Chairman's letter

29 October 2019

Dear Shareholder

I am pleased to write to you, as a valued shareholder of Wagners Holding Company Ltd (**Wagners**), and offer you the opportunity to participate in Wagners' recently announced 1 for 6.25 fully underwritten renounceable entitlement offer of fully paid ordinary shares in Wagners (**New Shares**) at an issue price of \$1.55 per New Share (**Entitlement Offer**).

Entitlement Offer

On Tuesday, 29 October 2019, Wagners announced its intention to raise approximately \$40 million (before offer costs) through the Entitlement Offer.

The proceeds of the Entitlement Offer will be applied principally to repay debt to allow subsequent funding of near-term growth opportunities. The benefits that are expected to flow from this initiative, for Wagners and its shareholders, are described in Wagners' investor presentation lodged with the Australian Securities Exchange (**ASX**) on 29 October 2019 (and included in this Information Booklet in section 2).

Under the Entitlement Offer, eligible shareholders have the opportunity to invest at the price of \$1.55 per New Share. The issue price of \$1.55 per New Share represents a 10.2% discount to TERP.¹

The number of New Shares you are entitled to subscribe for under the Entitlement Offer (**Entitlement**) is set out in your personalised Entitlement and Acceptance Form that is enclosed in this Information Booklet.

The Entitlement Offer is fully underwritten by Morgans Corporate Limited (the **Underwriter**), with a priority sub-underwriting commitment from Wagner Property Operations Pty Ltd, an entity associated with the Company's largest Wagner family shareholders (**Wagner Family Founding Shareholders**). This commitment represents an amount equal to 55% of the total amount being raised under the Offer (which reflects the current aggregate 55% voting power of the Wagner Family Founding Shareholders in the Company).

The Entitlement Offer is renounceable and therefore your Entitlements may be traded on ASX or otherwise transferred if you do not wish to take up some or all of the New Shares to which you are entitled. A market will be established by Wagners on ASX to facilitate the trading of Entitlements.

Other information

This Information Booklet contains important information, including:

¹ The Theoretical Ex-Rights Price (**TERP**) is the theoretical price at which Wagners' shares should trade immediately following the ex-date for the Entitlement Offer assuming 100% take up of the Entitlement Offer. TERP is a theoretical calculation only and the actual price at which Wagners' shares trade immediately following the ex-date for the Entitlement Offer will depend on many factors and may not approximate TERP. The TERP has been calculated by reference to the daily volume weighted average price of Wagners' Shares on Friday, 25 October 2019 of \$1.755 per share, being the last trading day prior to the announcement of the Entitlement Offer.

- the investor presentation referred to above, which was released to ASX on 29 October 2019, and provides information on Wagners, the Entitlement Offer and key risks for you to consider;
- instructions on how to apply, detailing how to participate in the Entitlement Offer if you choose to do so, and a timetable of key dates;
- a personalised Entitlement and Acceptance Form which details your Entitlement, to be completed in accordance with the instructions; and

The Entitlement Offer closes at 5.00pm on Friday, 15 November 2019.

1 Description and effect of the Offer

1.1 Overview

The Entitlement Offer is a renounceable offer of approximately 25,806,452 New Shares at \$1.55 per New Share to raise about \$40 million (before direct offer costs including fees paid to the Underwriter and advisers and to providers of specific services to cover share registry, printing and postage costs).

The proceeds of the Entitlement Offer will be applied principally to repay debt and strengthen the balance sheet for future near-term growth opportunities.

Eligible Shareholders who are on Wagners' share register on the Record Date are entitled to acquire 1 New Share for every 6.25 shares held on the Record Date (**Entitlement**).

Fractional Entitlements will be rounded up to the nearest whole number of New Shares.

The issue price of \$1.55 per New Share represents a 10.2% discount to TERP.³

An Entitlement and Acceptance Form setting out your Entitlement accompanies this Information Booklet. Eligible Shareholders may subscribe for all or part of their Entitlement.

Eligible Shareholders who do not take up all of their Entitlements will have their percentage shareholding in Wagners diluted.

Eligible Shareholders should be aware that an investment in Wagners involves risks. The key risks identified by Wagners are summarised in the Investor Presentation set out in section 2 and in section 4 of this Information Booklet.

