000 would incur a buy spread of \$100, and a withdrawal of \$50,000 would incur a sell spread of \$100. This is an example only; it is not an estimate or forecast. The actual buy and/or sell spreads may be higher or lower.

Current buy and sell spreads can be obtained online at www.ampcapital.com/spreads or by contacting us.

If investments and withdrawals in the Fund incur buy and sell spreads, we estimate that a buy spread of 0.20% and a sell spread of 0.20% will recover all of the Fund's transactional and operational costs incurred due to investor activity. However, the balance of the Fund's transactional and operational costs will be borne by the Fund from the Fund's assets without any recovery from individual investors and reflected in the Fund's unit prices.

The following table shows a breakdown of the total estimated transactional and operational costs and how these are borne by investors.

Total estimated transactional and operational costs	0.43%
Estimated transactional and operational costs offset by buy/sell spreads	0.09%
Estimated transactional and operational costs borne by the Fund	0.34%

Other costs

mFund costs

Fees may be payable to your broker for accessing the Fund through mFund. These may be charged when you acquire or redeem units in the Fund. You should refer to your broker's Financial Services Guide.

Borrowing costs

Borrowing costs (or gearing costs) are the costs associated with borrowing money or securities (such as interest, establishment fees, government charges and stock borrowing fees). Borrowing costs are paid out of the Fund's assets or the underlying fund's assets (as the case may be) and reflected in the unit price.

We estimate these borrowing costs to be 0.00% of the Fund's net assets. These costs will be paid out of the Fund's assets and are additional to the fees and costs noted in Table 1 above.

Costs related to certain specific assets or activities to produce income

The Fund may also incur costs (related to certain specific assets or activities to produce income) that an investor would incur if they invested directly in a similar portfolio of assets. These costs will be paid out of the Fund's assets and are additional to the fees and costs noted in Table 1 above.

Liabilities properly incurred

The Fund's constitution entitles the Responsible Entity to be indemnified from the Fund for any liability properly incurred.

Maximum fees

The maximum fees that can be charged under the Fund's constitution (exclusive of GST) are:

- **Contribution fee** – 5% of the application amount. Currently, no contribution fee is charged.
- **Withdrawal fee** – 5% of the withdrawal amount. Currently, no withdrawal fee is charged.
- **Management fee** – 3% per annum of the value of the assets of the Fund. The current management fee charged is shown in Table 1.

Under the Fund's constitution, the Responsible Entity is entitled to be paid an additional amount on the above fees, on account of GST, calculated in accordance with the Fund's constitution.

Goods and Services Tax (GST)

Unless otherwise stated, the fees and other costs shown in this section are inclusive of GST, less reduced input tax credits or other input tax credits claimable, rounded to two decimal places. For information about the tax implications of investing in the Fund, refer to the 'Taxation' section of this document.

Differential fees

A rebate of part of the management fee or a lower management fee may be negotiated with investors who are wholesale clients for the purposes of the Corporations Act or with AMP Group staff. Further information can be obtained by contacting us.

Alternative forms of remuneration

AMP Capital and the Responsible Entity may provide alternative forms of remuneration, such as professional development, sponsorship and entertainment for financial advisers, dealer groups and master trust or investor directed portfolio service (IDPS) operators, where the law permits. Where such benefits are provided, they are payable by us or the Responsible Entity and are not an additional cost to you. AMP Capital and the Responsible Entity maintain a register to record any material forms of alternative remuneration AMP Capital or the Responsible Entity may pay or receive.

Payments to your financial adviser

Advice fees

You may agree with your financial adviser that advice fees will be paid for services your financial adviser provides to you.

These advice fees are additional to the fees shown in Table 1, and are paid to your financial adviser, not to us or the Responsible Entity.

Other payments and benefits

Your financial adviser may receive payments and/or other benefits from the dealer group or organisation under which they operate. These payments and benefits are not a cost to the Fund.

Other payments

Payments such as online brokerage payments may be made to other parties in relation to your investment in the Fund.

