

Successful Organic Certification of Yaringa Farm

The Board of Australian Dairy Nutritionals Group (**AHF** or the **Group**) is pleased to advise that the Group's 'Yaringa Farm' located in Nirranda South, Victoria successfully achieved organic certification on Friday, 22 November 2019. The picturesque farm is located in the heart of the 'Golden Triangle' of Australia's dairy industry, on the Great Ocean Road in South Western Victoria.

The certification provides third party assurance to the Group's customers that the milk is 100% certified organic and suitable for use in organic production systems certified to the National Standard for Organic & Biodynamic Produce (**Export Standard**) and the equivalent Australian domestic standard, AS6000. Certification is evidenced by the application of the Southern Cross Certified Australia certification mark (pictured below). The certification is valid to 7 November 2020 and is subject to an annual audit process.

The Export Standard allows the Group to sell milk from Yaringa Farm into any market within Australia and all Non-Regulated Markets outside Australia. Non-Regulated Markets do not have a national organic program to which imported products must be certified including Singapore, Malaysia and Hong Kong.

Organic milk produced from Yaringa Farm will be utilised for the manufacture of the Group's own organic milk products as well as contract packing arrangements with brand owners. Conversion of the Group's other farms remains on track, with all remaining farms to achieve certification throughout 2021. Once the farms have achieved organic certification, the Group will be one of Australia's largest wholly owned organic farming enterprises.

At the appropriate time, the Group will apply for certification to the Chinese national standard for organic compliance to enable export to China of organic milk powders and infant formula products.