1.2 Entitlement trading

The Entitlement Offer is renounceable, meaning that Eligible Shareholders may sell their Entitlements to third parties if they do not wish to take them up. A market will be established on ASX to facilitate this Entitlements trading.

Entitlements trading commences on ASX on Thursday, 31 October 2019 and will cease trading at 5pm (AEDT) on Friday, 8 November 2019.

³ The Theoretical Ex-Rights Price (**TERP**) is the theoretical price at which Wagners' shares should trade immediately following the ex-date for the Entitlement Offer assuming 100% take up of the Entitlement Offer. TERP is a theoretical calculation only and the actual price at which Wagners' shares trade immediately following the ex-date for the Entitlement Offer will depend on many factors and may not approximate TERP. The TERP has been calculated by reference to the daily volume weighted average price of Wagners' Shares on Friday, 25 October 2019 of \$1.755 per share, being the last trading day prior to the announcement of the Entitlement Offer.

1.3 Underwriting

Morgans Corporate Limited is Lead Manager and Underwriter to the Entitlement Offer and has underwritten the full amount of the Entitlement Offer on the terms set out in the Underwriting Agreement. Customary with these types of arrangements:

- (a) the Underwriting Agreement includes a number of termination events, including:
 - (i) market related termination events, including in the event that there is a 10% fall in the S&P/ASX 200 Index for more than two consecutive days; and
 - (ii) a material adverse change in the assets, liabilities, financial position or performance, profits, losses or prospects of Wagners and its controlled entities;
- (b) the Underwriter will receive:
 - (i) an underwriting fee of 1.50% of the gross proceeds of the Entitlement Offer less the amount being sub-underwritten by the Wagner Family Founding Shareholders as described below (**Adjusted Offer Proceeds**) plus GST; and
 - (i) a management fee of 1.00% of the Adjusted Offer Proceeds plus GST;
- (c) the Underwriter is entitled to reimbursement of certain expenses; and
- (d) Wagners has agreed to indemnify the Underwriter and others against their losses in connection with the Entitlement Offer.

1.4 Sub-underwriting

The Underwriter has received a priority sub-underwriting commitment from Wagner Property Operations Pty Ltd, an entity associated with the Company's largest Wagner family shareholders (**Wagner Family Founding Shareholders**). This commitment represents an amount equal to 55% of the total amount being raised under the Offer (which reflects the current aggregate 55% voting power of the Wagner Family Founding Shareholders in the Company).

Due to personal structuring considerations, the Wagner Family Founding Shareholders are participating in the Offer through the sub-underwriting position described above and, accordingly, do not intend to take up their rights directly under the Offer.

1.5 Impact on control

The Wagner Family Founding Shareholders currently hold, or have a relevant interest in, the following shares:

Shareholder ⁴	Shares	Voting Power
Denis Wagner	88,756,575	55.00%
Joe Wagner	88,756,575	55.00%
John Wagner	88,756,575	55.00%
Neill Wagner	88,756,575	55.00%
Henry Wagner	88,756,575	55.00%

⁴ Including those Shareholders' associates and related entities.

Following completion of the Offer, and allocations under the sub-underwriting arrangements, the Wagner Family Founding Shareholders are expected to hold, or have a relevant interest in, the following shares (noting their association with Wagner Property Operations Pty Ltd):

Shareholder⁵	Shares (approximately)	Voting Power
Denis Wagner	102,950,123	55.00%
Joe Wagner	102,950,123	55.00%
John Wagner	102,950,123	55.00%
Neill Wagner	102,950,123	55.00%
Henry Wagner	102,950,123	55.00%
Wagner Property Operations Pty Ltd	14,193,548	7.58%

The Company does not expect any increase in voting power of the Wagner Family Founding Shareholders or any other material affect on control of the Company as a result of the Offer.

1.6 Shortfall facility

A shortfall may arise if applications received for New Shares under the Entitlement Offer (including the Entitlements of Ineligible Shareholders) are less than the number of New Shares offered and the Underwriter does not acquire that shortfall under the Underwriting Agreement (or through the sub-underwriting arrangements).