These costs are paid out of the management costs; they are not an additional cost to you.

TAXATION

Taxation treatment of your investment

It is important that you seek professional taxation advice before you invest or deal with your investment, as the taxation system is complex, and the taxation treatment of your investment will be specific to your circumstances and to the nature of your investment.

These comments are for information purposes and are intended for tax paying investors who hold their investment on capital account for income tax purposes and are based on our interpretation of Australian taxation laws and Australian Taxation Office administrative practices at the date of publication of this document.

The Fund is a Managed Investment Trust (MIT) and will be administered as an Attribution Managed Investment Trust (AMIT).

The AMIT tax regime seeks to improve the operation of the taxation law for MITs by increasing certainty for responsible entities and unit holders and allowing greater flexibility around how MITs are administered.

Under the AMIT tax regime, you are taxed on the taxable income that is attributed to you by the Responsible Entity on a fair and reasonable basis and in accordance with the Fund's constitution. You may be entitled to tax offsets, which reduce the tax payable by you, and concessional rates of tax may apply to certain forms of taxable income such as capital gains.

Australian resident individuals are liable to pay tax at their marginal rates on the taxable income attributed to them from the Fund. Generally, tax is not paid on behalf of investors. If you are not an Australian resident for income tax purposes, withholding tax may be deducted from the taxable income of the Fund attributed to you at prescribed rates, dependent on the components of the Fund's taxable income.

Please note that at the time of your initial or additional investment there may be unrealised capital gains or accrued income in the Fund. If later realised, these capital gains and income may form part of the taxable income attributed to you. In addition, there may be realised but undistributed capital gains or income in the Fund, which may form part of the taxable income attributed to you.

Any losses generated by the Fund cannot be passed onto investors. However, where specific requirements are satisfied, the Fund should be eligible to offset losses to reduce later year income or capital gains.

You may also be liable to pay capital gains tax on any capital gains in respect of your investment, such as from disposing of your investment. You may instead realise a capital loss in respect of your investment, which may be used to reduce capital gains in the same or later years. The cost base of your investment, which is relevant when calculating any such capital gains or losses, may change over the duration of holding your investment. The cost base of your interest in the Fund may increase or decrease if the taxable income attributed to you differs to the amounts that you have received as a cash distribution.

Each year we will send you an AMIT Member Annual Statement (AMMA Statement), which will contain details of the taxable income attributed to you for the year, together with any net cost base adjustment amount by which the cost base of your interest in the Fund should be increased or decreased.

Taxation laws and administrative practices change from time to time. Such changes may impact the taxation of the Fund and you as an investor. It is your responsibility to consider and monitor the impact of any taxation reforms impacting your investment.

Providing a Tax File Number (TFN)

You do not have to provide a TFN, exemption code or Australian Business Number (ABN) when you complete an application to invest or reinvest in the Fund. However, if you do not provide any of these, the Responsible Entity may be required to deduct tax from distributions, including where those distributions are reinvested, at the highest marginal tax rate, plus any applicable levies.

DISTRIBUTIONS

Unit prices will normally fall after the end of each distribution period. Consequently, if you invest just before the end of a distribution period, some of your capital may be returned to you as income in the form of a distribution.

Any distributions you receive may affect the social security benefits to which you are or may be entitled, and you should consider discussing this with your financial adviser, Centrelink or the Department of Veterans' Affairs before investing.

Payment of distributions

You can choose to have distributions:

- paid directly into your current nominated account, or
- reinvested in the Fund.

If no selection is made, distributions will be paid to your nominated account.

Distributions will be paid based on:

- the estimated yield of the assets of the portfolio, except that at least 50% of the Fund's taxable income will be distributed, and
- the number of units you hold at the end of the distribution period.

For example, if you held 50,000 units in the Fund, and the Fund paid a distribution of \$0.02 per unit for the distribution period, you would receive \$1,000 (that is, 50,000 units x \$0.02 per unit). Please note this is an example only and not a forecast, the distribution rate will vary for each distribution.

