### **Production Capacity Graph Update**

The Board has updated the Production Graph vs Sales Orders.

We apologise for any confusion, however, the production capacity were quarterly figures and we have put annualised capacity in brackets.

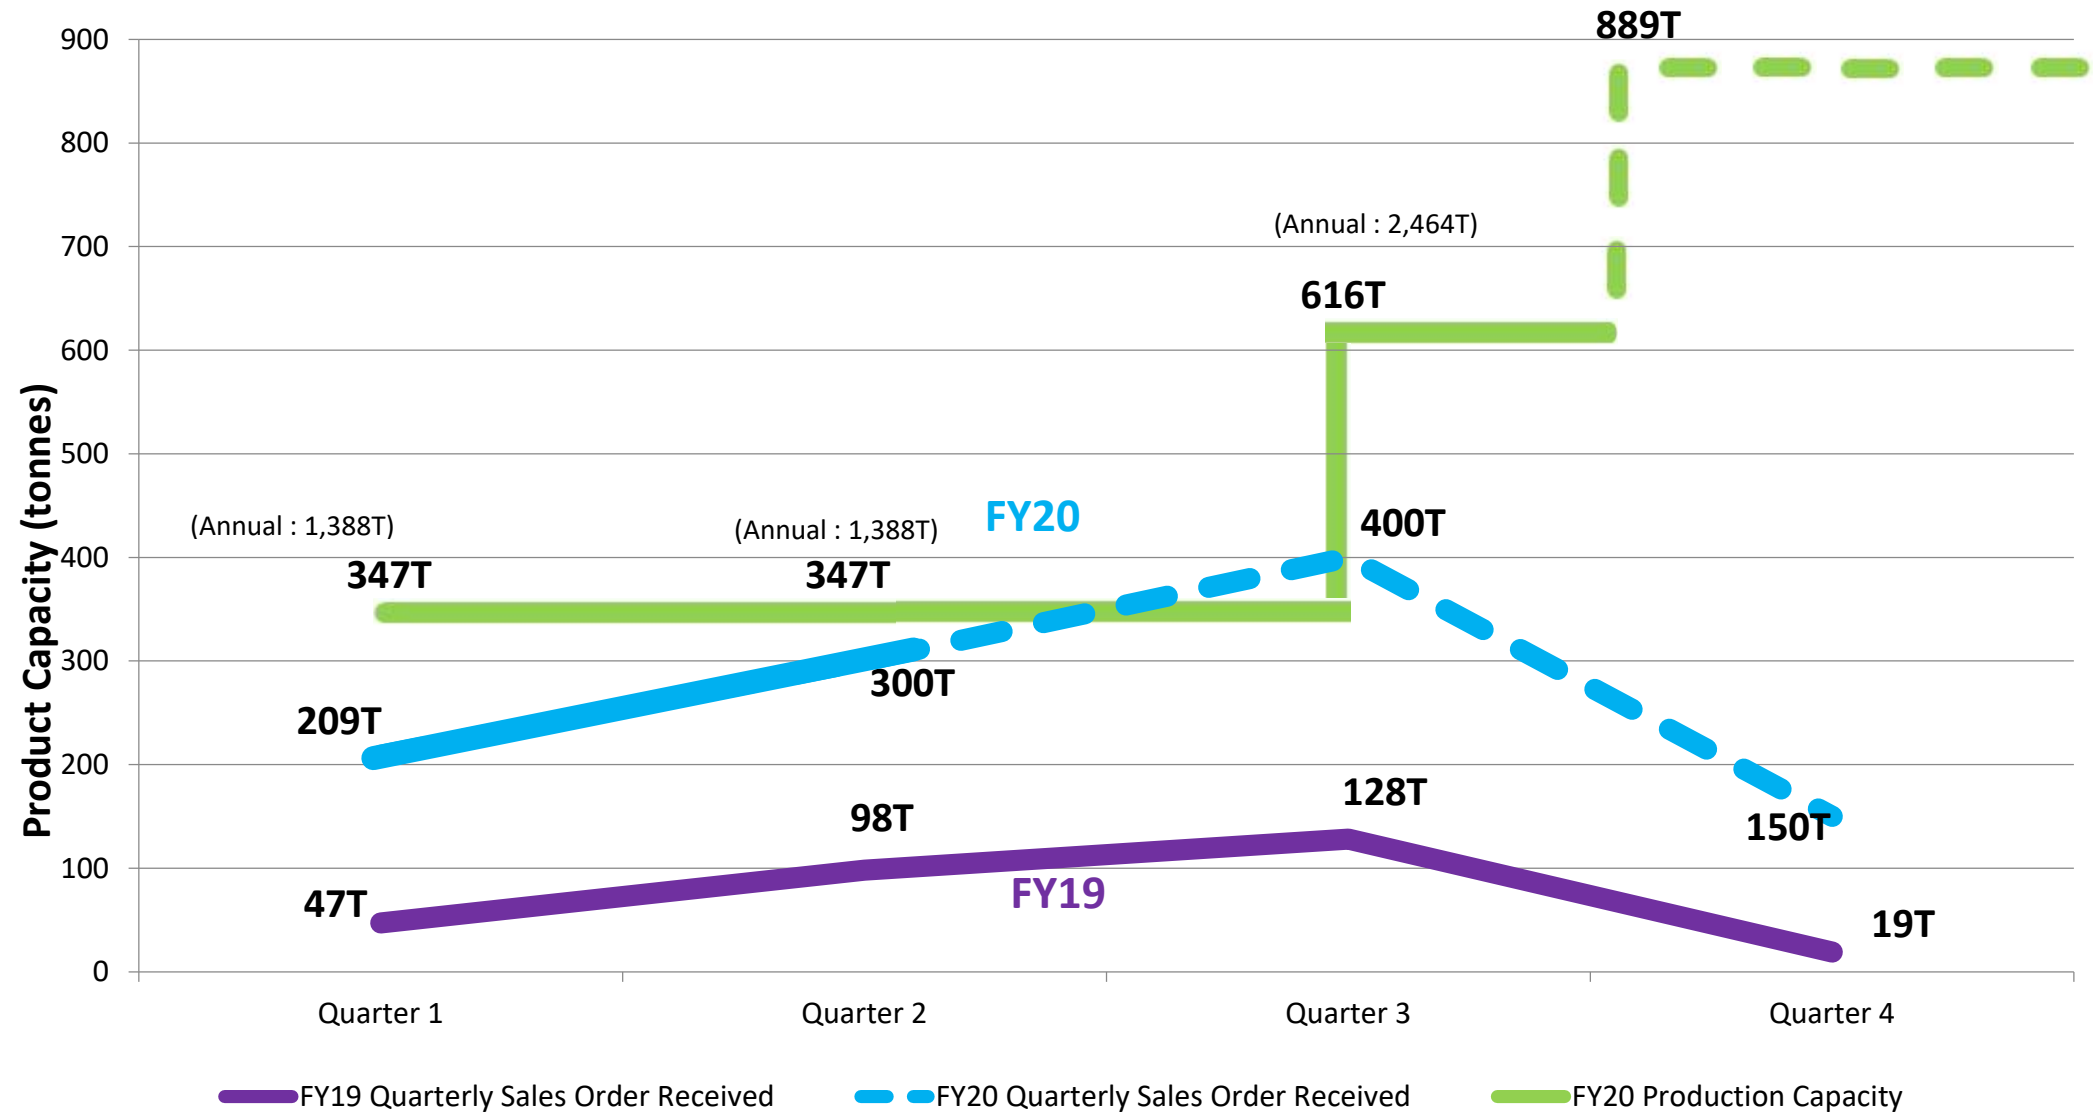

To clarify this graph

- a) We anticipate sales orders to be approximately 1,000T for the year ending 30 June 2020.
- b) Our production capacity once equipment is operational in December will be in excess of 2,400T over a twelve month period as from January 2020.

Lev Mizikovsky

Chairman

# Quarterly Sales Orders Vs Quarterly Production Capacity

- These sales figures (2019/20 projection) are based on the current pace of sales orders and are a guide only. (Please refer to the disclaimer on page 9).