The Directors reserve the right, subject to the requirements of the Listing Rules and the Corporations Act, to place such Shortfall Shares within three months after the Closing Date to either existing or new Shareholders at their discretion. If issued, these Shortfall Shares will be issued at a price not less than the Issue Price of New Shares under the Entitlement Offer. Shareholders will not receive any payment or value for the Entitlements not taken up under the Entitlement Offer that are subsequently taken up as Shortfall Shares.

1.7 Eligibility of Shareholders

The Entitlement Offer is being offered to all Eligible Shareholders.

An Eligible Shareholder is a Shareholder on the Record Date who:

- (a) has a registered address on the Wagners share register in Australia or New Zealand or is a Shareholder that Wagners has otherwise determined is eligible to participate;
- (b) is not in the United States and is not a person (including nominee or custodian) acting for the account or benefit of a person in the United States; and
- (c) is eligible under all applicable securities laws to receive an offer under the Entitlement Offer without any requirement for a prospectus to be lodged or registered.

The Entitlement Offer is not being extended to the Ineligible Shareholders because of the small number of those Shareholders, the number and value of the Shares they hold and the cost of complying with applicable regulations in jurisdictions outside Australia and New Zealand.

⁵ Including those Shareholders' associates and related entities.

1.8 Nominee for Ineligible Shareholders

Wagners has appointed the Nominee, on normal commercial terms, as nominee for the Ineligible Shareholders to arrange for the sale of the Entitlements which would have been offered to them. The Nominee will arrange for proceeds (if any), net of expenses, to be paid to the Company (or its Share Registry) who then will arrange for those proceeds to be distributed proportionally to each Ineligible Shareholder. The Nominee will have the absolute and sole discretion to determine the timing and the price at which the Entitlements may be sold and the manner of any sale. Neither Wagners nor the Nominee will be subject to any liability for the failure to sell the Entitlements or to sell them at a particular price.

If, in the reasonable opinion of the Nominee, there is not a viable market for the Entitlements that would have been offered to the Ineligible Shareholders or a surplus over the expenses of sale cannot be obtained for those Entitlements, then the Entitlements will be allowed to lapse and they will form part of the Shortfall Shares.

1.9 Ranking of New Shares

The New Shares issued under the Entitlement Offer will be fully paid and rank equally with Existing Shares.

1.10 Allotment

Wagners will make an application within seven days from the date of this Information Booklet for quotation of the New Shares on ASX. It is expected that allotment of the New Shares under the Entitlement Offer will take place no more than six Business Days after the close of the Entitlement Offer.

Application Monies will be held by Wagners on trust for Applicants until the New Shares are allotted. No interest will be paid on Application Monies.

It is the responsibility of Applicants to determine the number of New Shares allotted and issued to them before trading the New Shares. The sale by an Applicant of New Shares before receiving their holding statement is at the Applicant's own risk.

1.11 Capital structure

Subject to the rounding up of fractional Entitlements, the capital structure of Wagners following the issue of New Shares is expected to be as follows:

Existing Shares on issue as at the date of this Information Booklet	161,375,590
Approximate new Shares issued under the Entitlement Offer	25,806,452
Approximate total number of Shares after the Entitlement Offer	187,182,042