If we do not have valid bank account details on file, your payment will be withheld until you supply valid bank account details.

Reinvestment

Under the Fund's constitution, the issue price for reinvested distributions is determined by the net asset value (adjusted by any distribution payable), any transaction costs and the number of units on issue in the unit class as at the last day of the distribution period. However, no buy spread is applied to reinvested distributions (see 'Buy and sell spreads' in the 'Fees and other costs' section of this document).

INVESTING IN THE FUND

How to invest

mFund settlement service

The Fund has been admitted to mFund, a managed fund settlement service operated by the Australian Stock Exchange (ASX). The service uses CHESS, the ASX electronic settlement system for you to apply for or redeem units in the Fund via your broker (broker-sponsored units). The mFund settlement service does not facilitate on-market buying and selling between investors. The mFund units settled through the mFund settlement service are issued and redeemed by us.

Initial and additional investments

You will need to apply via your broker using the ASX settlement system for broker-sponsored units when you apply for an initial investment in the Fund, make an additional investment, or set up a regular investment plan. Your holding of the broker-sponsored units will be linked to your individual HIN that is used to hold your other investments transacted through the ASX. If you do not currently have a HIN, you will be issued with one.

You can make additional investments of at least \$2,000 at any time.

Regular investment plan

The regular investment plan enables you to invest regular monthly amounts by direct debit (see below). A minimum investment amount of \$500 per month applies. Monies debited from your account to pay for your regular investment plan takes three (3) Business Days to clear. For this reason, units cannot be issued until three (3) Business Days after your bank account has been debited. If the debit is unsuccessful, no units will be issued.

Initial, additional and regular investments are made on the basis of the PDS current at the time of the investment.

Terms and conditions of investing

The offer to invest in the Fund is subject to the terms and conditions described in the Fund's current PDS and incorporated information, and as set out in the Fund's constitution (see the 'Other important information' section of this document). The Responsible Entity reserves the right to change the terms and conditions (see below) and to refuse or reject an application.

We can only accept applications signed and submitted from within Australia. We cannot accept cash.

Changes to the information in the PDS

Before making an investment decision, it is important to read a current PDS, as information provided in a PDS and in information incorporated by reference in the PDS, may change from time to time. If changes are not materially adverse to investors, the relevant information will be updated online at www.ampcapital.com. However, if a change is considered materially adverse to investors, the Responsible Entity will issue a replacement PDS and/or updated incorporated information, both of which will be available online. You can also obtain a copy of these documents free of charge, by contacting us.

Processing applications

We generally process applications each Business Day, using the close of business issue price for that day. A Business Day for us is any day other than Saturday, Sunday or a bank or public holiday in Sydney, NSW.

The cut-off time for mFund units is 11.15am. Any applications we receive after the cut-off time will be processed effective the next Business Day.

Issue price

The issue price is determined under the Fund's constitution by reference to the net asset value and transaction costs pertaining to the relevant class of units, and the number of units on issue in that unit class.

Investments made through this class relate to mFund units. As with the other classes of units in the Fund, mFund unit prices are based on the net asset value of the Fund. This is not the same as for a listed fund, where the listed market price determines the value of the units.

The market value and net asset value of the Fund are normally determined at least each Business Day, using the market prices and unit prices of the assets in which the Fund is invested.

The Responsible Entity may suspend unit pricing and exercise certain discretions in determining the unit price (see 'Unit Pricing Discretions Policy' in the 'Other important information' section of this document).

Interest earned on your application amounts

Your application amounts will be held in an applications account until units in the Fund are issued to you. Any interest earned on those amounts whilst they are held in the account will be credited to the Fund.

Nominated representative

You may nominate a representative to operate your investment in the Fund on your behalf. Your nominated representative will be able to exercise the same powers as you under the Fund's constitution, including transacting on your investment account.

Conditions

By nominating a representative, you agree to certain conditions, including indemnifying the Responsible Entity against any liabilities arising out of the nomination of your representative. You will be provided with the full terms and conditions when you nominate your representative.

