

## Glenaras Gas Project – Production Update

8 November 2019

Galilee Energy Limited (ASX:GLL) (“Galilee”) is pleased to provide an update on production operations at its 100% owned and operated Glenaras multi-lateral pilot programme located in the Galilee Basin.

The pump change out at the Glenaras 15L well is now complete, with a higher capacity pump successfully installed and commissioned. The new, larger pump is back on full production with fluid levels being drawn down on Glenaras 15L, while each of the four other wells have continued to produce uninterrupted in line with expectations.

An update on flow rates will be provided to the market in the coming weeks as we realise the full impact of this pump upgrade.