WAGNERS

KEY RISKS

WAGNERS

KEY RISKS

Key risks for equity raising participants

Contractual risks	<ul style="list-style-type: none"> Wagners operates, and will continue to operate, through a series of contractual relationships with customers and suppliers. All contracts, including those entered into by the Company, carry a risk that the respective parties will not adequately or fully comply with their respective contractual rights and obligations, or that these contractual relationships may be terminated. Wagners may also be impacted if services performed by sub-contractors, that Wagners may engage from time to time, are not performed in accordance with contractual obligations.
Decreases in capital investment and construction activity in the Australian infrastructure sector	<ul style="list-style-type: none"> A significant number of Wagners' key customers operate in the Australian infrastructure sector (comprising resources, energy production and non-resources related infrastructure construction). There can be no assurance that the current levels of capital investment and construction activity in the Australian infrastructure sector will grow, be maintained or not be reduced in the future. Reduced demand for Wagners' products and services resulting from reduction in or delays in current levels of capital investments and construction activity in the Australian and international infrastructure sector may materially and adversely affect Wagners' revenue, profitability and growth.
Manufacturing and product quality risk	<ul style="list-style-type: none"> Wagners' products must meet regulatory requirements which are subject to continual review, including inspections, by the relevant regulatory authorities. Failure to continuously comply with applicable regulatory requirements or to take satisfactory action in response to an adverse inspection could result in enforcement actions such as shutdowns of, or restrictions on, manufacturing operations, delay in the approval of products, refusal.
Workplace health and safety	<ul style="list-style-type: none"> Wagners' employees are at risk of workplace accidents and incidents given the nature of the industry in which Wagners operates. Workplace accidents and incidents resulting in employee injury may result in penalties under relevant work health and safety legislation, and harm reputation and financial performance.
Supplier risk	<ul style="list-style-type: none"> The Company contracts with and has access to a number of key suppliers on which it relies for the supply of electricity and various raw materials (including clinker, gypsum, slag and glass fibre) both locally and internationally. Disruption in local and international supply contracts (electricity, shipping, raw materials) could cause product delays and potential loss of profitability.
Cyclical nature of business	<ul style="list-style-type: none"> The construction industry can be cyclical in the volume of business undertaken. The construction cycles in Australia may adversely affect the Company's financial performance. The loss of major customers through industry downturns or for any other reason could impact earnings of Wagners.
Operating risks	<ul style="list-style-type: none"> The Company's overall operations may be adversely affected by various factors, including but not limited to failure to sell its products, failure to achieve production, mechanical failure or plant breakdown, unanticipated manufacturing problems, infrastructure availability and unexpected shortages or increases in the cost of consumables, spare parts, labour, plant and equipment, unanticipated sourcing problems (including delays, disruptions or quality control problems), industrial and environmental accidents, industrial disputes or delays due to government actions. The costs and availability of plant, equipment and construction materials may also affect profitability. In particular, any operational failure or disruption at Wagners' Pinkenba facility may have a materially adverse effect on Wagners' profitability. Periods of adverse weather conditions can also reduce construction activity and lead to a decrease in demand for Wagners' products in areas affected by those weather conditions. In addition, any deterioration in the availability of third party transportation providers, or significant increases in the costs of affordability of transportation providers may adversely affect Wagners' ability to service its customers.

19

WAGNERS

KEY RISKS

Key risks for equity raising participants

Environmental claims	<ul style="list-style-type: none"> Wagners operates in an industry where environmental issues may potentially delay contract performance or result in a shutdown of a project, causing a deferral or preventing receipt of anticipated revenues. Environmental risks may give rise to remediation obligations, civil claims and criminal penalties. Any potential liability or penalty could result in a significant financial loss.
Movements in foreign exchange rates	<ul style="list-style-type: none"> Unfavourable movements in the foreign exchange rates between the Australian dollar and the currencies of Wagners' import and export markets may decrease Wagners' profit margins. This may increase the cost of raw materials sourced from overseas (such as clinker and slag), or adversely affect the demand for Wagners' products in relevant export markets. Movements in exchange rates can also make products which compete with Wagners' products in its export markets more competitive by creating a cost advantage for other exporters which could have a material adverse impact on the financial performance and prospects of Wagners.
Remote locations	<ul style="list-style-type: none"> Wagners frequently undertakes projects in remote locations. This may involve difficulties for plant, equipment and materials and some locations involve inherent risk to personnel.
Inability to secure adequate insurance	<ul style="list-style-type: none"> Whilst Wagners seeks to maintain insurance coverage that is consistent with industry practice, there is a risk that any claim under Wagners' insurance policies may be subject to certain exceptions, or may not be honoured (in full or in part). Wagners may also be unable to purchase sufficient insurances to cover all losses incurred. If Wagners were to incur substantial liabilities, or if its business operations were interrupted for a sustained period of time, it may suffer loss. Such losses may not be fully covered by Wagners' insurance policies. In addition, future coverage may not be available to Wagners when required, at commercially acceptable premiums, or at all.
Competition and loss of reputation	<ul style="list-style-type: none"> The industry in which the Company operates is intensely competitive. A number of companies, both in Australia and abroad, may be pursuing the development of products and services that target the same markets that Wagners is targeting. The Company's products may compete with existing products that are already available to customers. In addition, a number of companies, both in Australia and abroad, may be pursuing the development of products that target the same customers that the Company is targeting. The Company may face competition from parties who have substantially greater resources than the Company. Downward pricing pressures are experienced from time to time as a result of competitive pressures (which may include potential new entrants in the market) and Wagners is not always able to quickly recover increases in operating expenses through higher selling prices (if at all). The success of Wagners is partly reliant on its reputation and brand. Any event or occurrence that diminishes Wagners' reputation or brand could have a significant adverse financial effect on Wagners.
Reliance upon systems and technology and cyber security	<ul style="list-style-type: none"> Wagners' services and operations are heavily reliant upon technology and information systems. Wagners has invested significantly in the development of information systems designed to assist the Company to monitor individual contracts, maximise profits, manage relationships and identify and rectify risk or loss making situations. These systems may fail, or not operate effectively, and this may negatively impact on the business and the Company's performance. Failures or breaches, cyber-attacks, data theft and hacking of Wagners' electronic systems may lead to disruptions that negatively impact Wagners' business operations, potentially resulting in financial losses to Wagners and its Shareholders.
Regulation	<ul style="list-style-type: none"> Wagners is subject to a broad and increasingly stringent range of environmental laws, regulations and standards. Unfavourable changes to the regulatory environment for civil contracting and construction services in Australia may have an impact on the profitability of Wagners.
Reliance on third parties	<ul style="list-style-type: none"> Through its participation in contracts with third parties, Wagners relies on others for the success of its current operations. Problems caused by third parties may arise which have the potential to affect Wagners' financial performance and prospects. Subject to relevant agreements, Wagners cannot control the actions of third parties. Therefore, it cannot guarantee that its current operations will be carried out or managed in accordance with its preferred direction or strategy.