Please contact us if you require further information.

ACCESSING YOUR MONEY

Requesting a withdrawal

To redeem from the Fund, you can apply to withdraw your units via your broker by placing a sell order with your broker (or financial planner if applicable).

Minimum withdrawal amount and account balance

A minimum withdrawal amount of \$2,000 applies, and a balance of \$10,000 is generally required to keep your investment open. If your account balance falls below this level, the Responsible Entity may redeem your investment and pay the proceeds to you. The Responsible Entity reserves the right, however, to accept lower account balances.

Processing withdrawal requests

If our Sydney office receives a withdrawal request before 11.15am on a Business Day, your withdrawal will be processed using the withdrawal price for that day. If received and accepted after 11.15am, it will be processed using the withdrawal price for the next day. If it is a non-Business Day in Sydney, your withdrawal will be processed using the next available withdrawal price.

The proceeds of your withdrawal request will usually be available within five (5) Business Days (see 'Payment times' in this section).

In circumstances where the Fund's portfolio consists of less than 80% in value of liquid assets, for example because of an unexpected fall in the value of those liquid assets against the value of the illiquid assets in the Fund's portfolio, we may not be able to meet withdrawal requests until the Fund's exposure to illiquid assets falls to 20% or less of its portfolio. We may, at our discretion, offer investors the opportunity to make withdrawals during this period. At such times, we will notify investors of the offer, providing details about:

- the period during which the offer will remain open, and
- which assets will be used to satisfy withdrawal requests.

Total withdrawals

Where an investor redeems 5% or more of the units on issue of the Fund, the Responsible Entity may attribute taxable income to that redeeming investor.

Withdrawal price

The withdrawal price is determined under the Fund's constitution by reference to the net asset value and transaction costs pertaining to the relevant class of units, and the number of units on issue in that unit class.

The market value and net asset value of the Fund are normally determined at least each business day, using the market prices and unit prices of the assets in which the Fund is invested. Investments made through this class relate to mFund units. As with the other classes of units in the Fund, mFund unit prices are based on the net asset value of the Fund. This is not the same as for a listed fund, where the listed market price determines the value of the units.

The Responsible Entity may suspend unit pricing and exercise certain discretions in determining the unit price (see 'Unit Pricing Discretions Policy' in the 'Other important information' section of this document).

Payment times

Although the proceeds of your withdrawal request will usually be available within five (5) Business Days of receipt, you should be aware that:

- payment and processing of withdrawal requests is dependent on the Fund's cash position, and
- the Fund's constitution allows up to 30 days, or longer in some circumstances, to process withdrawal requests. These circumstances include, but are not limited to:
 - where the Responsible Entity is unable to realise sufficient assets due to circumstances beyond its control, such as restricted or suspended trading in the market for an asset, or
 - if the Responsible Entity does not consider it is in the best interests of investors to realise sufficient assets to satisfy a withdrawal request.

Transfer of units

Please contact us for all transfer requests.

OTHER IMPORTANT INFORMATION

The Fund's constitution

The Fund's constitution provides the framework for the operation of the Fund and with the Fund's PDS, the Corporations Act and other relevant laws, sets out the relationship between the Responsible Entity and unitholders. We will send you a copy of the Fund's constitution free of charge, on request.

Overview of the Fund's constitution

The Fund may have a number of classes of units. Under the Fund's constitution, the different unit classes may have different management costs, expenses and distributions, but otherwise all classes of units have similar rights. Some of the provisions of the Fund's constitution are set out in the Fund's PDS and in this document. Further provisions relate to:

