## **Singapore National Environment Agency lists Aeris Active on Interim List of General Disinfectants effective for the COVID-19 (Coronavirus Disease 2019) Virus**

Aeris Environmental Ltd (Aeris) has been notified by the Singapore National Environmental Agency (NEA) that its proprietary hospital-grade disinfectant with residual, Aeris Active, has been added to a list of approved general products for the disinfection of COVID-19 (Coronavirus Disease 2019) Virus.

NEA is a statutory board under the Ministry of the Environment and Water Resources in Singapore. It is responsible for improving and sustaining a clean and green environment in Singapore, and for maintaining public health.

Aeris Active contains a 'dual active' biocide system, providing broad spectrum viricidal, bactericidal and fungicidal efficacy together with proprietary 'residual protection' affording, in addition to the initial kill, long-term (200 touch or seven day) protection of at-risk surfaces.

Aeris is working closely with authorities in the region to provide technical support, advice and products to assist with the containment of the current epidemic.

Aeris is currently scaling up production, redirecting its manufacturing capacity, in the near term, to multiple Australian manufacturing sites. This is to support the needs of its customers, and the growing demand in China and the APAC region.

## **About Aeris Environmental Ltd**

Aeris develops, manufactures and markets proprietary, environmentally-friendly technology that drives measurable improvements in asset performance and sustainability. Aeris' whole-of-system approach ensures that systems perform better, are safer, last longer and cost less to run.

Aeris' products solve real world problems more effectively than conventional toxic chemicals. Uniquely based on validated green formulations, Aeris' enzymes and treatments with residual protection provide long-term remediation, and prevention of mould, bacteria growth, corrosion and improved hygiene.

AerisVIEW, Aeris' cloud-based visualisation network, is uniquely scalable across all climate-controlled environments, including buildings of all sizes, and vehicles. Aeris' solution delivers dramatic and proven energy savings, alongside documented benefits to system efficiency, and independently-validated indoor air quality with proven immediate improvements in sustainability and cash flow savings.