20

WAGNERS

KEY RISKS

Key risks for equity raising participants

Wagners may be adversely impacted by industrial relations issues

Relationships with related parties may deteriorate

Debt covenants may be breached if performance declines

Requirement to raise additional funds

People, training and skills

Growth

Capital structure risk

Foreign operations

- Wagners may be adversely impacted by industrial relations issues in connection with its employees or the employees of its customers, contractors and suppliers due to strikes, work stoppages, work slowdowns, grievances, complaints, claims of unfair practices or other industrial activity under the enterprise bargaining arrangements governing their employment arrangements. Such enterprise bargaining arrangements are subject to renegotiation from time to time, which may result in product delays, increased labour costs or industrial action. These circumstances may materially and adversely affect Wagners' operational and financial performance.
- Wagners has entered into various related party arrangements with Wagner Corporation Pty Ltd, including a number of leases and licences and a wharf services agreement of key operational sites. Breakdown of relationships could destabilise harmony between parties leading to less than optimal usage and occupancy of site.
- Factors such as a decline in Wagners' operational and financial performance could lead to a breach of its banking covenants. If a breach occurs, Wagners' financiers may seek to exercise enforcement rights under the debt facilities, including requiring immediate repayment, which may have a materially adverse effect of Wagners' future financial performance and position.
- The Company may be required to raise additional equity or debt capital in the future. There is no assurance that it will be able to raise that capital when it is required or, even if available, the terms may be unsatisfactory. If the Company is unsuccessful in obtaining funds when they are required, the Company may need to delay or scale down its operations.
- Wagners' success depends on its ability to attract and retain qualified key Personnel, including key members of Wagners' senior management team. There may be a negative impact on Wagners if any of its key Personnel leave. It may be difficult to replace them, or to do so in a timely manner or at a comparable expense. Additionally, any key Personnel of the Company who leaves to work for a competitor may adversely impact the Company.
- The day-to-day management of Wagners relies on senior managers and Directors and the success of Wagners' business depends on its ability to attract and retain qualified key personnel, including key members of Wagners' senior management team, and maintain a motivated, engaged workforce.
- There is a risk that the Company may be unable to manage its future growth successfully, and no guarantee Wagners can maintain or grow project volume or pipeline – including potential negative impacts from factors beyond Wagners' control (e.g. decline in industry growth, lack of slow market acceptance of NGBM products, lack of available sites to establish ready-mix concrete plants, inability to obtain requisite approvals for quarry operations).
- The Wagner family retains a significant holding in Wagners and therefore has significant influence over the Company, including in relation to resolutions requiring the approval of Shareholders. This collective interest may also have an impact on liquidity (particularly having regard to the escrow arrangements referred to below), as well as acting as a potential deterrent to corporate transactions.
- Wagners derives a proportion of its revenue from operations in foreign countries. There are certain risks inherent in doing business on an international level, such as unexpected changes in regulatory requirements, tariffs, customs, duties and other trade barriers, difficulties in staffing and managing foreign operations, longer payment cycles, problems in collecting accounts receivable, political instability, expropriation, nationalisation and war. There may also be fluctuations in currency exchange rates, foreign exchange controls which restrict or prohibit repatriation of funds, technology export and import restrictions or prohibitions and delays from customers, brokers or government agencies. Wagners could also be adversely affected by seasonal reductions in business activity and potentially adverse tax consequences, any of which could adversely impact the success of Wagners' international operations.