- the rights and liabilities of unitholders
- the times when processing of withdrawal requests can be extended, such as if the Fund is illiquid or it is not in the best interests of unitholders
- where taxes or other amounts can be deducted from payments to unitholders
- where transfers and applications may be refused
- the liability of the Responsible Entity to unitholders in relation to the Fund, which is limited to any liability imposed by the Corporations Act, so long as the Responsible Entity acts in good faith and without gross negligence
- the powers, rights and liabilities of the Responsible Entity, including its power to invest the assets of the Fund, to deal with itself and its associates, to be paid fees and to be reimbursed or indemnified out of the assets of the Fund
- the right of the Responsible Entity to be reimbursed by a unitholder or former unitholder for tax or expenses it incurs as a result of the unitholder's request, action or inaction, or to redeem units to satisfy amounts due to the Responsible Entity from a unitholder
- changing the Fund's constitution, including in some cases without unitholder approval, such as to meet regulatory changes
- the ability of the Responsible Entity to terminate the Fund at any time
- when the Responsible Entity can terminate the Fund or retire, and what happens if this occurs, and
- voting rights.

Although the Fund's constitution limits a unitholder's liability to the value of their units, the courts have yet to determine the effectiveness of provisions like this.

Compliance plan

The Responsible Entity has a compliance plan for the Fund, which sets out the measures that will apply in operating the Fund to ensure compliance with the Corporations Act and the Fund's constitution. The compliance plan is lodged with the Australian Securities and Investments Commission (ASIC) and is audited by independent auditors annually to determine compliance with it.

A compliance committee monitors the operation of the Fund and overall compliance with the compliance plan. The majority of the members of the compliance committee must be, and are, independent of both AMP Capital and the Responsible Entity. The compliance committee has the obligation to monitor compliance with the compliance plan and to report certain breaches of the Corporations Act and the compliance plan to ASIC.

Related party transactions

Any transaction between AMP Capital or the Responsible Entity and any of their respective related parties must comply with related party protocols and AMP Capital policies and procedures. For these purposes, a related party includes certain entities and individuals that have a close relationship with AMP Capital or the Responsible Entity. Related parties of the Responsible Entity include the Responsible Entity itself, entities that the Responsible Entity controls, funds operated or managed by the Responsible Entity and agents of the Responsible Entity.

As at the date of this document, the relevant policies and procedures that apply to related party transactions of AMP Capital or the Responsible Entity are contained in the AMP Conflicts of Interest Policy. Under this Policy, the parties must transact on terms that would be reasonable if they were dealing at arm's length, relevant legislative requirements must be satisfied and the interests of investors must be protected. The Policy will be reviewed on a regular basis and may change from time to time.

Under the Fund's constitution, the Responsible Entity may:

- deal with itself, an associate, investor or any other person
- be interested in and receive a benefit under any contract or transaction with itself, an associate, investor or any other person, or
- act in the same or similar capacity in relation to any other fund.

The Fund's constitution also provides that amounts may be paid to related parties for services provided to AMP Capital or the Responsible Entity in connection with the Fund and for expenses. These payments are on arm's length terms.

Continuous disclosure obligations

Where the Fund has more than 100 unitholders it is subject to regular reporting and disclosure obligations under the Corporations Act. Copies of documents lodged with ASIC in relation to the Fund may be obtained from, or inspected at, an ASIC office or can be obtained free of charge by contacting us. These documents may include:

- the Fund's annual financial report most recently lodged with ASIC, or
- the Fund's half year financial report lodged with ASIC (after the lodgement of the annual financial report and before the date of the current PDS).

Where the Fund has continuous disclosure obligations, the Responsible Entity will meet those obligations by publishing material information online at www.ampcapital.com.

Your privacy

The main purpose in collecting personal information is so that we can set up and administer your investment account. If you do not provide the required information, we may not be able to process your application. If you would like us to not use your personal information for direct marketing purposes, please contact us.

Our Privacy Policy, which can be obtained online at www.ampcapital.com/privacy or by contacting us, sets out AMP Capital's policies on management of personal information. This information may be disclosed to other members of the AMP Group, financial advisers where applicable, to external service suppliers (including suppliers that may be located outside of Australia) who supply administrative, financial or other services that assist us in providing services to you, and to anyone you have authorised or if required by law.

You may access personal information held about you, although there are some exemptions to this. If you believe information held about you is inaccurate, incomplete or out of date, please contact us.

