ANO Update

Share Price

The Board of Directors are not aware of any circumstances which has caused a 6.5% decrease in the share price. None of the Directors are selling or buying at present.

EU Classifies Titanium Dioxide as Carcinogen by Inhalation

The FDA have maintained that there are only two safe ingredients (GRASE) for sunscreen manufacture – zinc oxide and titanium dioxide. The EU released a statement on Friday that will require all labels with >1% titanium dioxide “ as a category 2 suspected carcinogen by inhalation under EU regulations (EC) No 1272/2008 on classification, labelling and packaging (CLP) of substances and mixtures” from September 9, 2021.

Product Testing Facility - Brisbane

We are in the process of establishing a production test facility to develop and trial end products. This facility will enable ANO to deliver improvements to products in line with manufacturer and end customer requirements. We anticipate this facility should be working within the next 6 months.

New Products for Cosmetics and Sunscreen

ANO is pleased to advise that it plans to release 2 new products, 1 powder + 1 dispersion, subject to final testing and registration of the products with global regulatory bodies.