4 Principal risk factors

References to Wagners in this section include its subsidiaries.

4.1 General market risks

Investors should be aware that the market price of Wagners' securities may be influenced by a number of factors. General movements in local and international stock markets, exchange rates, prevailing economic conditions, investor sentiment and interest rates could all affect the market price of Wagners' securities. These risks apply generally to any investment on the stock market.

In addition to the general risks associated with investing in the stock market, there are risks specific to investing in any particular entity. Some risks may be outside Wagners' control and not capable of mitigation. If in doubt about the general or specific risks associated with Wagners' securities, you should seek advice from your professional advisers.

Investment risks

Factors affecting the price at which Wagners Shares are traded on ASX could include domestic and international economic conditions. In addition, the prices of a listed entity's securities are affected by factors that might be unrelated to its operating performance, such as general market sentiment.

Macro economic risks

Wagners' operating and financial performance is influenced by a variety of general economic and business conditions including the level of inflation, interest rates and government fiscal, monetary and regulatory policies. Prolonged deterioration in general economic conditions, including an increase in interest rates, could be expected to have a corresponding adverse impact on the Company's operating and financial performance.

Taxation risks

A change to the current taxation regime in Australia or in overseas jurisdictions in which Wagners operates may affect Wagners and its shareholders.

Accounting standards

Australian accounting standards are set by the Australian Accounting Standards Board (**AASB**) and are outside Wagners' control. Changes to accounting standards issued by AASB could materially adversely affect the financial performance and position reported in Wagners' financial statements.

4.2 Specific risks

Below is an analysis of some of the specific business risks facing Wagners in the conduct of its activities. Wagners is exposed to risks relevant to many businesses, including increasing competition, information systems failure risk and protection of intellectual property. This section is intended to be a concise summary of the key risks to Wagners' business – not an exhaustive list of all possible risks.

Decreases in capital investment and construction activity in the Australian infrastructure sector

A significant number of Wagners' key customers operate in the Australian infrastructure sector (comprising resources, energy production and non-resources related infrastructure construction). There can be no assurance that the current levels of capital investment and construction activity in the Australian infrastructure sector will grow, be maintained or not be reduced in the future.

Reduced demand for Wagners' products and services resulting from reduction in or delays in current levels of capital investments and construction activity in the Australian and international infrastructure sector may materially and adversely affect Wagners' revenue, profitability and growth.

Manufacturing and product quality risk

Wagners' products must meet regulatory requirements which are subject to continual review, including inspections, by the relevant regulatory authorities. Failure to continuously comply with applicable regulatory requirements or to take satisfactory action in response to an adverse inspection could result in enforcement actions such as shutdowns of, or restrictions on, manufacturing operations, delay in the approval of products, refusal.

Workplace health and safety

Wagners' employees are at risk of workplace accidents and incidents given the nature of the industry in which Wagners operates. Workplace accidents and incidents resulting in employee injury may result in penalties under relevant work health and safety legislation, and harm reputation and financial performance.

Supplier contracts

The Company contracts with and has access to a number of key suppliers on which it relies for the supply of electricity and various raw materials (including clinker, gypsum, slag and glass fibre) both locally and internationally. Disruption in local and international supply contracts (electricity, shipping, raw materials) could cause product delays and potential loss of profitability.