Communication by fax

When you communicate with us by fax, it is your responsibility to obtain confirmation from us that we have received your fax. Neither we nor the Responsible Entity are responsible for any loss or processing delay that occurs as a result of us not receiving a faxed communication. Please note that we do not accept a sender's fax transmission record as evidence that a communication has been received by us. You also indemnify us and the Responsible Entity against any loss or liability arising from us or the Responsible Entity acting on any fraudulent communication received by fax.

Unit Pricing Discretions Policy

The Responsible Entity may exercise certain discretions in determining the unit price of units on application and withdrawal in the Fund. The Unit Pricing Discretions Policy, which can be obtained online at www.ampcapital.com or a copy can be obtained, free of charge, by contacting us, sets out the types of discretions that the Responsible Entity may exercise and in what circumstances the Responsible Entity exercises the discretions and the reasons why it considers the policies are reasonable. The Responsible Entity is required to keep a record of any instance where a discretion is exercised in a way that departs from these policies.

Asset Valuation Policy

Assets in which the Fund invests are held directly by the Fund or through underlying funds in which the Fund invests. Generally, these assets are valued at least each Business Day using market prices in accordance with the AMP Capital Asset Valuation Policy.

For further information on AMP Capital's Asset Valuation Policy, please go to www.ampcapital.com or a copy can be obtained, free of charge, by contacting us.

Securities lending

Securities lending exposes the Fund to additional risks which may cause a loss of capital, in particular the risk that the borrower defaults by failing to return the securities. However, processes are in place to manage and substantially mitigate these risks, including:

- loans may only be made to approved borrowers, who are carefully selected taking into account credit risk
- aggregate borrowing limits are set and monitored
- acceptable collateral must be high quality and highly liquid, including cash, shares in larger companies and government bonds; in the event of default, collateral may be liquidated to fund the purchase of replacement securities
- borrowers are required to maintain collateral equal to the value of the securities on loan plus a margin of 5-10% depending on type of collateral
- market movements of both securities on loan and collateral are monitored on a daily basis and adjustments made where necessary to ensure that loans remain fully collateralised
- restrictions may be placed on which securities are available to be loaned and limits on the proportion of securities that may be loaned, and
- loans may be recalled at any time at the discretion of the Responsible Entity and the securities lending agreement may be terminated at short notice should market conditions warrant such action.

In addition, the Fund has further risk mitigation in place against possible capital loss resulting from insolvency of a borrower by a legally enforceable indemnity from the securities lending agent (a related party of the Fund's custodian), who would make up any shortfall between the collateral and the cost to repurchase a loaned security.

Income earned from securities lending is returned to the Fund after the deduction of operational costs and fees payable to the securities lending agent (for operation of the program and the provision of the indemnity) and to AMP Capital for monitoring, governance and oversight. These fees are 30% and 10% of securities lending revenue respectively which are in line with normal commercial rates.

Environmental, social and governance (ESG) considerations

AMP Capital acknowledges there are links between a company's environmental and social impacts, the quality of its corporate governance, and its long-term financial success. AMP Capital has an ESG and Responsible Investment (RI) Philosophy describing our approach to considering these issues in our investment decision making which is available at www.ampcapital.com/esg-and-responsible-investment.

Decisions about whether to buy, hold or sell investments will still be based primarily on financial and economic factors. ESG issues may be taken into account by us in making these decisions as part of our investment research and analysis where we believe these factors may have a financially material impact on the value and performance (risk and/or return) of the investment. AMP Capital also engages with the board and management teams of companies in which we invest on relevant ESG topics as part of our investment research and proxy voting process.

However, in addition to consideration of financial and economic factors as noted above, AMP Capital may, in exceptional circumstances, exclude or divest (negatively screen), companies, asset types or industry sectors from the Fund where they have been determined as contravening the following ethical principles as defined in AMP Capital's ESG and RI Philosophy. In making such a decision, AMP Capital will take into account the extent (if any) to which a company's activities (conduct), products or services:

- violate the principle of respect for persons which affirms the intrinsic dignity of all people irrespective of age, gender, race, religion and prohibits the treatment of any human being merely as a means to an end, and/or
- can be used without causing harm to others including those who may choose to make use of the relevant goods or services.

