

ASX ANNOUNCEMENT

Appendix 4C – Quarterly Cash Flow Report

Highlights for the quarter ended 31st December 2019

- **Research and Development Tax Incentive of \$708k received**
- **Agreement signed for Distribution into the Middle East a market of 260 million people.**
- **Cash balance at 31st December \$1,087k.**

31st January 2020: Analytica Ltd (ASX: ALT), manufacturer of the PeriCoach® system and the Enhanced Infusion System technologies, has today released its Appendix 4C - Quarterly Cashflow report for the period ending 31st December 2019.

Analytica received \$708k tax incentive for the eligible Research and Development expenditure in financial year ended 30th June 2019. This federal government incentive to foster Australian research and development is of great assistance developing the world leader technology of the PeriCoach for improving women's health.

Although, at this stage, there is no material financial impact of the Distribution Agreement on Analytica, the Company considers that it represents a new strategic direction being undertaken by it.

The appointed distributor is an established local distributor of health related products to hospitals in the region. The distributor has been appointed exclusively for 4 years for the sale and distribution of the PeriCoach® device in the target markets of Egypt, Saudi Arabia, UAE, Kuwait, Bahrain, Jordan, Lebanon and Iran. The strategy will be to sell product through obstetric hospitals. Under the agreement, the distributor is required to use best endeavours to achieve minimum sales volumes during the term. Analytica believes there is demand in these markets for the PeriCoach® system. The magnitude of Urinary Incontinence among Middle Eastern and North African women stands at 54% compared to 33% in western countries. This is a result of the greater number of children Middle Eastern women bear. Dr Monsour said, "The Middle East with 260 million people is a substantial market with a pressing need for a discrete, effective system to treat urinary incontinence. Discussions are continuing with other potential distribution partners for other markets".

Authorised for release by the Board.

About Analytica Limited

Analytica's lead product is the PeriCoach® System – an e-health treatment system for women who suffer Stress Urinary Incontinence. This affects 1 in 3 women worldwide and is mostly caused by trauma to the pelvic floor muscles as a result of pregnancy, childbirth and menopause.

PeriCoach comprises a device, web portal and smartphone app. The device evaluates activity in pelvic floor muscles. This information is transmitted to a smartphone app and can be loaded to a cloud database where physicians can monitor patient progress via web portal. This novel system enables physicians to remotely determine if a woman is performing her pelvic floor exercises and if these are improving her condition. Strengthening of the pelvic floor muscles can also potentially improve sexual sensation or satisfaction and orgasm potential in some women.

PeriCoach has regulatory clearance for urinary incontinence in Australia and has CE mark and USFDA 510(k) clearance.

PeriCoach also has clearance in Australia, and CE Marking in Europe for the treatment of pelvic organ prolapse, a condition that affects up to 1 in 5 women during their lifetime.