Operating risks

The Company's overall operations may be adversely affected by various factors, including but not limited to failure to sell its products, failure to achieve production, mechanical failure or plant breakdown, unanticipated manufacturing problems, infrastructure availability and unexpected shortages or increases in the cost of consumables, spare parts, labour, plant and equipment, unanticipated sourcing problems (including delays, disruptions or quality control problems), industrial and environmental accidents, industrial disputes or delays due to government actions.

The costs and availability of plant, equipment and construction materials may also affect profitability. In particular, any operational failure or disruption at Wagners' Pinkenba facility may have a materially adverse effect on Wagners' profitability.

Periods of adverse weather conditions can also reduce construction activity and lead to a decrease in demand for Wagners' products in areas affected by those weather conditions. In addition, any deterioration in the availability of third party transportation providers, or significant increases in the costs of affordability of transportation providers may adversely affect Wagners' ability to service its customers.

Environmental claims

Wagners operates in an industry where environmental issues may potentially delay contract performance or result in a shutdown of a project, causing a deferral or preventing receipt of anticipated revenues. Environmental risks may give rise to remediation obligations, civil claims and criminal penalties. Any potential liability or penalty could result in a significant financial loss.

People, training and skills

Wagners' success depends on its ability to attract and retain qualified key Personnel, including key members of Wagners' senior management team. There may be a negative impact on Wagners if any of its key Personnel leave. It may be difficult to replace them, or to do so in a timely manner or at a comparable expense. Additionally, any key Personnel of the Company who leaves to work for a competitor may adversely impact the Company.

The day-to-day management of Wagners relies on senior managers and Directors and the success of Wagners' business depends on its ability to attract and retain qualified key personnel, including key members of Wagners' senior management team, and maintain a motivated, engaged workforce.

Remote locations

Wagners frequently undertakes projects in remote locations. This may involve difficulties for plant, equipment and materials and some locations involve inherent risk to personnel.

Competition and loss of reputation

The industry in which the Company operates is intensely competitive. A number of companies, both in Australia and abroad, may be pursuing the development of products and services that target the same markets that Wagners is targeting.

The Company's products may compete with existing products that are already available to customers. In addition, a number of companies, both in Australia and abroad, may be pursuing the development of products that target the same customers that the Company is targeting. The Company may face competition from parties who have substantially greater resources than the Company.

Downward pricing pressures are experienced from time to time as a result of competitive pressures (which may include potential new entrants in the market) and Wagners is not always able to quickly recover increases in operating expenses through higher selling prices (if at all).

The success of Wagners is partly reliant on its reputation and brand. Any event or occurrence that diminishes Wagners' reputation or brand could have a significant adverse financial affect on Wagners.

Relationships with related parties may deteriorate

Wagners has entered into various related party arrangements with Wagner Corporation Pty Ltd ACN 623 195 335, including a number of leases and licences and a wharf services agreement of key operational sites. Breakdown of relationships could destabilise harmony between parties leading to less than optimal usage and occupancy of site.

Debt covenants may be breached if performance declines

Factors such as a decline in Wagners' operational and financial performance could lead to a breach of its banking covenants. If a breach occurs, Wagners' financiers may seek to exercise

enforcement rights under the debt facilities, including requiring immediate repayment, which may have a materially adverse effect of Wagners' future financial performance and position.

Growth

There is a risk that the Company may be unable to manage its future growth successfully, and no guarantee Wagners can maintain or grow project volume or pipeline – including potential negative impacts from factors beyond Wagners' control (e.g. decline in industry growth, lack of/ slow market acceptance of new generation building materials products, lack of available sites to establish ready-mix concrete plants, inability to obtain requisite approvals for quarry operations).

Reliance on third parties

Through its participation in contracts with third parties, Wagners relies on others for the success of its current operations. Problems caused by third parties may arise which have the potential to affect Wagners' financial performance and prospects. Subject to relevant agreements, Wagners cannot control the actions of third parties. Therefore, it cannot guarantee that its current operations will be carried out or managed in accordance with its preferred direction or strategy.

Financial risk

Wagners' activities expose it to a variety of financial risks: credit risk, liquidity risk, and market risk consisting of interest rate risk, foreign currency risk and other price risk (commodity and equity price risk).