In undertaking its assessment AMP Capital will consider (without limitation):

- whether activities (conduct), products or services contravene principles accepted under international human rights laws including but not limited to UN conventions
- the principle of 'double effect' – which may allow conduct that is not intrinsically wrong and is undertaken for an ethically justified 'principal effect' even if it has an unintended harmful 'secondary' (double) effect. Where a form of conduct may have a harmful 'double effect', AMP Capital will assess the extent to which the company is actively engaged in minimising and mitigating the unintended harm
- the extent to which the relevant activity, product or service is material to the conduct of the company in which the investment is to be made, and
- any reasonable argument or rebuttal submitted in good faith, as to why an adverse assessment may be based on an error of fact or assumption.

Where certain investments or sectors are determined by AMP Capital as contravening these ethical criteria, they will be excluded from the universe of permissible investments for the Fund. Where an existing investment is identified as contravening the ethical criteria, it will be sold down by us generally within a period of up to twelve months. This decision to exclude or divest investments is known as negative screening.

In summary, at present the application of the ethical principles outlined above will result in the negative screening of companies that AMP Capital believes have:

- known involvement in the production and manufacture of, or essential or significant involvement in the distribution and sale of, tobacco, or
- material involvement in the manufacture, maintenance or delivery of cluster munitions, anti-personnel mines, chemical or biological weapons.

We may update or vary these exclusions from time to time, following review and approval by AMP Capital's Investment Committee. Further information and detail on the application and scope of AMP Capital's ESG and RI Philosophy and a current list of sectors and individual companies subject to exclusion are available at

www.ampcapital.com/esg-and-responsible-investment.

These exclusions do not apply where AMP Capital invests in a pooled vehicle or fund managed by another investment manager and AMP Capital is unable to influence exclusive control over the investable universe of such a vehicle or fund, and such an investment will be subject to whatever ESG policy is adopted by the investment manager of that vehicle or fund. The negative screening will also not apply to cash, sovereign bonds, derivatives and exchange traded funds.

AMP Capital's Investment Committee is responsible for ensuring that any decision to negatively screen a company, asset type or industry sector from the investable universe of the Fund takes into account fund investment objectives and strategy and recommendations from AMP Capital's research and investment teams. Adherence to and monitoring of any excluded investments is overseen by AMP Capital's Investment Committee in consultation with AMP Capital's ESG and compliance monitoring functions and is generally reviewed annually.

More generally, except to the extent disclosed above in relation to consideration of ESG issues where it is believed these factors may have a financially material impact on the value and performance of the investment, and negative screening in exceptional circumstances on an ethical basis, AMP Capital has no predetermined view about what we regard to be a labour standard, environmental, social or governance consideration or how far they will be taken into account in the selection, retention or realisation of investments relating to the Fund.

CONTACTING AMP CAPITAL

Further information

If you have questions about investing in the Fund or require further information, please contact our Client Services team on 1800 759 543 between 8.30am and 5.30pm Sydney time, Monday to Friday.

Further information about the Fund is also available online at www.ampcapital.com/mfund. This information may include performance reports.

When reading Fund performance information, please note that past performance is not a reliable indicator of future performance and should not be relied on when making a decision about investing in the Fund.

Updating your details

To update your contact details or other information, please contact your broker.

Communicating with you

Investment information

We will send you the following investment information:

- confirmation of each transaction (other than transactions made through a regular investment plan)
- quarterly statements which show the balance of your investment and any transactions made and fees charged since your last statement, and
- an AMMA statement at the end of each tax year.

Fund information

We will provide you with the following information free of charge, on request:

- the Fund's annual financial reports
- a paper copy of any updated information, and
- any replacement PDS or updated incorporated information.