Contractual Risks

Wagners operates, and will continue to operate, through a series of contractual relationships with customers and suppliers.

All contracts, including those entered into by the Company, carry a risk that the respective parties will not adequately or fully comply with their respective contractual rights and obligations, or that these contractual relationships may be terminated. Wagners may also be impacted if services performed by sub-contractors, that Wagners may engage from time to time, are not performed in accordance with contractual obligations.

Cyclical nature of business

The construction industry can be cyclical in the volume of business undertaken. The construction cycles in Australia may adversely affect the Company's financial performance. The loss of major customers through industry downturns or for any other reason could impact earnings of Wagners.

Movements in foreign exchange rates

Unfavourable movements in the foreign exchange rates between the Australian dollar and the currencies of Wagners' import and export markets may decrease Wagners' profit margins. This may increase the cost of raw materials sourced for overseas (such as clinker and slag), or adversely affect the demand for Wagners' products in relevant export markets. Movements in exchange rates can also make products which compete with Wagners' products in its export markets more competitive by creating a cost advantage for other exporters which could have a material adverse impact on the financial performance and prospects of Wagners.

Inability to secure adequate insurance

Whilst Wagners seeks to maintain insurance coverage that is consistent with industry practice, there is a risk that any claim under Wagners' insurance policies may be subject to certain exceptions, or may not be honoured (in full or in part). Wagners may also be unable to purchase sufficient insurances to cover all losses incurred.

If Wagners were to incur substantial liabilities, or if its business operations were interrupted for a sustained period of time, it may suffer loss. Such losses may not be fully covered by Wagners' insurance policies. In addition, future coverage may not be available to Wagners when required, at commercially acceptable premiums, or at all.

Reliance upon systems and technology and cyber security

Wagners' services and operations are heavily reliant upon technology and information systems. Wagners has invested significantly in the development of information systems designed to assist the Company to monitor individual contracts, maximise profits, manage relationships and identify and rectify risk or loss-making situations. These systems may fail, or not operate effectively, and this may negatively impact the business and the Company's performance.

Failures or breaches, cyber-attacks, data theft and hacking of Wagners' electronic systems may lead to disruptions that negatively impact Wagners' business operations, potentially resulting in financial losses to Wagners and its Shareholders.

Regulation

Wagners is subject to a broad and increasingly stringent range of environmental laws, regulations and standards. Unfavourable changes to the regulatory environment for civil contracting and construction services in Australia may have an impact on the profitability of Wagners.

Wagners may be adversely impacted by industrial relations issues

Wagners may be adversely impacted by industrial relations issues in connection with its employees or the employees of its customers, contractors and suppliers due to strikes, work stoppages, work slowdowns, grievances, complaints, claims of unfair practices or other industrial activity under the enterprise bargaining arrangements governing their employment arrangements. Such enterprise bargaining arrangements are subject to renegotiation from time to time, which may result in product delays, increased labour costs or industrial action. These circumstances may materially and adversely affect Wagners' operational and financial performance.

Requirement to raise additional funds

The Company may be required to raise additional equity or debt capital in the future. There is no assurance that it will be able to raise that capital when it is required or, even if available, the terms may be unsatisfactory. If the Company is unsuccessful in obtaining funds when they are required, the Company may need to delay or scale down its operations.

Capital Structure Risk

The Wagner family retains a significant holding in Wagners and therefore has significant influence over the Company, including in relation to resolutions requiring the approval of Shareholders. This collective interest may also have an impact on liquidity (particularly having regard to the escrow arrangements referred to below), as well as acting as a potential deterrent to corporate transactions.

Foreign operations

Wagners derives a proportion of its revenue from operations in foreign countries.

There are certain risks inherent in doing business on an international level, such as unexpected changes in regulatory requirements, tariffs, customs, duties and other trade barriers, difficulties in staffing and managing foreign operations, longer payment cycles, problems in collecting accounts receivable, political instability, expropriation, nationalisation and war. There may also be fluctuations in currency exchange rates, foreign exchange controls which restrict or prohibit repatriation of funds, technology export and import restrictions or prohibitions and delays from customers, brokers or government agencies. Wagners could also be adversely affected by seasonal reductions in business activity and potentially adverse tax consequences, any of which could adversely impact the success of Wagners' international operations.
